US and China clash EC launches study into crisis over employment

THE EUROPEAN Commission has opened a wide-ranging study of unemployment in the EC in response to fears that Europe is losing the battle to remain competitive with the US and Asia.

The study is expected to tackle the politically sensitive question of whether Europe's welfare state is indirectly contributing to low growth, rising unemployment and the failure to create oew

Mr Jacques Delors, commission president, has ordered "dozens of papers" on Europe's unemploy-ment crisis, according to Commu-nity officials involved. The aim is to produce a report at the EC summit in Copenhagen next month, along with the EC's modest "growth initiative"

More than 17m people are out of work in the EC. Mr Delors'

PAGE 16 German strikes win wide

US-China trade row ■ Britons hijack Danish referendum

support

study into the causes of unemployment and bis search for potential remedies reflects his concern about political instability in Europe, but also a nagging worry about the EC's long-term competitiveness.

The EC created 9.4m net new obs between 1983 and 1990, partly in anticipation of the 1992 single market. But since 1990 it has lost a net 1.4m jobs. The short-term economic ontlook is bleak, with the EC unlikely to grow more than 1 per cent this year and probably less than 1.5

per cent next year. Senior EC officials yesterday described the Delors study as a "medium to long-term" study of the EC economy, leaving no areas untouched.

The areas it will attempt to essess include: • the competitive impact of floating exchange rates in the US and the IIK

• the potential counterweight of a future single European cur-trade practices in the US and

 the use of applied research as a tool for generating jobs

the role of the welfare state in Europe.

industrial policy

The most controversial area is the role of welfare state. Mr Delors has left colleagues in little doubt about his support for social policy; hut his call for fresh thinking means the study is likely to tackle the automatic right to social security and the commitment to minimum wages

One issue Intriguing Brussels officials is whether Mr Delors' intellectual curiousity will lead him to re-examine the social chapter of the Maastricht treaty which strengthens workers rights and is the subject of controversy in the UK. The ruling Conservative government won a treaty opt-out on the social chapter, arguing that It would hurt UK companies' competitiveness.

Mr Delors has already won support from Sir Leon Brittan in tackling the issue of European competitiveness in an interview, Sir Leon said German industry's complaints about the costs of employment in western Europe showed the issue was "creeping up the agenda". The Commission could play an important role in opening public debate, without necessarily legislating, he said.

Commission officials stressed yesterday that the Delors study is an academic exercise only, and there is no desire to create a USstyle society in Europe, with min-Imum social provisions. "But we do recognise that there may be problems with excessive nonwege costs, particularly among the lower paid," said one official. The Delors study was commis-

sioned a few weeks ago amid concern about management weaknesses in DG-5, the social policy directorate. Mr Sigismundo Crespo, the Spanish director-general was unable to communicate in English with his boss, Mr Flynn, the Irisb commissioner. Mr Crespo resigned last week.

But Brussels officials said another factor in Mr Delors' thinking was concern about the direction of a separate study on the labour market ordered by the conservative-minded Mr Padraig Flynn, the Irish commissioner.

GEC and Ericsson drawn into illicit funding scandal

Head of Italy's Iri arrested on corruption charges

By Robert Graham in Rome

MR Franco Nobili, chairman of Iri, Italy's biggest state holding company, was yesterday arrested by Milan magistrates and transferred to the city's San Vittore jail on charges of corruption.

Mr Nobili, 62, holds the most prominent position in the Italian

public sector. Until now the Iri group has only figured in a minor way in the 15-month long investigations by Milan magistrates into illicit funding of the political parties, mainly through kick-backs paid on contracts.

The Italian subsidiaries of two foreign companies operating in the lucrative telecommunications sector - Sweden's Ericsson and the UK's GEC - also had their chief executives arrested on charges of alleged corruption. The arrests relate to a developing line of inquiry by Milan magis-trates into kickbacks allegedly paid for a share in Italy's large telecommunications investments. Mr Nohili has been Iri chairman since 1990, having heen appointed to this post, traditionally controlled by the Christian Democrat Party, by his friend Mr

prime minister. The operations of Iri are unlikely to be affected since Mr Nohili was effectively forced into a representational role last August when Irl's status was

Giulio Andreotti, who was then

Franco Nobili, chairman of Iri, the biggest Italian state bolding company, who was arrested yesterday

changed to a joint stock company. The running of Iri and strategic planning has been in the hands of Mr Michele Tedeschi, the managing director.

Within the past two months the management of the country's three main state-run industrial groups have all become implicated in the corruption scandals. in March, Mr Gabriele Cagliari, the chairman of ENI, the state oil concern, was arrested along with the beads of the group's four

main subsidiaries on charges of

Since then a complex picture of illicit funding of political parties, has emerged from ENI companies, believed to have been worth L27bn (\$17.6m) since 1989. At the same time, Mr Mauro Leone, deputy chairman of Efim, the industrial holding placed in liquidation last July, was arrested on charges of alleged fraud.

The allegations of corruption in Mr Nobili's case are understood to refer to his time as Iri chairman and during 1978-89 when he ran Cogefar, one of the country's allegedly falsifying accounts.

The magistrates are reportedly mainly concerned with his activities to Cogefar, prior to its merger with Fiat's Impresit in 1989. The alleged payment of bribes by Cogefar-Impresit to obtain contracts has been the main account on which magis-trates bave been questioning Fiat executives over the past year.

Mr Nobili's arrest is linked to questioning of Mr Enzo Papi, former managing director of Coge-far-Impresit, arrested last May and held for 55 days before admit-

Europe tries to heal Bosnia rift

EUROPEAN governments yesterday attempted to defuse a rift with the US over what action to take in Bosnia by pointing out that differences between allies on such complex issues were a normal hazard of transatlantic pollcy co-ordination.

Mr Douglas Hurd, the British foreign secretary, said in parliament that be saw oo purpose in "exchanging accusations across the Atlantic" and cited several areas of agreement.

In particular, discussions were continuing on possible military measures against the Bosnian Serbs if they persisted in their refusal to endorse a United

Though not mentioning him by name, Mr Hurd was clearly referring to highly critical remarks made by Senator Joseph Biden, a member of the US Senate foreign relations committee, when be told a questioner in the House of Commons: "I don't think some of those remarks would have been made if those coocerned bad actually seen the exchanges

which have taken place between

the allies in recent days, or if

they had understood the nature

some of us, including this coun try [the UK], are actually making in Bosnia." Mr Biden bad accused European governments on Tuesday of "blgotry and hypocrisy" for resisting US efforts to save Bosnian Moslems from what be called "fascist thuggery" on the part of the Bosnian Serbs.

In reply, British and French officials bave pointed ont that the lives of their peacekeeping troops in Bosnia would be endangered if their neutral status was

By Robert Mautimer, Diplomatic ty-backed peace plan, he said. of the effort and the risk which undermlned by air strikes against Bosnian Serb positions of a lifting of the UN arms embargo in favour of the Bosnian Moslems. Since the US did not bave any ground forces in Bosnla, Washington would not be running a similar risk.

A senior British government official had earlier defended the right of European countries to express reservations and doubts about US policy options.

Clinton's objective, Page 2

Britain likely to retaliate over California unitary tax

By George Graham in Washington

THE BRITISH government ts expected to announce today that it will retaliate against US companies if the long-running dispute over California's unitary taxation system is not resolved by the end of the year. Mr Norman Lamont, chancellor

of the exchequer, is expected to announce that the UK will cancel a tax break given to US companies on the dividends they receive from their British subsidiaries. This would cost them about £250m (\$385m) a year.

The retaliation would come the day before the US Supreme Court is expected to decide whether to hear the case brought by Barclays Bank, the UK clearing bank, against California's unitary tax system.

Under this system, California may assess tax on a proportion of the worldwide profits of a group, calculated by the size of its payroll, sales and property in the state, instead of only taxing profits actually made in the state. Poreign businesses say this

conflicts with the method used in almost all other countries, and exposes them to paying tax twice on the same profits.

The UK passed legislation authorising the government to retaliate against US companies in 1986, but that law has never yet been implemented. Although the UK Treasury had wanted to wait and see if the Supreme Court settled the matter in Barclays' favour, Mr Lamont and Mr John Major, the prime minister, have been heavily lobbied by backbench members of parliament and by British companies such as Guinness, Smith Kline Beecham and BAT, who argued for immediate retaliation.

The European Community has also threatened retaliation. although any EC action is likely to be much later. The UK Treasury declined to comment.

The Barclays case has been making its way through the courts for more than 10 years. but the Supreme Court is Barclays' last chance of reversing a ruling by the California supreme court in favour of the state. Previous US administrations

have sided with Barclays against California. But President Bill Clinton earlier this month decided out to file a brief on Bar-clays' side, motivated principally hy worries about the possible financial loss to the almost bankrupt California treasury. California estimates that if it

lost the suit, it would have to refund about \$520m of tax and interest and would miss out on another \$350m of taxes it has not yet collected. Another \$3.1bo could be at stake if it also lost a connected suit brought hy Colgate-Palmolive. For Barclays, the case involves over \$30m. The cancellation of advance

corporation tax credits to US companies - which might he backdated two years - would raise the tax rate paid by their UK subsidiaries from 28 per cent to the standard 33 per cent. UK law gives the government

the option of targeting the retaliation at all US companies with a taxpaying presence in California (virtually all US groups), or to those with a California base or those with 7% per cent of property, payroll and sales there.

lower house.

By John Lloyd In Moscow

RUSSIAN President Boris Yeltsin yesterday signed a decree calling for a special assembly of the Council of the Federation for June 5 to "consider and finalise preparation" of a new Russian constitution.

Mr Yeltsin's plan is that the council would adopt a new constitution, thereby hypassing the federal parliament. Under the present amended Soviet-era constitution, it is parliament's responsibility to pass any new constitution.

The council will be composed of two representatives from each of Russia's 88 regions and autonomous republics as well as representatives of the president and parliament.

Simultaneously yesterday the Russian parliament launched its own timetshle for a new constitution.

The announcements marked the beginning of a process certain to divide the country between the conservative parliament and its regional allies on the one side and President Yeltsin and his supporters on

Mr Ruslan Khashulatov, parliamentary Speaker and Mr Vitaly Zorkin, chairman of the constitution, both told meetings of the regional council representatives that Mr Yeltsin would be guilty of "a crime" if he pressed ahead with his plans to adopt a new constitution.

in a speech of pointed feroc-lty. Mr Khasbulatov said that Mr Yeltsin's "political games" would cause the disintegration of the Russian federation.

He also warned the regional leaders - whom Mr Yeltsin has been woolng - that "those high

Yeltsin tries | Clinton seeks to contain Bosnian war

PRESIDENT Bill Clinton mnre" steps to enconrage peace in the Bosnian civil war and to help confine the

However, he appears to have mne back tn the drawing board in his efforts to find a Bosnian policy, placing much more emphasis on measures to prevent the violence spreading beyond Bosnia.

Among the measures Mr Clinton is considering is sending US troops to join United

nia, as a safeguard against the conflict spilling over into other areas of the former Yngoslavia. However, White House officials said yesterday that no decision was immi-

The president is also contemplating placing monitors along the border between Bosnia and Serbia to see if the Serbian government fulfils its promise to cut off all hnt humanitarian supplies to the Bosnian Serbs.

Last week, Clinton administration officials were arguing for an end to the UN arms

embargo which has hampered the Bosnian Moslems in their efforts to defend themselves against the much better-armed Bosnian Serbs.

They were also pressing for the embargo coupled with a short campaign of air strikes to hold the Serhian militias in check until the Moslems could be rearmed

Although US officials deny there has been any change in that poilcy, there has been a shift of emphasis, in recognition of the reluctance of several European allies to see the arms embargo lifted.

the goal of ending the violence

Those who have criticised the Europeans include Senator Richard Lugar, the senior foreign policy spokesman for the Republican opposition, and, more shrilly, Senator Joseph Biden, the Democratic chairman of a Senate subcommittee

on European affairs. Senator Lngar said: "We really do want the British and the French to be on board. We want support from the Germans and the Russians and other Europeans whn really ought to be with us on this

"I see the president moving steadily and trying to move onr allies steadily, and the people who will need to vote for Security Council anthorisatinn of force steadily," Mr Lugar added.

Others acknowledge, however, that doubts remain within the administration, and still more so within the Congress, over what policy to pur-

While some congressinnal leaders fiercely advocate military intervention, the rankand-file of both parties in Conthat could come to resemble Vietnam.

Mr Clinton said in a radio interview yesterday morning that he wanted "to make sure that there is no Vietnam", but said that wanting to avoid the mistakes made in Vietnam did not mean that the US should do nothing.

"The hig difference from the point of view of the average American is f have made it very clear that the United States, unlike in Vietnam, is not about to act alone," Mr

Croat troops fighting street hy street in Mostar for a fourth straight day yesterday against Moslem-led government soldiers

Street fighters snub peace plea

By Laura Silber in Belgrade and agencies in Mosta

HEAVY fighting continued yesterday between Croatian forces and the Moslem-led Bosnian army in the south-western Bosnian city of Mostar, but there were reports that a ceasefire had been agreed and would come into force within the next 24 hours.

Moslem-controlled Bosnian radio reported that a truce had been signed under which troops from both sides were to return to their barracks hy noon today. A later report said hand-to-hand fighting was still going on in Mostar and fires were burning in the city.

Croat troops have been trying for four days to break a Moslem foothold on the west side of the Neretva River, which hisects Mostar and which Bosnian Croats want to mark as their eastern-most boundary. The Croatian

Defence Council (HVO) was holding more than 1,300 Moslem civilians at the airport building outside Mostar, after forcing them from their homes,

UN officials said yesterday.

Meanwhile, General Philippe
Morillon, the UN military commander, met leaders of the Bosnian army and Bosnian Croat forces in Medjugorje, about 20 km south-west of Mostar. He was also to meet Bosnian Croat leader, Mr Mate Boban. In eastern Bosnia, the UN evacuated the first 22 of about 200 wounded from Zepa. one of six "safe areas" declared by the UN Security Council last week, after Serbs had delayed the departure of UN helicopters.

Mr Radovan Karadzic, Bosnian Serb leader, said he expected that the Bosnian Serhs would vote against the peace plan to divide Bosnia into 10 provinces along ethnic lines in this weekend's referendum.

Russians warned state funding will be tied to reform

STATE support in Russia will in future coocentrate on those companies, farms, and even regions which showed themselves willing and able to reform. Mr Viktor Chernomyrdin, the Russian prime minis-

ter, told parliament yesterday. This strategy of "picking winners" would be combined with "strengthened state regulations" to aid reform, he said. The prime minister added. however, that the government would not take "the fatal step" of aubstituting state action for

market reforms. Mr Chernomyrdin said the government would stop issuing general credits to agricul-ture, and would instead support those farms which had proved themselves best able to produce. It would back regions which had introduced reform plans and which were willing to use their resources to further refnrms. It would also intervene more actively in the management of companies which remained in state hands, identify those which would benefit from investment, and create "financial and industrial groups". these as a m He was careful to strike a tha economy.

the "people are now slowly reestablishing their previous consumption levels". He claimed that inflation had fallen sharply in April, from a weekly rate of 6 per cent in the first week to 2.5 per cent in the last - while the drop in output was now levelling off.

"We have," said Mr Chernomyrdin, "a shaky balance. But we cannot take on ourselves economic hurdens which we cannot carry." As evidence of the latter, the prime minister referred to the difficulties in paying for what he delicately called the "April measures - promises made to increase pay and benefits hy President Boris Yeltsin in his

referendum campaign. Mr Chernomyrdin'a ray of hope was further brightened that attention would focus on these as a means of reviving

By James Blitz,

THE Bundeshank again surprised dealers in financial markets yesterday by cutting the cost of lending funds to commercial banks by a larger amount than had been ex-

pected. The German central hank cut its repo rate, which sets the cost of lending short-term

funds, hy 11 basis points to 7.60 per cent for periods of 14 days and 28 days.

The move was immediately followed hy cuts in official interest rates in hoth the Netherlands and Belgium, both of whose central banks cut their three key interest rates hy 25 basis points. There was some speculation that France will again ease its intervention rate when the Bank of France operates in the money markets

Yesterday's Bundeshank move led to new suggestions that the central bank's council will reduce its discount rate again when it meets on May 19. One London-based analyst said there was now a possibil-Ity that the discount rate.

which sets the floor for all Ger-

man rates, will come down !

tor has for the past year been very sluggish, partly because of the impact of high interest rates.

Yesterday's report, which included provisional estimates rather than firm figures. suggested that retail sales had risen by 2.1 per cent in April compared with the same month in 1992, with department stores registering a 6.5

Industry unites against Bonn social security levy

Size of Bundesbank rate cut surprises dealers

By Quentin Peel in Bonn

LEADING industrial lobbies in the German private sector yesterday denounced government plans for a new social insurance surcharge on workers and employers. They flatly rejected plans for a

DM13bn (\$8bn) statutory scheme to finance residential care for the chronically sick and elderty. They described the move as a direct threat to jobs.

investment and to economic recovery. In an extraordinary joint appeal to the government, the leaders of the four principal employers' organisations called for the whole programme to be reconsidered, and postponed, at

in spite of their urgent call, however, Chancellor Helmut Kohl's government appears to be determined to press ahead with the programme. The battle over the scheme has caused

least until recovery is under way.

serious divisions within the coalition. with the minority Free Democrats, in particular, sharing many of the private sector's misgivings.

Defenders of the plan in turn accused the private sector of "scandalous" selfishness in ignoring the urgent needs of the ageing population in Germany. The insurance plan for residential

care is seen by German industry as the last straw on the overwhelming

burden of social costs imposed on employers. They fear that an initial surcharge of 1.7 per cent on incomes would rapidly rise to double figures, as the number of old people grows within the population.

Social insurance costs already amount to 37.4 per cent on top of hasic wages, and all additional personnel costs for German employers add DM84 to every DM100 in their workers' pay packets, they say.

Mr Klaus Murmann, leader of the German employers' federation (BDA). said the scheme was "economically damaging and flawed in its basic conception ... The whole of German industry is united on this, as it has

hardly ever been before." The programme contained the potential for "an explosive rise in costs," because of growing numbers of old people, and abuse of the welfare

Italian confidence by Mr Oleg Soskovets, one of the two newly appointed first deputy prime ministers, who said yesterday that a number of Russian companies could be vote helps made competitive on the world the lira market. He said that his Russian industry portfnlio con-tained a number of potentially By Robert Graham in Rome world-class corporations and

THE Italian prime minister, Mr Carlo Azeglio Ciampi, the for-mer central hank governor, yesterday cleared the final procedural hurdle in the lengthy process of forming a new government by winning a vote of confidence in the Senate.

The financial markets reacted positively to the outcome, with the lira gaining modestly against the D-Mark and trading at L920. This compared with a parity of nearly L960 with the D-Mark when Mr Ciampi first set out to form his government

He received support similar to that provided by the parties in last week's vote in the lower house of parliament. This was based on the hacking of the outgoing coalition of Christian Democrats, Socialists, Social Democrats and Liberals, However, this time Mr Ciampi had to fend off a potential protest vote hy the Liberals and elements within the Christian Democrat party who wanted ents on aid to

house the same opposition par-

But the protest vote never materialised and Mr Clampi obtained 162 votes in favour of his programme - centred on early electoral reform and tight economic management. The main opposition parties chose to abstain or absented themselves, ensuring a majority. the south of Italy.

In the battle against corruption, some fronts remain unopened, writes Haig Simonian HROUGHOUT Italy's

Deciphering Fiat's code of ethics

political corruption scandal one vital question has gona - and may remain - unanswered: were company executives simply unwilling instruments in a network of kickbacks to politicians and parties, or were they the corrupters?

The "code of business ethics" unveiled by Fiat, Italy's higgest private company, this week, does not reveal anything about the past. But it goes some way towards eliminating the question in the future.

In three pages, Fiat's lawyers have written a code of conduct governing behaviour in dealings with the government civil servants or public-sector companies. The message is clear. In no event shall employees provide "money or goods of any kind to promote or favour the interests of one or more group companies, even following illegitimate pressure".

The han covers both cash and other kinds of "favours", which have cropped up in the leaked testimony of managers and politicians who have been interrogated. Although Fiat, which is alleged to have paid L2.4bn (£1m) for a posh Rome apartment for a senator, is not exhaustive, its list includes any form of aid or contribution, disguised as sponsorship, assignments, consultancies, advertising, etc".

The document is as forthright on monitoring and enforcement. All employees, "considered hecause of their company duties to be most affected by the principles of the Code", will have to sign. Fiat will immediately sus-

favours. Any such attempt must be reported to an employee's superior or directly to the chief executive and legal division. Sub-contractors or freelances working for the group must make the same commit-

Chief executives of group subsidiaries will have to report annually to Fiat's managing director on compliance, providing details of any attempts to extort bribes or favours. The sanction in the event of violation is clear; an employee "shall be deemed to terminate the relationship of trust existing between the company and the employee concerned, with the appropriate contractual and legal consequences on the

employment relationship" Tough talk. But does Fiat, which has seen almost a dozen of its executives in jail, under house arrest or having been briefly detained, mean what it

The question is particularly pertinent given the group's size, status and prestige. Last month. Mr Cesare Romiti, managing director, who has testified twice voluntarily hafore Milan magistratas, exhorted fellow executives to follow Flat's example of speaking out against corruption in

Other companies are also reconsidering their husiness ethlcs. Eni, the state-owned energy and chemicals group, which has been implicated even more deeply than Fiat, pend business with any public will introduce its own code

soon. in spite of the new mood of co-operation between business and the magistrates, some doubts remain that the change of heart by Fiat and other companies may be partly cosmetic. Fiat's new code leaves a number of stones unturned. It

governs relations only between the company and the public sector. Although the corruption scandal has so far involved only public-sector orders, it is not clear why Fiat is not demanding the same standards from staff when dealing with companies. private

Moreover, the code only covers Italy. Until now, magis-trates have focused their attention on allegations of domestic corruption. However, kickbacks on foreign husiness, so far restricted to Italy's state-

sponsored foreign aid pro- month, Mr Giovanni Agnelli Without broadening the code to foreign countries, Fiat

leaves itself open to accusations, often levelled against some big Italian companies by their foreign competitors, that contracts abroad have sometimes been won with hribes. Many US multinationals, particularly those operating in the developing world, have codes of practice similar to that of Fiat, but with the focus more

on foreign operations. Italian companies are particularly defenceless against claims by their competitors of unfair competition as the country has no law against paying bribes abroad. The only legal sanction, now being increas-ingly used by magistrates, is to press charges of falsifying com-

Fiat says its code will be extended abroad in time. First, it must be approved by the boards of the group's roughly 1,000 subsidiaries. Then the code must be checked against laws in foreign countries in case amendments are needed. The group says relations with other private companies are already largely covered hy an existing "internal" code of practice, which governs matters such as conflicts of internal. est. Every new manager has to

sign a declaration of agreement with the code. However, the new code, for all its worth, does not mask a lingering ambivalence on the part of the company towards corruption. Addressing fellow industrialists at a meeting of the Confindustria employers' federation in Venice last

gramme, have also heen Flat's chairman, recognised the group's involvement in politi-cal corruption, but attempted to distinguish between two dif-

ferent types of behaviour. First were companies, like Fiat, which may have been caught up in "episodes" of corruption, hut were fundamentally involved in "industry" The second category comprise unspecified companies which had based their success entirely on privileged relations with politicians. The distinction, not easy to maintain, has been only partly clarified by Fiat's new code.

Czechs to allow share transfers to Slovakia By Patrick Blum in Prague resolved THE CZECH government has decided to allow the transfer of shares in privatised Czech companies to Slovak investors, Mr Vaclav Klaus, the Czech prime minister, said yesterday, reversing an earlier controver-

sial decision not to hand over the shares. The shares were acquired by Slovak investors during last year's mass voucher privatisation before Czechoslovakia was split into the Czech Republic and Slovakia on December 31. Prague surprised investors in March by announcing that it would not hand out shares due to Slovak investors because of a dispute with Bratislava over the financial assets of the for-

mer Czechoslovak state. Mr Klaus then said the shares would be held as security against Czech government claims for compensation from Slovakia. The decision enhlttered relations between the (£6.5hn).

two countries, and the dispute over assets has still not been

The move proved controversial and it caused widespread unease among domestic and foreign investors who had until then regarded investment in the Czech Repubilc as safe from political attacks.

Large private investment funds were particularly upset as it meant the long-awaited distribution of tha shares was to be postponed indefinitely. After several delays the shares were to be distributed in April, and the funds have been waiting eagerly to start trading their shares.

Czechoslovakia's vouchar privatisation was the largest single programme of state asset disposal in the former communist countries. More than 8.5m investors

Punks and pensioners find common cause

Hugh Carnegy and Hilary Barnes on odd alliances in the anti-Maastricht ranks

unkempt, a group of postpunk youngsters appeared staid retired gentleman. But

referendum at a campaign meeting for next week's Maastricht referendum here, they cheered him as one of their own when he voiced fears thet a Yes to the treaty would endanger his pen-

This coincidence of interest captured the sometimes unexpected grouping among those who are campaigning for a No

In their efforts to achieve a repeat of last June's vote against ratification of the treaty, the anti-Maastricht forces are exploiting the electorate's fears on a wide range of issues - from the country's future as an independent nation to worries that Brussels will dictate pension and other social policy issues.

By pressing buttons which

trigger an emotional response, the No campaigners have made much of the running this spring and are hoping to confound the opinion polls, which continue to show a comfortable lead for supporters of the treaty. But they are up against the entire political establishment, not to mention the business community and the trade union movement, all of them calling for a Yes.

At the campaign meeting in Copenhagen on Tuesday night, the Noes were represented on a 10-strong panel by two left wing university professors and an MP for the right-wing populist Progress Party (the only one of the eight parties in parliament against the treaty).

Among those ranged against them were Mr Poul Nyrup Rasmussen, prime minister and leader of the Social Democratic Party, Mr Poul Schlüter, his

citizenship. But since the Maastricht treaty itself has not

been changed, the Noes argue that the voters are being

conned. One of the most potent

the Edinburgh agreement as the emperor with no clothes in the famous fable by Hans

The Noes say that if Maas-tricht proceeds, it will set

Europe on the slippery slope

towards a European super-

power, a European army and a European police, a vision which many Danes find deeply

disturbing - and was probably

the main factor in last year's

referendum defeat.
The weakness of the No cam-

peign seems to be that it has

no real alternative to offer. Mr

Rasmussen was at his most

effective at the meeting when

he shot down Professor Meyer

for his vague advocacy of

wider co-operation with the

Nordic countries and the coun-

Christian Andersen.

The disparate opponents of the treaty - stretching from left-wing environmentalists, who would really prefer to see Denmark ont of the BC alto-gether, and ex-Communists to the far right - have not come together to mount a joint campaign. But they are happy to accept each other's support.
The 1sft-wing dominated

June Movement, biggest of the anti-Maastricht organisations whose leadsrs include a long-standing former member of the central committee of the Danish Communist Party and a feminist academic, invited Lord Tebbit, inveterate British Tory opponent of Maastricht,

to address their supporters. The June Movement's representative at Tuesday evening's meeting, physics professor Niels Meyer, hammered home the message that a vote for Maastricht was a vote to sell out the country's democracy and independence to "a cen-tralistic and bureaucratic" European union.

"We shall no longer be masters in our own house. We have no need for a new Euro pean commercial and political superpower," he said to applause and whistles from the post-punkers. The Progress Party's Mrs Annette Just, by contrast, enthusiastically supports the free market basis of the internal market, but argued that the European Community did not need the Maastricht treaty's political superstructure.

One point on which all the "antis" are united is that the voters are being deceived when the government claims that the new referendum is being held "on a new basis" following last December's Edinburgh agreement between Denmark and its EC partners.

mark to opt out of the treaty's

Big gun atmed at No campaigners: Prime Minister Rasm

PM condemns licensing plans

Oslo outrage at EC oil and gas proposals

NORWAY'S government yesterday expressed strong disapproval of European Community plans to introduce an nil and gas licensing directive when it is struggling to con-vince a resistant electorate of the benefits of EC entry.

In its membership applica-tion Nurway made clear it expected to voice an opinion on formulating Europe's future energy policy. Its position should be given considerable weight in proposals for the regulation of licences for exploration and exploitation.

Mrs Gro Harlem Brundtland, Norwegian prime minister, said that her country, as west-ern Europe's biggest oil pro-ducer and main supplier of natural gas, took a keen interest in all European moves and

measures relating to energy.

"We do not view the introduction of this proposal as a very positive move before Nor-

way might be joining the Com-munity," she said. "The situa-tion reminds us of 1972 when the EC adopted a fisheries policy shortly before Norway was going to make the decision on whether to become a member of the EC. That move in itself had a considerable impact on

the Norwegian referendum." Norwegian voters rejected EC membership in 1972 - mainly hecause of the fish issue - in a bitterly devisive referendum. It began fresb membership negotiations with the Community last month. Norway finds it difficult to

understand the need for a licensing directive. "On the contrary," said Mrs Brundtland. it may damage the image of the Community among the people in Norway in the run-up to a new referendum.

The proposed directive would have considerable impact on Norway and little or negligible impact on most EC countries, the prime minister

Phone bill cuts will help Irish **business**

By Andrew Adonis

IRELAND'S state-owned telecommunications company is to make large cuts in international call rates, but will increase residential and some local charges to compensate.

Telecom Eireann said its aim was to belp business. The changes would also belp align more closely the prices and costs of calls - a process of rebalancing" tariffs taking place across Europe.

International call rates will fall by between 16 and 59 per cent from September. The peak-time rate for calls 10 Britain will fall from 48 Irlsh pence a minute to 30p, and calls to continental Europe from 61p a minute to between 36p and 48p.

The minimum charge for local calls in peak period will change from 11.2p for 15 minntes to 9.5p for three minntes. Residential customers will also have to pay more VAT on their phone bills.

Consumer groups reacted angrily to the changes; business welcomed the prospect of cheaper overseas calls.

Brussels clears aircraft link-up

THE European Commission has approved a German-Dutch alliance to build regional and commuter aircraft, 18 months after turning down the pro-posed Franco-Italian takeover nf de Havilland, the Canadian aircraft manufacturer, in the

The acquisition by Deutsche Aerospace (Dasa) of 51 per cent of Fokker, the Dutch manufacturer, was assessed on the same basis as the de Havilland decision but posed no competi-

However, it could open the way for a possible four-way link-up to build regional and commuter jets and turbo-prop aircraft with Aérospatiale of France and Alenia of Italy. Both bid unsuccessfully for de Havilland in 1991.

That is still the only deal to have been outlawed under the

political uproar in France and Italy. The main argument within the Commission was over the definition of the market for commuter aircraft. But the companies and governments also argued that Europe needed a strong manufacturer if it was to hold its own in the

world market. Dasa, a subsidiary Daimler Benz, has invited Aérospatiale and Alenia to take a minority stake in Fokker in due course. A spokesman for the German company admitted yesterday that such a deal would pose much greater competition problems than the

Dase-Fokker link-up.
Using the same criteria as in the de Havilland case, the Commission decided the turboprop activities of Dasa and Fokker did not overlap. Dasa does not manufacture jets directly, and, although it is part of Airbus, Brussels

We understand. Life won't be all Sun.

If the movement to open systems shows one thing, it is that few companies are comfortable about enforcing a "single brand" strategy.

Even apart from the fact that no single computer company will ever be able to supply excellent solutions in absolutely every area, there are solid business reasons why an open strategy means a mixed strategy.

Devolved management means giving managers the power to manage, including what information systems they buy. And how else can a company maintain its ability to

change, to cooperate with suppliers and buyers, to ensure quality everywhere in its organisation, without an open approach? Unfortunately, from being a

catalyst for change, some big IT systems have become boat anchors, keeping business rooted in the 1970's. At Sun, we believe in an IT future

that's downsized. To make that a reality, we offer a range of the finest workstations and servers in the world.

But we understand too, that what you need tomorrow depends on today. Mainframes, minicomputers, PC's.

And adopting an open systems strategy doesn't always mean starting again from scratch.

As a pioneer of open systems, we have always worked to ensure that the best we can offer today complements the best of yesterday. So that the route to better IT value can be charted in advance, and travelled at your own pace.

Call us on 0800 661177 and we'll send you an information pack on connectivity, downsizing and coexistence with other systems of today and tomorrow.

Miyazawa denies Cambodia pullout

By Robert Thomson in Tokyo

MR KIICHI Miyazawa, Japan's prime minister, yesterday gave assurances the country would not withdraw from a United Nations peace-keeping operation in Cambodia, but said the government would renew requests for tighter security for Japanese participants.

Controversy over the killing last week of a Japanese police officer has threatened not only Tokyo's role in the Cambodian operation, but challenged the country's longer-term policy of taking an international political profile appropriata to its

Over the past few days, the Japanese mainstream media has improbably suggested that tbe peace-keepers were unfairly exposed to risk in Cambodia, that the operation was designed to go wrong to ensure a greater domestic role for Japan's military, and even that the depth of reaction to the killing is due to the unique emphasis that Japanese put on the value of life.

In the face of sustained criticism, a government poorly prepared for the likelihood of casualties has fumbled badly

resence in Cambodia. Mr Miyazawa, in a specially called press conference yesterday, attempted to put the UN peacekeeping operations in a broader context and to put Japan's international ambitions back on course.

"We have a commitment to assist in the Cambodian election process, and we will honour that commitment," Mr Miyazawa said. "The death of the officer is regrettable, and I, as the head of government, feel

In splte of Mr Miyazawa's assurances yesterday, it is clear that the peace-keeping policy could collapse if there are further casualties. A retreat would compromise Japan's campaign for a permanent seat on the UN Security Council and make it very difficult for tha government to commit troops to future peacekeeping operations.

As well as the police officer killed last week, four others were injured in the same ambusb, apparently by the Khmer Rouge guerrilla gronp, which has boycotted the election.

The Japanese government,

rise sharply after the election on May 23, have hinted the peace-keeping policy will be reviewed after the vote, but is likely to wait for other leading countries to withdraw before pulling out. In addition to the 75

civilian police and 600 military personnel already sent to Cambodia, 41 Japanese election monitors left Tokyo yesterday, 12 fewer than originally planned. The government has requested that the monitors be sent to secure areas, and is still negotlating with the UN on improving conditions for the

However, Mr Keijiro Murata, the home affairs minister, who has just visited Cambodia, said the government should not be seen to be asking for special treatment for Japanese police, although it should ensure that they have enough water, food and other supplies to perform their duties.

"There is really a very large gap between the perception Japanese have of tha UN operations and the international perception. We have to be aware of that gap," Mr Mur

The Dalai Lama speaking to the press in London yesterday

Tibetan leader voices fears of 'cultural genocide'

Dalai Lama calls for dialogue

By Alexander Nicoll Asia Editor

THE DALAI Lama, Tibet's

At a press conference in Lon-

a meeting in 1979 between Mr Deng and the Dalai Lama's brother, acting as his emissary. Without accepting this starting point, discussions would be pointless, he indicated.

The Dalai Lama's suggestion of autonomy under Chinese sovereignty has been made before. But his urgent desire for dialogue on such an approach clearly reflects his growing concern about transfers of Chinese people into Tibet and the devastation of Tibetan culture.

Population movements into Tibet, he said, involved violations of human rights, environmental problems, and "cultural genocide".

issue of population transfers with China. He would also urge China to start a dialogue with Tibetans including the Dalai Lama"without any preconditions".

This toughering of Britain's position on Tibet Came recently after China sought to Impose conditions on talks, officials said. Britain believes Tioet should be autonomous but recognises the "special position" of China - an approach in line with that of most other countries which do not believe complete indepen-

dence from China is realistic. A group of European ambassadors to Beijing is due to visit Tibet later this month to seek first-hand evidence. Travellers report the wholesale demoli-

tion of Tibetan buildings and

their replacement with stalls for mostly Chinese vendors. Mr Robbie Barnett, director of a London-based Tibet information network, said one recent visitor had reported an "architectural holocaust".

There are no reliable estimates of movements of Chinese into Tibet, although China specialists note that movements of people from rural to urban areas in search of commercial opportunities are common throughout China. China meanwhile kept up its

campaign to discredit the Dalai Lama, Its London embassy issued a document accusing him of acting "in total disre-gard of historical facts" and insisting that life for Tibetans was much better than under the previous "feudal serfdom"

Bangkok fire 'will not harm company'

THE Hong Kong owners of a Thai toy plant where at least 204 workers, mostly young women, died in one of the wolrd's worst factory fires said yesterday the disaster would do their company's finances little harm, Renter reports from Hong Kong.

Kader Holdings, which has a 40 per cent stake in the Bang-kok factory, said it regretted the blaze and had sent condolences to the families of the dead. The announcement made no mention of compensation for the victims families. The company said it "believes that the accident will have no sub-

stantial financial impact". Guards at the Bangkok plant said workers had been locked in to prevent pilfering. Workers said there were no fire alarms or fire escapes.

Mr Kenneth Ting, chairman, told the South China Morning Post a smaller blaze had hit the factory in 1989. "Every pre caution was taken after the 1989 fire to improve the situation, but nothing could be done to stop Monday's fire as it was caused by an electrical spark." However, Thai police said initial investigations indicated an electric fault was not to blame, suggesting either arson or carelessness instead.

Libya urges Rushdie boycott

sition parties yesterday announced agreement on a joint policy programme they would implement if their coalition wins parliamentary elec-tions due on June 25, AP reports from Rabat.

Seoul may resume N Korea talks over nuclear issues

By John Burton in Seoul

SOUTH KOREA said yesterday that it may soon resume talks with North Korea in an attempt to encourage it to remain a signatory of the nuclear Non-Proliferation Treaty (NPT).

The announcement followed the UN Security Council's adoption on Tuesday of a resolution urging North Korea to reconsider its decision to withdraw from the NPT and open its nuclear facilities to inspections by the International Atomic Energy Agency.

The resolution also included the implied threat of economic sanctions if Pyongyang blocks further nuclear inspections.

AN ARTIFICIAL eye capable of

recognising shapes and patterns in a way

which mimics human sight has been

Teams from Hitachi of Japan and Trin-

ity College, Dublin, have combined two of

the most advanced information processing

technologies - optical computing and neu-

ral networking - to create an optical device which can "learn" to recognisa

objects in a fashion far in advance of the

comparatively crude robot vision systems

available today. The Dublin eye can, for example, recognise and distinguish

between two patterns irrespective of their

developed by researchers in Dublin.

By Alan Cane

The resolution was approved by a vote of 13-0, with China, North Korea's most influential ally, and Pakistan abstain-

Seoul will co-ordinate its policy on North Korean talks with the US, which has indicated that it is willing to hold high-level discussions with Pyongyang on the nuclear

South Korea is proposing to grant concessions to North Korea if it returns to the NPT, including a reduction in the size of the annual US-South Korean military exercises and opening US military bases in

South Korea to inspections by the North. Seoul is also prepared to

offer aid to North Korea's struggling economy.

North Korea said during the UN dehate on Tuesday that the nuclear issue could be solved through negotiations with the US. North Korea believes that such talks could be the first step to diplomatic recognition by Washington.

· North Korea rejected the UN resolution, accusing the Security Council of interfering in its internal affairs.

The official news agency KCNA quoted a statement by a foreign ministry spokesman as saying the government considered the resolution "an interference in its internal affairs and a grave infringement on its sovereignty".

exiled spiritual leader, said yesterday he wanted to discuss with China a "one country, two systems" approach along the lines of Beijing's policy for Hong Kong and Taiwan.

don, the Nobel peace prize winner said Tibet was not part of China, which has governed it since invading in 1951. "Ultimately, the Tibetan people have the right to decide (their future)," he said.

However, Mr Deng Xiaoping, China's paramount leader, had said anything could be discussed except complete independence, the Dalai Lama added, apparently referring to

Mr Douglas Hurd, UK foreign secretary, told the Delai Lama yesterday he would raise the

Rehabilitation aid urged By Andrew Hill in Brussels

THE EUROPEAN Commission wants to earmark Eculbn (£790m) of central and national EC funds for rehabili-

ing. Some 60 per cent of the planned funding would come from existing EC resources,

including the Lome Convention of African, Caribbean and Pacific countries and the Community budget, and the rest would have to come directly

Rehabilitation aid is snpposed to prepare the way for economic recovery and political and social development after upbeavals such as civil war. But although the Commission has already launched rehabilitation schemes in areas such as Angola, Mozambique and Ethiopia, existing

still too fragile to support long-term aid programmes. Denmark, which holds the EC presidency, has been press-

ing for a Commission initiative, and development ministers from the 12 EC members will discuss the proposal at

structure and restore administrative institutions, and prepare the way for retraining, resettlement and job creation.

Distance Learning **MBA**

THE SUCCESS of the oew distance-learning MBA degree for financial specialists lauoched by a company set up by Man-chester Business School and the University of Wales at Baogor was reflected in the 300-plus

was reflected to the Sour-January, registrations to January. The company is the Institute for Financial Management and the MBA is awarded by the University of Wales. This unique degree course has been specially designed for people io all financial sectors such as accountancy, banking, insuraoce, boilding societies and administration.

The MBA course can be taken in an accelerated programme of 18 mooths by managers who already have professional qualifications. It is also available over 30 months to graduates and/or managers with relevant

There is also a oetwork of study support centres being set op around the world which enable students to take the degree in their own region and these are already established in the Middle and Far East and the Caribbean. More are planned for Australia, Africa, South America, Canada and Europe. * A corporate programme has oow been launched for finance sector companies who want to combine in-house development with a customised and highly

relevant degree. Further details from: Institute for Financial Management. University of Wales, Bangor LL57 2DG, Tel: 0248 382278, Fax: 0248 370769

position or movement.

Applications for the new technology could include automated assembly systems in factories, robots abie to tackle a wide range of services and self-steering vehicles. Among the work being carried out at Hitachi is the interpretation of human facial expressions, which could have important consequences for humanmachine interaction.

Researchers develop artificial eye

Current automatic vision systems use television cameras to scan an image or an object, the shape of which is analysed by special software. While impressive results have been obtained with such systems they are at best an approximation to true

The Dublin researchers realised that computers using light beams instead of electrons would have the necessary speed to analyse more complex shapes or objects in motion. The Dublin eye is one of the first devices which combine light based computing with a neural network, an attempt to create a brain-like system using microprocessor chips.

NEWS: THE AMERICAS

Bringing the patient to market Fears over inflation

T WAS meant to arrive in the first 100 days. Then it was delayed to the middle of this month. The latest word is that President Bill Clinton's health care reform plan will be sent to Capitol Hill in mid-June. But few Washington insiders would be surprised by further delay.

The plan is supposedly being held back to avoid a legislative logiam. The White House is reluctant to unveil the biggest upheaval in domestic policy since President Lyndon Johnson's "Great Society" of the 1960s while sceptical congressional committees are fully occupied analysing (and fre-quently amending) the fine print of the Clinton economic

But the delays also reflect the monumental complexity and political sensitivity of the challenge confronting Mrs Hillary Rodham Clinton and Mr lra Magaziner, the workaholic White House aide who has emerged as the true intellectual leader of her 500-strong task force. Tall and frizzy haired, Mr Magaziner looks and sounds like a madcap inventor. But for his personal friendship with the Clintons, he would still be an obscure Rhode Island management consultant.

instead he is playing the leading role in reshaping an industry that accounts for nearly 14 per cent of US gross domestic product and that touches the lives of every family and business in the nation, His historic task is not merely to produce an economically coherent reform but one that can survive an onslaught from dozens of powerful interest groups, including doctors and

the private insurance industry. By all accounts the going is heavy. The goals are clear enough: to reduce the growth of healthcare costs, which tbreaten to bankrupt both state and federal government, and to guarantee a basic package of benefits for all Americans, which means extending cover to the 35m people (15 per cent of the population) who lack health insur-

Hillary Rodham Clinton: battling with complexity and political sensitivity

final stages of the election campaign last year, Mr Clinton has professed support for a reform known as "managed

The idea is to enroll people (including the currently uninsured population) in regional intarmedlaries known as health insurance purchasing co-operatives. These would buy care on behalf of individuals and companies from competing networks of private sector physicians, hospitals and insur-

The theory is that their mar-But the means to these ends remain uncertain. Since the ket clout would enable them to rather than market discipline.

exert much greater downward pressure on costs, while maintaining quality, than is possible in today's fragmented health care market.

This still appears to be the general route favoured by the task force, although it is chary of the language of managed competition, which was invented by right-of-centre economists. Senior officials talk of "health alliances" rather than purchasing co-operatives and emphasise guaranteed access to care via new "health insurance" cards

They also claim the reforms would not restrict individuals' choice of doctors even though most systems of managed care. such as pre-paid Health Maintenance Organisations (HMOs), achieve cost savings partly by limiting patient choice.

But the managed competition framework (whatever It may be called) leaves a host of questions unanswered. How much flexibility will be left to individual states, some of which favour different types of reform? How will the cost, which could exceed \$100bn a

What will be included in the guaranteed package of minimum benefits? Will it embrace expensive new items such as mental bealth benefits and long-term community and nursing bome care? Mr Clinton will face a political storm if he includes abortion, yet if he excludes it many women's

access to it could be restricted. How much of the health care market will be subsumed in the new system? It seems certain to absorb Medicaid, the existing publicly funded regime for the poor. But there is controversy about Medicare, the system that covers 35m elderly Americans. The administration says nobody will be forced out of Medicare, yet it clearly wants to encourage a switch into managed competi-tion because the elderly account for a disproportionate fraction of health care spend-

And what about big compa nies? If they too stay outside the proposed health alliances, the new system might end up little different from the status

Equally controversial is the way that cash will be channelled from companies and individuals to the purchasing co-operatives. The task force is considering replacing current to a payroll tax on employers and amployees. This offers great administrative simplicity and a promising way of capping spending.

With a payroll tax, the money available to purchasing co-operatives for buying the minimum package of benefits could not grow faster than corporate incomes unless the tax rate were raised. However, a payroll tax would be vigorously opposed by Republicans and many conservative Democrats as a job-destroying step towards Canadian "socialised"

Mr Clinton's dilemma is that root-and-branch reforms offering the greatest savings are the least likely to win broad congressional support. Thus while the chances of reform being enacted next year are good, the fundamental problems may not be adequately addressed during Mr Clinton's first term.

Puerto Rico fears fall-out from Clinton tax plan

PUERTO RICO'S government has attacked tax changes proposed by US President Bill Clinton which it says will damage the island's economy.

The US administration has proposed that section 936 of the internal revenue code, which has led many companies to set up factories on the island, be changed as part of efforts to cut the federal deficit.

The administration of the US Caribhean possession, which had earlier appeared willing to consider Mr Clinton's proposals, began signalling a policy switch last week amid mounting fears of economic dislocation resulting from the changes, which could lead to

disinvestment and increased social and political problems. "Puerto Rico stands to lose 30,000 jobs if the Clinton proposal is implemented," said Mr Baltazar Corrada del Rio, the island's secretary of state. This means that unemploy-

increase to 21 per cent."

The Puerto Rican govern-

ment has begun seeking the support of Caribbean neighbours to argue in Washington against changes to the revenue code; it claims Mr Clinton's proposals will affect a programme under which Puerto Rico has pledged to lend Carib-bean countries about \$100m (£64.9m) a year.

Section 936 of the US tax code allows federal tax exemption to Puerto Rican subsidlaries of US companies. Profits from these subsidiaries are deposited in Puerto Rican banks. The deposits, which total about \$15bn, are central to the island's financial stabil-

US government officials say section 936 costs the Treasury \$2bn-\$3bn a year. Mr Clinton is proposing to change the tax break to a 60 per cent wage credit, in an attempt to raise \$7bn for the Treasury over five

will be more dependence on federal aid, such as food stamps, and more pressure for migration to the mainland. The Clinton proposal for Puerto Rico is the reverse of his policy for the rest of the US," Mr Cor-

rada del Rio said. Puerto Rico's neighbours will be quick to argue against the Clinton plan. Previous administrations on the island have committed \$100m a year of the section 936 deposits for low-interest loans for husiness projects in Caribbean Basin countries, Since 1985, neighbours have received \$650m in loans under the scheme.

Mr Brian Kuei Tung, Trinidad and Tobago's industry minister, agreed that the pro-posed changes would not only burt Puerto Rico's economy but limit the island's ability to finance regional development Trinidad and Tobago is a leading borrower of the funds, with \$210m disbursed and \$131m more pending approval.

California grabs insurance nettle

NE in every lour Cal fornian drivers does not have car insurance; in some inner-city areas the figure rises to four out of every five. 'The "average" Californian motor policy costs about \$1,000 (2649) a year, yet only half the premiums collected are paid

out in claims. For years the problems of the Californian car insurance industry have held the attention of politicians, lawyers, the industry and consumer groups. Now, bowever, an ingenious but surprisingly simple solution - called "pay-at-the-pump insurance - has become a seri-

ous political proposition. Legislation to introduce a pay-at-the-pump scheme is grinding through the state legislature in Sacramento after being introduced by Mr Art Torres, a Democrat senator from Los Angeles. It has the backing of Mr John Garamendi. California's politicallyamhitious insurance commis-

Even if the Torres legislation fails, the idea may be put to the Californian electorate more directly. Mr Andrew Tobias, a Harvard-educated economic commentator whose book "Auto Insnrance Alert" was the genesis for tha Torres initiative, has teamed up with a former associate of Mr Ralph Nader, the US consumer activist, to draft a proposal which could be presented to

miornian voters next "We're seeing whether we can put something together," says Mr Tobias. "We're taking it one step at a time, but the next few months could decide."

Pay-at-the-pump insurance is fairly straightforward. Under the amended Torres bill, for example, Californian drivers would pay an extra 28 cents for every gallon of petrol they buy. In return they would receive a one-off voucher which could be exchanged, via an insurance agent or company, for a basic

d cover the p

A novel scheme could solve the problem of non-payment of car insurance, writes Nikki Tait

This would provide the holder with medical coverage worth up to \$15,000. There would also be coverage for non-reimbursed lost wages of up to \$12,000 a year for a maximum two-year period. The effective annual cost of this policy for someone clocking up about 15,000 miles a year in a car with average petrol consumption would be in the \$200-

\$300 range. The coverage would be in the form of a "no-fault" policy - to the event of an accident the insurance would be triggered regardless of who was to blame

holder's losses rather than those of anyone injured by the policyholder. Drivers could top up their protection with additional private policies if they

The appeal of the Torres pro-posal is that a greater propor-tion of drivers in the nation's most populous state would fall into the insurance net. Lengthy legal hattles over damages resulting from car accidents - in addition to core medical costs - would also be

There are some problems,

however. A "pay-at-the-pump" scheme could penalise out-of-

policy and technology.

ers in the world economy have grown too interdependent - witness the administration's soul-searching on the question of renewing China's Most Favoured Nation trading status.

During the presidential campaign, Mr Clinton promised to make China's MFN status conditional on good behaviour on human rights and weap-ons transfers. As president, he has learned US aircraft makers, farmers and importers - as well as friends in Hong Kong - are dependent on good US-China business relations.

Mr Clinton is struggling to unearth a benign China strategy to honour his campaign pledge. On other fronts, there is no longer any hesitation. The administration is determined to

complete the Uruguay Round this year, if it can be done at all. The

tactics are mostly in the hands of Mr month, despite polls which show the pact in deep trouble with voters. It has taken up the Bush vision of a Kantor and Sir Leon Brittan, the EC commissioner in charge of trade. The two experienced negotiators have developed a good working relationhemispheric-wide free trade agreement. However, it also intends to ship, and showed in their recent strengthen ties with Asia through the Asia Pacific Economic Council. agreement over government procurement that both possess the agility to Among the 15 nations, efforts will be succeed where others have not. The question has become how much they made to create a regional trade and investment framework, to achieve minimum standards harmonisation So confident is the administration and forge common approaches to that even before a Uruguay Round

trade and investment. Key to the administration's relations with Congress will be Congressman Richard Gephardt, the House Majority leader, and a respected adviser in a pessimistic but thoughtful speech on Tuesday, Mr Gephardt warned of polarisation over Nafta

sary to its passage in Congress.

Angry, too, at the press and academics who "pigeonhole us as protectionists or worse," Mr Gephardt laid out a depressing vision of a changing world where the old economic rules for example the linkage between wage and productivity growth - no longer automatically produce high-wage economies. The prescription for the future is fiscal responsibility, retraining, rebuilding, research and develop-ment. Trade policy, while only part of the larger economic mosaic, is "the inescapable link to the world economy".

His view of the necessity to manage trade in a complex world is shared by the trade thinkers in the administra tion. This is true particularly with regard to Japan, where, according to one senior trade official, "we have been very Japanese about Japan, reading off the same script".

There are few, if any, defectors from the "Japan is Different" school, and the decision to apply pressure for quantifiable goals akin to the recent mi-conductor agreement awaits a definitive strategy.

Mr Prestowitz scorns the view that economic adviser Laura D'Andrea Tyson, who selectively advocates industrial policy, and treasury secretary Lloyd Bentsen, a supposed free trader, represent clashing poles in the administration. He recalls that Mr Bentsen was the author of the controversial Super 301 legislation which empowers the US administration to take unilateral action against coun-

Clinton trade policy makes noisy debut EC positive about Nafta agreement

By Lionei Barber in Brussels

THE EC has given a broadly positive response to the North American Free Trade Agreement, while reserving the right to take steps to redress potential unfair trading practices.

The European Commission resterday approved a study of the Nafta agreement between the US, Canada and Mexico.

The positive reaction was expected and matches the Commission's desire to avoid trade frictions with the US as it attempts to reach a successful conclusion of the Gatt Uruguay round by the end of the

The study also concludes that the EC's political relationship with Mexico will be affected by the free trade area. "As the Nafta draws Mexico more closely into the North American orbit, Mexico's rela-tionship with the EC may gain importance as a counterweight" mainly because of the likely dynamic impact on the Mexican economy and its popu-

The report identifies, however, a number of areas where it believes the Nafta agreement could lead to a loss of EC market share in the US and Can-

• Financial services and insurance: The principal problem is the possibility that Nafta privileges could be limNafta area.

"This would be a very important and unjustified discrimination against subsidiaries of companies' EC controlled subsidiaries in North America." • Rnles of origin: The EC raises concerns ahout rules applying to cars and textiles which are more restrictive than in Europe even if they are

• Services: The Commission warns that a failure to reach a Gatt agreement covering ser-vices could lead to substantial shifts of business to the disadvantage of the EC. This applies particularly to potential business in Mexico.

not actually contradictory to

• Farm products: The EC could suffer in sectors such as milk products, sugar and meat exports to the Mexican market. It is particularly worried about a clause raising Mexican harriers to the same level

as the US after a six year period. Despite these worries, the Commission says the net effect of the Nafta agreement is likely to be globally positive and ought to lead to a

big boost in trade with the EC. The report concludes that if trade relations are more restrictive after the signature of the Nafta agreement, it should tackle these questions ited to companies with majorwithin the Gatt framework.

Brussels wins car tax probe

THE governing council of the General Agreement on Tariffs and Trade yesterday agreed to set up an independent disputes panel to examine an EC allegation that US car taxes discriminate against European exports. The US said it would accept

the decision, which must be taken by consensus. The EC claims that European car manufacturers are paying a disproportionate share of the three taxes - two of which penalise high fuel consumption, while the third is

a luxury tax. Environmental groups are threatening to make the issue another casus belli in their relations with Gatt, which they claim puts free trade above legitimate environmental con-

Brussels says the total revenue of the three taxes levied in 1991 was \$558m, of which \$494m fell on European cars. European manufacturers paid 100 per cent of penalties under the corporate average fuel economy (Cafe) law, 80 per cent of the "gas-guzzier" tax, and 80 per cent of the huxury tax, against a market share of

just 4 per cent. The EC argues that Cafe payments in particular discriminate against European luxury car manufacturers since they are hased on the sales-

weighted sverage fuel consumption of all models produced. Thus US producers who make cars across a range of sizes, and Japanese producers who manufacture mostly small, fuel-efficient cars, do not incur penalties.

The Gatt council failed to reach consensus on a demand by five Latin American banana producers for a panel to examimport regime, which comes into force on July 1.

The producers, whose panel request under expedited procedures was supported hy other Latin American countries, the US and Australia, argue that the regime unfairly discriminates against them.

However, their request was blocked by the EC, with backing by several Caribbean and African banana producers who will get preferential treatment under the new regime. The Community said it was still willing to search for a settlement to the long-running dispute. The Gatt council agreed to return to the matter later.

Separately, the EC was crit-icised for failing to settle compensation for countries hurt by its oilseeds subsidy policies, which are not covered by last November's hilateral deal between the EC and the US. There was also renewed criticism of punitive US levies on

US 'drags heels' over Gatt rulings

By David Dodwell, World Trade Editor

THE US is putting in jeopardy the international trade dispute settlement system because of its "seriously deficient record" in complying with rulings against it, according to a US

The study examined 207 com-plaints put before dispute set-tlement panels of the General Agreement on Tariffs and Trade during its 42-year his-

tory from 1948 to 1969.

Professor Robert Hudec and colleagues at the University of Minnesota conclude that "no resolution of the current malaise in Gatt legal affairs will be possible without a change in the basic US legal policy some kind of reconciliation between the current US legal preoccupation with obtaining a fair deal, and the recognition of an obligation to use legal

means to secure one".

The study nevertheless concludes that the Gatt system of settling international trade disputes "has produced many impressive successes". Four out of five valid complaints were dealt with successfully, it

A high percentage of the Gatt panel failures dealt with disputes over anti-dumping actions, or countervailing

duties, the study finds. It suggests this could be due to the typical arhitrariness" of the criteria for finding dumping, and the legal rigidity of mea-

sures, once taken.
The US has ignored Gatt panel rulings on four of the 14 occasions it has been found to be violating international trade rules - all four in the past

Only Canada comes near, having ignored two out of nine rulings against it.

"Just as the US played a leading role in hullding the Gatt dispute settlement procedure to the control of the c dure to its present state of effectiveness, so the US has played the leading role in placing those accomplishments in jeopardy today," the study con-

It suggests US reluctance to accept Gatt rulings may be due to increasing use of Gatt to set-tle disputes, and the independence of its findings: "When a legal system starts pressing harder, the first to resist will be those who are accustome to having their own way." * "A Statistical Profile of Gatt

Dispute Settlement Cases, 1948-1989 by Hudec, Kennedy and Sgarbossa, in the Winter 1993 edition of the Minnesota Journal of Global Trade, University of Minnesota Law

Hooray! We now fly to L.A.

Five direct flights to the City of Angels every week. With no stops until you touch down in L.A.

It's part of our worldwide service to 165 destinations over 5 continents, making Manchester a world class airport.

And now the perfect sequel to Terminal 1, a monumental statement of

our commitment to growth, Tetminal 2 brings Manchester's capacity up to 18 million passengers a year. But that's not the end of the story.

On 17th May, we cut the ribbon on our £28 million direct Rail Link, with services to and from every major station in the North. Add to this, the fact we have Britain's most extensive domestic air network and it's easy to see why Manchester has become a runaway success.

Lamont makes last-ditch bid to salvage job

By Phillip Stephens. Political Editor, in Edinburgh

MR NORMAN Lamont last night made a last-ditch and probably futile hid to remain chancellor of the exchequer by offering a vigorous defence of his record along with an expression of regret for hardships inflicted on voters.

But as he issued what amounted to a public plea for prime ministerial clemency at the Scottish Conservative Conference in Edinhurgh, senior political associates of Mr John Major were insisting that the prime minister would move Mr Lamont in a summer reshuffle.

With some of the most senior figures in the Conservative party oow adamant that Mr Major must move quickly to reshape his team, one suggested that there was a small chance that Mr Lamont could be moved during the Whitsun parliamentary recess at the end of this month. The most likely dates, however, remain July or September.

At one point in his speech Mr Lamont appeared to acknowledge the gravity of the threat when he commented: My joh is unimportant - your jobs are what count. We have beaten inflation, let's go on and beat unemployment".

In a generally combative performance which brought only respectful applause from an audience which had earlier attacked the imposition in the hadget of VAT on fuel, Mr

heen no alternative to the harsh anti-inflation policies of the past two years.

Declaring that "the British recession is over", he said that he had never claimed credit for the resumption of economic growth. But he had laid the foundations for growth by getting inflation down to its lowest level for 25 years and interest rates to below the level of anywhere else in the EC.

Defending the tax increases in his March hudget he said that reducing the govsrnment's borrowing requirement was essential to ensure the recovery was sustained. He added: "I accept my responsibility for everything that has happened over the last two years. The government should be judged on its record, and I rather hope I shall be judged

on mine. Offering a lengthy compen dium of the decisions he had taken as chancellor, he claimed credit for helping to win last year's general election and for assisting Mr Major in securing the best treaty available for Britain in Maastricht. Calling for the Tory party to unite around Maastricht he warned "The European question has the potential to split our party in two.'

He concluded the government had to "keep our nerve when all our enemies want and expect us to lose it". That meant "sticking together when they want us to fall apart".

the patrician tendency who swear allegiance to Lady

Lamont insisted there had Prime minister discovers time is not on his side

THE GOVERNMENT has him. But, egged on by those in time on its side. Mr John Major does not. That thought should guide the prime minister's response to last week's electoral catastrophe. If it does not, his friends fear he will be in trouble.

The contradiction is more apparent than real. The government has at least three, and at a pinch nearly four, years before it must face the elector-ate. The catalogue of errors during the past 12 months has come conveniently early in the psrllament. The economic cycle is on the government's side. It is that perception which has informed the stance of those in his cabinet - let us call them the sanguine tendeocy – who have been urging Mr Major to sit tight. He can hrush off the Newhury and county council election defeats as early-term blues, the argu-ment runs. As long as he sticks to his agenda, economic recovery (and the mediocrity of the Labour opposition) will rescue

But the view from No 10 is decidely different. Mr Major is operating on a shorter time-scale. Before he can face the voters in another general election the prime minister must satisfy another electorate - the Conservative MPs at Westmin-ster - that he has a fair chance

of winning it. His party is shaken. The habit of government has left it out of touch with the real world. The scale of last week's defeat was beyond anything most Tory MPs had feared.

Mr Kenneth Clarke's frank assessment that the Conserva-tives are in a "dreadful hole" was not merely a reflection of his honesty. It was an inadver-tent admission of real shock at the depths of the electorate's disenchantment. His judgment is much closer

to the prevailing mood on the backbenches than that of his colleagues in the sanguine tendency. In a party where panic has replaced unity as the most powerful reflex there is little inclination to trust the future to the healing balm of time.

The lesson being drawn by his friends is that Mr Major has 12 months - until next year's European elections - to restore his authority. If his party's fortunes have not improved by then the prime minister will be under serious

The concern is reinforced by the corrosive influence of another Conservative tendency the militant opponents of the Maastricht treaty.

Operating, like their left-wing antecedents on the Labour benches known as Militant Tendency, a party-within-a-party; the 25 to 30 irreconcilable opponents of all things European have now set as their objective the destruction

The new Militant has no credible candidate to replace

Shake-up for export promotion

MR MICHAEL Heseltine, Industry Secretary, yesterday produced his expacted shake-up of his department's activities in promoting exports, currently costing the taxpayer £170m a year, writes Tony Jackson.

The main change is the separation of export promotion from trade policy within the Department of Trade and Industry. Responsibility for hilateral

trade would he bronght together in a separate new division, Mr Heseltine said. A new post has been created of Director General of Export Promotion. It will be filled by Mr Ray Mingay, at present the UK consul in Chicago. He will work with the Foreign Office and with up to 100 business-men being seconded from the private sector to help with export promotion. Some 28 xecutives heve been seconded to date.

In addition, export strate-gies are to be drawn up for the UK's top 80 export markets. At present the list extends only to the top 50.

Export promotion will also be split into two divisions, one covering Europe and Americas, the other the Asia Pacific region including the Middle Bast and Africa.

John Murray Brown and Andrew Jack trace the tangled web of Polly Peck Administrators seek Nadir's co-operation

Polly Peck yesterday called on Mr Asil Nadir to co-operate with their efforts to realise assets for creditors and shareholders to the group Mr Richard Stone, one of the joint administrators from

accountants Coopers & Lybrand, said: "Ws would hope that he would facilitate negoliations currently underway to ensure a good deal goes

"Before Mr Nadir can ever regáin his credibility be has got to give some pretty good explanations. We have been waiting three years for those," His comments came as nego tiations continued for the stal-led sales of Polly Peck's Cyprus

and Turkish assets. The plan is to concentrate their marketing efforts on Turks and Turkish Cypriots in the region and in the UK and the US. Discussions with the northern Cypriot finance minister were well advanced for permission to sell the husinesses before they were put on hold by Mr Nadir's decision to hreak

the UK. The book value of the local assets has been put at about \$40m. But disputes over ownership and control are likely to

his bail conditions and leave

Suspected fraudsters could face jail pending trial don't look more critically at these cases," he

COURTS should give greater consideration to holding defendants in serious fraud cases in custody before trial, following the flight of Mr Asil Nadir to northern Cyprus, Mr George Staple, director of the Serious Fraud Office, said. He was speaking at the presentation of the SFO's annual report - at which he announced that the convictioo rate of the Serious Fraud

Tyneside gets aid plan but no reprieve

By Alison Smith in London and the government doesn't have a Chris Tighe on Tyneside

THERE WERE angry clashes in the House of Commons yesterday as the government defended its decision not to award a vital contract to the last working shipyard on Tyneside - once the world's leading

shipbuilding centre. Mr Tim Sainsbury, industry minister, told the House of Commons that the government "deeply regretted" the effect of the decision oo the Swan Hunter yard and acknowledged it was likely to lead to "early job losses'

Mr Samsbury said: "We weren't ordering two helicopter carriers, we were ordering one, and one yard or other sadly had to be the loser."

Later be told MPs: "There is no point in trying to prop up a yard to build ships for which there are no orders. Let's look forward and try and build on the industries of the future and

not try and prop up the past."
Mr Robin Cook, opposition trade spokesman, warned: "It's not just Tynesids but ths nation who will have their eyes on this government to see if they can rise to the gravity "Are we to understand that

single proposal to try to keep open the last remaining ship building yard on Tyneside?"

Ministers announced on Tuesday that the order for the Royal Navy's new 20,000-ton belicopter carrier was being placed with VSEL, of Barrowin-Furness, Cumbria. The move left the Tyneside yard, which employs 2,200 people. just 18 months away from running out of work.

The government aid package announced yesterday included £2.5m industrial development, an "enhanced range" of employment services, and a new Enterprise Zone. Local MP Mr Stephen Byers,

replying to Mr Sainsbury, said: "The sense of despair and disappointment felt yesterday oo Tyneside, today will turn to anger and a sense of betrayal at the complacent statement we've had from you."

Beside the Tyne the survivors of a shipbuilding industry which 30 years ago employed 44,000 were trying to work normally, but the mood of deep pessimism was palpable. As tbey digested the news that Swans had lost the fight for the helicopter carrier, there was also bewilderment and anger the company was so dra-

Wallsend: silence from Swan Hunter management, believed to be in crisis talks with its bankers, has deepened the sense of doom

matically underbid - by more than £50m - by its rivals VSEL and Kvaerner Govan.

"It's like asking for s Ferrari and getting a Lada," said Mr Eddie Darke, leader of the union campaign to win ths order which management had described as crucial to the

company's snrvival. The unions, which have worked closely with management in recent years to keep the business afloat, called for an inquiry into the tender gap. Some on Tyneside speculated VSEL had subsidised its bid to wipe out a competitor. "VSEL

have bought the order from the government", said North Tyneside council executive director Mr John Foster. VSEL dismissed this suggestion as non-

Swans is the last remnant of a centuries-old industry in north east England which, at

many years produced two out of every five ships built in the world. The company's survival was a matter of morale, as well as jobs, for an area which has fought to upgrade its surviving

150,000 trained officers, a third of the total needed. The chamber told Lord Donaldson that ons way to improve the supply of skilled seafarers would be government help from Britain aud other EC states to offset the high cost to

companies of training officers.

Employers see rise in output

Wales, the West Midlands and the south-east of England are leading UK manufacturing industry's recovery from recession, according to the latest regional trends survey from economic consultancy Business Strategies and the Con-

Britain in brief federation of British Industry, The survey found that manufacturing output rose in seven of the UK's 11 regions in the four months to April while orders were higher in six of the regions. Orders rose sharply in Wales and the West Midlands with smaller increases elsewhere.

More women ioin unions

The number of women joining trade unions in Britain rose last vear as union membership fell to less than a third of the employed workforce, the latest statistics published in tha Employment Gazette show.

In 1992 net female unionisa tion rose by 20,000, taking female union membership up to 3.7m. By contrast male unionisation fell by 382,000 to 5.8m. There has been a fall of 3.7m in the number of trade unionist since 1979.

Information worth £1.75bn

The electronic information business in the UK is now worth more than £1.75bn a year and is growing, although more slowly than in the past. The third annual survey by the Confederation of Information Communication Industries, covering 1988 to 1991, shows that the value of the sector rose from £1.18bn to £1.75bn. Growth in 1991 was 6.4 per cent, the lowest annual rate of the period.

Job threat at **British Coal**

Up to two thirds of 6,000 core management and clerical jobs at British Coal could be lost under proposals put forward by a consultancy. Regional headquarters may be cut from five to two or three, and their

power reduced. The proposals, prepared by Resource Decision Systems and being circulated among senior corporation management, suggest more integration between the deep mine and opencast operations. British Coal ordered the report following its announcement last October to close 31 of its 50 pits. Although 12 have since been reprieved, few of them are thought to have a long future.

Wales takes dragon's share of UK inward investment

By Tony Jackson

MR DAVID HUNT, the Welsh secretary, was banging the drum this week about overseas investment in the principality. The immediate occasion was the 20th anniversary of the first arrival in Wales of a Japanese company. More striking was the fact that last year, foreign direct investment in Wales was higher than the year before.

This seems a remarkable exception to the general trend. Foreign investment in Europe reached its peak at the end of the 1980s. Since then it has

dropped sharply, both in the EC and in the UK overall. But in Wales, according to Mr Hunt's officials, the 1992 figure of £825m for planned investment by foreign companies was 13 per cent up on 1991 and more than twice the level of

With only 5 per cent of the population, Mr Hunt says, Wales has claimed 20 per cent of inward investment into the UK. Despite economic hammer blows in the 1980s inward investment has more than made up the difference. Last year, UK manufacturing output was 5 per cent higher than FOREIGN INVESTMENT IN WALES 476 402 825

in 1979. Welsh output, says Mr Hunt, was 27 per cent higher. In seeking to define Wales' success Mr Hunt points first to the quality of the workforce. "I think the work ethic is the most important factor. In

Wales, we've always had a tra-dition of working hard and of long service with one employer. If you talk to a German company such as Bosch, they will say their productivity in Wales is higher than it is in

Germany Other UK regions could make similar claims. A more revealing difference is the advantage the principality derives from the centralisation of government functions in the Welsh Office.

"Wa are the ultimate onestop shop," Mr Hunt says. "An inward investor just has to

leagues. He doesn't need to see anyone else. We bring everybody together, whether it's the Welsh Development Agency, the local authority, the Training and Enterprise Council or the university. And at the Welsh Office we have all the policies brought together education, bealth, environment, industry, agriculture, transport and training".

It is clear that Mr Hunt takes an aggressive approach to mar-keting. "I'm about to fly off at the end of the month to North America, where we have some very good prospects. They all involve competition with other parts of Europe, not the UK. I'm generally fighting Ireland in particular, because they go out positively to win manufac turing, and Spain. Belgium is getting very positive about investment too, and parts of France are going out more savagely to win business. "I believe we combine better

than any other country in Europe. Led by the Secretary of State and the chairman of the Welsh Development Agency, we go into board-rooms anywhere in the world and argue the case for Wales. There aren't many other parts of the world that do that."

FINANCIAL TIMES CONFERENCES

AEROSPACE AND COMMERCIAL AVIATION IN A RAPIDLY CHANGING WORLD

Paris, 8 & 9 June 1993

The Financial Times biennial conference, arranged to precede the Paris International Air Show, will focus on the prospects and challenges for the airline and aerospace manufacturing industries faced with increasing competition and the effects of economic recession. Where is the airline industry going? How can production be adapted? How can costs be cut?

These questions will be addressed by a distinguished panel of industry leaders including:

Mr Bernard Attali Air France Group

Mr Chatrachai Bunya-Ananta Thai Airways International Limited

Mr Robert Ayling **British Airways Plc**

Mr Vladimir Potapov Aeroflot/Russian International **Airlines**

Dr Klaus Nittinger Deutsche Lufthansa AG

Chase Investment Bank Ltd.

MANAGEMENT: MARKETING AND ADVERTISING

Design industry on show

he UK's Designers and Art famillarly known as D&AD - has acquired a sorry reputation for mismanagement in recent years. Still Britain's premier design trade body, it is

now trying to polish its image. D&AD's relatively new chair-man - Anthony Simonds-Gooding has been in place for just a year - and president - Aziz Cami, of the London design agency The Partners - are con-cerned that industry has forgotten the importance of design as a

core activity.
Cami's and Simonds-Gooding's efforts to raise D&AD's profile come together in an important London event next week.

Billed as "London's first festi-val to communicate to the business community and the general public the real value of creative excellence," D&AD will be hosting a variety of lectures and exhibits in a 20,000 sq ft marquee in Bedford Square. Touchs Ross is one of a number of sponsors, which between them have

chipped in £250,000. It will he "a festival for green shoots, aimed at clients and at catching their imagination, to convince them of the importance of design excellence in the husi-nesses, as well as a chance for ordinary consumers to see the way in which design is present throughout their lives," says

Simonds-Gooding.
Visitors will be able to sample selections of the best in advertising and design from around the world. Some exhibits will then go on a 12-city global tour to promote the export potential of British design.

For Cami the festival has a dual purpose: "For years Britain has been seen as a centre of excellence in design and adver-tising. To keep that position we must be more aware of the competition, to stop us resting on our laurels. And the design industry needs to articulate to business tha UK's bome-grown talent, which needs to be exploited more by industry."

Gary Mead Tickets and further details are available on 081 862 0202.

Baking soda, once a humble ingredient, has achieved new status. Nikki Tait and Karen Zagor report

Brushing up on tradition

raw up a list of quintes-sential "1990s" products, and baking soda toothpaste would almost certainly be a top pick. The very name evokes homy memories and "back-to-basic" values. Baking soda - the main ingredient of which is hlcarbonate of soda - has been a stalwart item in the traditional housewife's larder for decades. Its conventional uses range from helping cakes rise to keeping refrigerators odour-free. In image terms, no product could be further removed from Gucci bags, meals for the microwave and similar symbols of the 1980s-style

Purpose.

But baking soda did not arrive in toothpaste form until 1989. That was when Church & Dwight, a quoted Princeton-based company and the world's largest producer of sodium bicarbonate, launched a line of baking soda dentifrice across the US under its "Arm & Hammer" trademark. It was, says the company, a product extension. Americans bave used baking soda (mixed with water to form a paste) to clean their teeth for more than a century. Back in the 1920s, baking soda sven carried a "seal of acceptance" from the American Dental Association, the ultimate endorsement for dental products.

Over the past four years, the product category has exploded. According to Nielsen Marketing Research, sales of baking soda dentifrice and toothpowder products totalled almost \$100m (£65m) in the six months to mid-March, compared with \$637m for the toothpaste and tootbpowder market overall - a near-15 per cent share. While toothpaste sales generally advanced by just 6 per cent during this period, the baking soda segment soared by 65 per cent.

This heady expansion rate results

partly from the entry of large consumer products companies into the baking soda segment. The likes of Unilever's Chesebrough Pond's sub-sidiary and Colgate Palmolive quick ly decided that the product's inroads were too substantial to ignore, and launched "haking soda" versions of their traditional brands last year. Procter & Gamble, the overall dentifrice leader in the US, is currently in the throes of a nationwide launch of a baking soda version of

In the process, these consumer product juggernauts have partially eliminated the higher margins which the original baking soda toothpasts manufacturers were eager to extract. Today, most US supermarkets carry similar sizes of conventional and baking soda dentifrices at the same price. A 6.4-ounce tube of Crest sells for \$2.39, whether in baking soda or conventional form.

Arm & Hammer products, however, have clung on to their premium. In the face of competition from the likes of Procter & Gamble, the company has carefully stressed that its formulation uses more baking soda than its rivals - "anything from two to three times", says Davis Dickinson, marketing director. And despite the higher pricing, Arm & Hammer - nothing to do with the legendary oll tycoon Armand Hammer until he ended confusion hy buying a small stake in Church & Dwight in 1986 - still commands a 63.5 per cent share of the total baking soda dentifrice market, although its sales growth rate over the past six months of about 20 per cent has heen below that of haking soda toothpastes generally.

However wholesome the baking soda concept may sound, the irony is that these toothpastes have no proven advantage over traditional

sales gains are as much a triumph of clever marketing as inherent product advantage.

None of the baking soda products which have hit the supermarket shelves over the past four years has carried the American Dental Association "seal of acceptance", for example, although Arm & Hammer says that it has been talking to the Chicago-hased organisation since 1989. Disciples argue that haking soda acts as a mild abrasive on teeth, cuts down on plaque acid and generally deodorises the mouth. But the ADA has not been convinced: "We've not seen sufficient data to prove the effectiveness of haking soda in toothpaste," it says.

hile it is true that the Crest baking soda product will carry an ADA seal, this is primarily because of Crest's formulation, not because of the baking soda element. "We just got the ADA seal for effectiva cavity prevention. We had to submit separately to the ADA for Crest baking soda," say the promoters, "There's no proven therapeutic benefit to baking soda, but there is

So bow has baking soda toothpaste gained such an impressive hold in the market? From day one, Arm & Hammer has sold heavily on the boast that "two out of three den-

h Surrey and Sussex.

updated, survey. Anecdotally, it seems to he partially supported. Many US dentists and hygienists do recommend baking soda to their patients even though they know that its proven efficacy is limited.

"I don't know how effective the toothpaste is, but baking soda itself is one of the few things you can use at home to remove light stains, like tea stains, without hurting your teeth," says Michelle Freemark, a dantal hygienist. "Baking soda doesn't always work, but a lot of the other whitening products on the market are pretty abrasive and will hurt you. I have had some people who seem to think the toothpaste

The manufacturers are more than happy to support this impression. "The most important quality is that it makes the mouth feel clean - like you've just left the dentist's office," Some of the claims by the tooth-

paate makers nevertheless seem slightly far fetched. "Dentists recognise that when consumers enjoy the taste of a toothpaste they brush their teeth more - we see this as a flavour-option," says Procter &

Retorts Freemark: "In my opinion, if someone's a lousy brusher to start with, a better-tasting toothpaste probably won't make them

Vimto woos the home front

Philip Rawstorne on a soft drink's campaign to widen its appeal

ew brands achieve international status without first security. first securing a leading position in their national market. Vimto, a fruit drink made by Manchester-based JN Nichols,

Dwarfed by Coca-Cola & Schweppes Beverages and Britvic - the industry leaders – the Vimto brand has a mere 2 per cent of the UK market. With the hulk of sales still in northern England and Scotland, it is probably better known in Saud Arabia and the Sudan than it is

As this month's new television advertising campaign underlines, however, Nichols is intent on better exploiting at home the potential which has so long been realised abroad.

British troops sent to the outposts of the empire in the 1920s and 1930s were among the first distributors of Lancashire herbalist John Noel Nichols's concoction of hlackcurrant,

raspherry, grape and other fruit juices, and herbs. Since then a glass of Vimto and a handful of dates has become the traditional nightly sustenance during the Ramad fast in many Middle East countries - where the same family firms have acted as agents

since the early 1930s. Across Africa, from the Gambia and Ivory Coast in the west to Kenya and Uganda in the east, demand for Vimto is still growing. It has recently been launched in Egypt and revived in Mozambique; shipped into Canada and Guyana; and distributed in new markets in South Africa, Cyprus and

The brand remains a firm favourite in India and Pakistan. Vimto reaped the benefit of its early presence in overseas markets, such as the Middle East, began to increase in the 196 and 1970s. The company's UK bottling and canning plants could barely keep pace with export demand for the company's cordial and carbonate products. By 1980 when Nichols bought

Solent Canners - the company's

packager for the Middle East market – exports accounted for nearly 70 per cent of volume

sales. Nichols first turned its attention to the development of its home market after several overseas agents, which had long handled marketing and distribution, began to make the drink locally from concentrate shipped from the UK. As a result Nichols found itself with spare packaging capacity and, as managing director John Nichols, a grandson of the company's founder, puts it: "We had a brand that was international but still had a long way to go

nationally."
With an enlarged sales force, expansion proved relatively easy in the rest of northern England and Scotland. Moving the brand south has been more difficult. "Multiple grocers saw Vimto as a regional brand and have taken a lot of persuading to put it on their shelves throughout the

country," says Nichols. But persistence is paying off. The company has improved Vimto'a appeal as an alternative to the ubiquitous colas by redesigning its cans and cordial labels, which had been largely unchanged for decades. It has introduced diet and low-sugar versions of the drink and a

variety of pack sizes The company has also formed a distribution alliance with AG Barr, the independent producer of Tizer and Irn-Bru; and entered the vending machines market. National visibility has been raised by advertising on BSkyB and Channel 4, as well as on regional television. Sponsorship

and promotional campaigns have been widely used in the push to extend market boundaries. Over the past five years, Vimto has been one of the fastestgrowing soft drinks brands. Carbonate sales have risen at more than three times the growth rate of the market; and cordial sales have risen twice as fast.

Although Nichols admits the drink is a little too sweet for his taste, the company may soon have the national status to match its reputation abroad.

Concerns about the enormous responsibilities of Dr Richard Sykes, Glaxo's research and development director and recently appointed chief executive, were partly met yesterday when Dr Goran Ando was appointed R&D director of Glaxo group research, the UK research arm and the company's largest research arm. Analysts had believed that it

■ The new calm at ARTHUR SHAW, the Willenhall, West Midlands, building products group, was ruffled yesterday John Walmsley, the chief executive, had left the company. But his departure apparently

has nothing to do with the boardroom rows which had led to rebel shareholders demanding extraordinary general meetings, the movement of chairmen in and out, and High Court proceedings about who should be a director, Those proceedings were only settled last month.

The reason simply was that Walmsley prefers Sweden to equity.

Tony Reynolds, formerly md of Crawford Door (UK), has Sec. 10. 10. 125.5 been appointed md of ESCO CARPET TILES (UK), part of DLW AG.

Joseph Nellis has been appointed CRANFIELD School of Management's first professor of international management economics. ■ Paul Rew, formerly com-

pany secretary at Laura Ashley who joined LONDON INTERNATIONAL GROUP as group director of legal services in-January, has also been appointed company secretary was impossible for one man to Hartstone Group, the hosiery Holdings and Enterprise Comcope as chief executive and be and leather goods company responsible for R&D. Glazo last year spent nearly £600m on R&D - more than any other pharmaceutical company. It has research sites in the UK. US, Italy, France and Spain

and employs more than 6,800 R&D specialists. Dr Ando, who joined Glazo in 1989 as medical director, was made deputy R&D director in March last year. Ha was responsible for co-ordinating all development, medical and regulatory functions in the company's international pharmaceutical development programmes. He retains responsibility for world-wide drug

A 44-year-old Swede, Dr Ando was previously at Astra, the Swedish group, where he was president of the group research centre. Before that he held positions at Pfizer and Bristol-Myers.

Dr Sykes retains the chairmanship of Glaxo group research as well as responsibil-ity for R&D on the Glaxo

Willenhall. Finance director Lindsay Melvin explained that Walmsley married e Swede two years ago and bought a house in Sweden et the beginning of this year and, aged 54, is now retiring.

Consequently, Brian Phillips, a former managing director, and chairman since March, is assuming the role of chief executive as well and the company will be looking for another non-executive director.

Apart from Phillips and Melvin, the only other board member is Ian Tickler, who, with his family and friends, controls 49 per cent of the Arthur Shaw

on the retirement of Alan Mar-

■ Richard Coitino is appointed bearing division director of NSK BEARINGS EUROPE in euccession to Kanji Tamaru who is to return to Japan. At the same time, David Smith is promoted to human resources director.

Roger Daniels, company secretary of Pilkington, has been appointed group company secretary at HP BULMER HOLD INGS; his place at PILKING-TON is taken by David Bricknell, group legal adviser.

Blunt-talker at Hartstone

which has seen its share price tumble from 272p in March to a low of 86p last night, has appointed Shaun Dowling, a non-executive director, as deputy chairman.

The announcement comes just weeks before the company is expected to report its annual profits for the year to March 31. About two months ago, Hartstone warned of expected exceptional charges of £8.5m relating to the restructuring of its recently acquired Franch and Spanish hosiery compa-

Dowling, aged 59 and reported to be e blunt-talker, is a former director of Guinness and holds directorships at ML shareholders.

puter, among others. He is expected to give greater focus to the group's operational development, an area in which the recently acquisitive Hartstone has come under close scrutiny.

Dowling has been a non-executive director of Hartstone since September 1991.

The City welcomed the appointment although some analysts speculated that Dowling's post was the result of institutional pressure for changes following the sharp decline in the share

However, a company spokesman denied that the group had come under pressure from

Hillsdown's US accent

Bridget Macaskill, president and chief operating officer of US mutual fund manager Oppenheimer Management Corporation, is joining the board of Hillsdown, the poultry to upholstery group, as its third non-executive director.

Sir John Nott, who has recently taken over as executive chairman, says that "90 per cent of our ultimate customers are women, but that is not why she was selected." Rather, she emerged as the strongest candidate after a search by headhunters.

Macaskill, 44 and English, spent ten years with Unigate until 1982, latterly as marketing director for St Ivel, with responsibility for chilled products, liquid milk and fruit juice. She had made an early mark by suggesting to an imtially highly sceptical boss that Unigate should deliver orange tuice on the daily milk round. Not much later she was running the new fruit juice divi-

In 1982 she then moved with her husband, who works for Bankers Trust, to New York, and picked up a job as vice president of marketing for Oppenheimer, then part of Mercantile House. Moving onto the general management side, she had risen to chief operating officer by the time Oppenheimer bought itself out from the collapsed British & Commonwealth empire. Oppen-heimer Management Corporation currently manages \$22bn

Maceskill believes that her awareness, as a consumer, of American trends in the food business - salads, prepared foods - will justify her presence on the Hillsdown board. She adds that her experience of running a US business may also prove useful.

Sir John, who acknowledges that Hillsdown has been "light" on non-executives since he took on the role of executive chairman and Tony Brice, a former Hillsdown executive, retired at the agm, says that the group will probably be looking for another non-exec. "It has not finally been decided whether Sir Harry Solomon [the co-founder of Hillsdown who has recently stepped down from the chairmanship] will be seen as a true non-executive THE RESERVE OF THE PROPERTY OF

Registered Office in Turin Share Capital L. 5,465,485,226,000 Registered at the Court of Turin N. 131/17 Register of Companies

SHAREHOLDERS' ORDINARY AND EXTRAORDINARY GENERAL MEETING **HELD ON 26 APRIL 1993**

The first calling of the Company's ordinary end extraordinary ganeral meeting of shareholders was held in Turin on 26 April, 1993, under the chairmanship of Dott. Emesto Pascale.

tn the ordinary part, tha meeting approved the report of tha Board of Directors as well as the social report af 31/12/92 (certificate of the Arthur Andersen & Co. s.a.s. auditing company). The results of the profit and loss account were positive: after the depreciation destination of the material assets of L. 7,132 billion and the allocation of the tax requirements, there was a tettover net earning of L. 460.6 billion. The net earnings have been assigned - after the deduction of the dividend, in the following measure:

- for ordinary shares 7.5 % on the nominal value of L 1,000, i.e. L 75 per share
- for savinge shares 9.5 % on the nominal value of L 1,000, i.e. L 95 per share

The teftover L 1.1 billion have been assigned to the reinvestment fund for Southern Italy.

The Meeting also appointed Francesco Sircana and Enrico Venturoli as Directors substituting Febio Cammareno and Roberto Giunta, who have resigned from the post.

In the extraordinary part, tha meeting resolved tha following:

- to increase the company's capital, by 31 December 1993, by a maximum amount of L 736,129,693,000 by issuing tha necessary ordinary shares for the nominal value of L 1,000 per share to offer to the Shareholders as stock options according to the exchange mechanism of 13 new shares for every 100 ordinary shares and/or savings shares hald, for the amount of L 1,200 per share, of which L 200 is a surcharge.
- to modify articla n. 5 of the Articles of Association.

The Meeting gave the President the authorization to fix the time and the way in which the company's capital would be increased, as well as to fix the starting date from which the new shares are dividend payable and the measure of the eventual

The company obtained legal authorization from the Treasury Ministry and approval of the resolutions from the Court of Turin. The increase of the company's capital will take place after the publication of the relative intormative statement edited according to legat and CONSOB instructions.

The Board of Directors, gathered euccessively on the same day, appointed Ernesto Pascale ea President of the Company; Mauro Antonetti and Vito Scalia as Vica Presidents; Vito Gamberala and Antonio Zappi as Managing Directors; Francesco Righetti as the Secretary to the Board of Directors.

DIVIDEND PAYMENT FOR THE 1992 FISCAL YEAR

In pursuance of the meeting's resolutions, the dividend of the 1992 fiscal year, for the gross amount previously indicated before the deduction of the legal withholdings, is in payment starting 17 May 1993 at the Company's cash desks in Turin (Via Sen Dalmazzon, 15) and in Rome (Vie Flaminia n. 189), et the authorized offices listed in the notice of meeting, as well as at Monte Titoli Sp.A. for the self-administered shares, Payment will take place, both for ordinary and savings shares, after the deposit of coupon n. 5.

NOTICE TO "SIP 1991-1994" WARRANT HOLDERS

Notice is hereby given to "SIP 1991-1994" warrant holders that from 18 May 1993 the afora-mentioned warrant exercise petitions, temporarily suspended from 22 March 1993 according to the leat paragraph of the reletive regulations of articla n. 2,

This notice is to be published according to what is provided for in the CONSOB resolution n. 5553 dated 14 November 1991.

FINANCIAL TIMES CONFERENCES

INTERNATIONAL TAX IN THE EEC AND THE US

London, 14 & 15 June 1993

The Financial Times second international tax conference will focus on the crucial tax issues in the European Community, including direct and indirect tax harmonisation issues and VAT. US tax proposals affecting international business and future US transfer pricing methods will be addressed as well as the impact of the most recent tax treaty developments.

The distinguished speakers who will discuss these and other important issues include:

Mrs Christiane Scrivener Commission of the European Communities

Mr Thierry Stoll Commission of the European Communities

Mr Serge Foucher Sony European Operations

Mr Jacques Sasseville OECD

Mr Leonard J H Beighton CB **Board of Inland Revenue**

Mr Charles Triplett Former Special Assistant to the Chief Counsel, US Internal Revenue Service Mrs Valerie Strachan CB **HM Customs and Excise**

Mr James R Mogle Former International Tax Counsel **US Department of Treasury**

The Rt Hon The Lord Slynn of Hadley Lord of Appeal in Ordinary

Mr Peter Wilmott Commission of the European Communities

Mr Jacques Overgaauw Ministry of Finance The Netherlands

Mr Gert Sass Loyens & Volkmaars

BEYOND 2000 - A video and publications package to give you tomorrow's information today

With BEYOND 2000 The Financial Times gives decisinn makers and enriphrate planners an unprecedented view of the future for their businesses, and the capacity to anticipate and manage change.

Interviews with the most powerful figures in the information technology industry and with leading academics combine to produce a unique intelligence report. The package is made up of an authoritative documentary programme and two further videos of full-length interviews, an illustrated text, interview transcripts and a Financial Times industry analysis. It is designed for accessibility and ease of reference by busy people. BEYOND 2000 provides a

comprehensive vision of the lT industry and its impact on every business as we approach and reach the new millenium. It blends the insight of the futurologist with the profitdriven pragmatism of global business leaders.

their support towards the making of this programme, produced by Financial Times Television and The Bolt Partnership.

Caught in the Internet

Electronic message systems that span the globe could be as useful as the telephone, says **Geof Wheelwright**

nternational electronic mail systems are no longer the play-thing of hackers and bug-eyed are emerging as credible husiness tools that enable individuals and companies to communicate cheaply and efficiently around the globe.

Like the in-house electronic mail networks that have become a fact of husiness life in many companies, these systems provide a means of sending and receiving messages via persocal computers or computer terminals. With global electronic msil services, however, messages can be sent across the world or across town.

For evidence of the rising popularity of electronic mail, a look at the business cards collected from clients or contacts lately should be enough. The chances are that some of them include electronic mail addresses", along with telephone

and facsimile numbers. The advantages of electronic mail are numerous. It can eliminate hours of frustrating "telephone tag" and enable people to communicate across timezones with ease. It also sidesteps busy fscsimile machines that spew out piles of paper which are often misplaced or misdirected. With electronic mail, the message appears directly upon the computer screen on the desk of the individual

being cootacted. The higgest roadhlock to the success of electronic mail in the past has been the lack of a "critical mass" of users. Although dozens of personal computer electronic mail services are available, until recently they were not linked. This meant that to reach somebody it was necessary to subscribe to the same elec-

tronic messaging system. Over the past couple of years, however, many electronic mail systems have started "talking" to one another. The mechanism for this is "Internet" - a low-cost and efficient link between electronic mail services worldwide. The Internet links an estimated 1.5m computers over 10,000 networks in 50 coun-

tries, serving about 6m users. Internet enthusiast Brendan P Kehoe - whose popular guide to using the Internet, "Zeo and the Art

"must-read" for all new users describes the Internet as a large "network of networks". He points out that there is no single network. Regional networks like SuraNet. PrepNet and NearNet are all interconnected or inter-networked together," he says. "And all this

activity takes place in real-time." The Internet resembles a computer network co-operative. There is no central authority that oversees it and rules are largely informal. Its roots lie in a US Defence Department project bagun in the early 1970s to enable US universities, national laboratories and government agencies to share information.

Over the past 20 years It has mushroomed to include regional, corporate and public networks, Including commercial electronic mail systems. "People conduct their love life over the Internet, their hobbies and their Interests. They argue politics and engage in all kinds of business," says Mitch Kapor, co-founder of the Electronic Frontier Foundation in Cambridge, Massachusetts, which promotes awareness of the oo-line world.

"Internet is doubling annually in

of the Internet" (Prentice-Hall), is a traffic," says Vinton Cerf, president of the Internet Society, a volunteer secretariat that belps administer the network. "It is growing faster than any other telecommunications aystems ever built, including the telephone network." Commercial users now outnumber academic and government Internet users and by 1998, Cerf predicts, the system will serve over 100m users.

Despite the anarchic nature of its structure, the basics of using internet communications are simple. All that is needed is a computer modem, a communications software package and a subscription to an on-line information service linked to the Internet. Public access to the Internet is provided by popular services such as Compuserve, MCI

mail and Applelink.

Subscription costs range from about \$9 (£5.80) to \$20 per month. depending upon the service and varying according to the information services offered. Once a subscription to one of these services is ohtained, the charge for sending an electronic messages is generally only a few pennies, depending upon the message length and the time it takes to transmit. In most places a

you to the system.

A subscription to Compuserve, one of the most widely used on-line information services, costs \$8.95 per month. Compuserve users simply dial a local access number with the modem, log on and type GO MAIL to enter the message system. The charge for reading or sending Inter-

address. A typical Internet address might ha: jsmith@cix.compu-link.co.uk. The elements of the address are not particularly cryptic - the name of the reciplent is J Smith and he is a subscriber at (or @) CIX, the full name of which is Compulink. The last two designations show that Compulink is a company, rather than an educa-tional establishment or government agency, that resides in the UK. One drawback is that it is not

7.5KBytes (about 900 words) and 5

cents per additional 2.5KBytes (about 300 words) after that.

The key to sending an Internet

message lies in the Internet

always easy to find Internet addresses. Although some systems offer international directories of their electronic mail users, there is no central directory. Critics say the Internet, originally designed for use in scientific and education applications, does not have security and ease-of-use features that commercial users want. At peak business hours, promptness of service on the

Internet can also be a problem.

Despite its limitations, the Internet is an inexpensive way of sending and receiving electronic messages. Doing business without access to such electronic mail Louise Kehoe systems is soon likely to be as rare as the office without a telephone.

Hours are lost tinkering with the PC, argues Jonathan Constant Trap set for the office time waster

ar from making the modern office worker more productive, the personal computer has become a highly expensive time waster. Playing with onscreen graphics, tinkering with layouts and experimenting with fonts is an international obsession - and a costly one - according to new studies.

The average PC user wastes 5.1 hours avery week, reports SBT Accounting Systems, the US software house. Its survey revealed that 5hn hours may be lost in the US each year, based on the aver-aga white-collar wage this equates to \$100bn (£67bn), or 2 per cent of its GDP.

Placing so much power on the desktop can be counter-prodoctive. In the US, white-collar productivity increased by just 0.2 per cent a year during tha 1980s, despite having the world's high-est number of PCs per head.

In Japan, however, efficiency evels are matched by one of the lowest desktop investments in the developed world, according to Barry Graham of Xephon, a UK consultancy. Last year PCs accounted for 37 per cent of Japanese hardware expenditure, compared with 53 per cent in the UK and 47 per cent in Germany. "The reason is cultural. Managers in Japan and Germany often consider it beneath them to be seen at a screen," explained Graham.

On-screen time wasting now accounts for up to 25 per cent of a PC user's time, estimates Xephon, which concludes that however unfashionable, the mainframe may still be the most secure and cost-effective option. And yet many managers continue to download applications on to the desktop, unaware of the expenses that will be incurred. Before they do so, they must consider the consequences, advises ICL's corporate systems business manager Peter Slavid.

"PCs, Unix systems and mainframes all have an important role to play as part of the system. But where people go wrong is making radical changes in any direction just because the hardware looks

cheap," he says.

A survey by KPMG Management Consulting revealed that the

total price for owning a PC. including "hidden" costs, could be as high as £5,900 a year. Even by Xephon's more conservative estimate, networked PCs cost businessea between £10,300 and £15,500 for every end-user over five years. By comparison, the mainframe works ont at a mere £6,000 to £6,750 per user.

Managers are losing control, concludes KPMG. It has discovered that "over 90 per cent of total workstation ownership costs are not being actively managed".
This includes what KPMG terms
"local workstation gurus". These
peopla are to be found in every office, and are well-versed in PCs. Every time a less-experienced user has a problem, it is the "gurus" who are called npon to help, distracting them from their own work. "Unless management recognises and actively manages this resource, there is a grave danger that a significant degree of the organisation's resources will continue to run ont of coo-trol," warns KPMG.

Such findings are seen by Xepbon as proof that downsizing is not the cost-effective solution many businesses assume it to be. Computer suppliers such as ICL argue that cost is not the only issue. "All this proves is that you can't just dump PCs on people's desks and hope to get an efficient

system ont of It," says Slavid. "The objective is an effective system, and you need to avoid being seduced into restructuring by the availability of cheap power on the desktop. It's only cheap if people make good use of it."

Graham agrees, but insists that even if the cost issue is Ignored, mainframes still make more sense. By acting as a centralised point of control they can even offer a solution to the time-wasting temptation. "Mainframes eliminate the time taken to make back-np copies, for instance, because this is done antomatically, and they can also control access to data," he says.

"This can restrict the amount of time a clerk has the information, so they have no choice but to get the job done efficiently. If they exceed the time limit, questions

local telephone call will connect users, networks, computers and High-speed information

The Internet is the precursor of the high-speed superhighways" that President Bill Clinton hopes to see built in the US to enable businesses and individuals to transmit data at

speeds of up to a gigabyte per Although these highways are not yet in place, the Internet is providing a glimpse of what can be expected in the 21st century.

In recent congressional testimony, Vinton Cerf, president of the Internet Society, compared this emerging "Information infrastructure" with the transportation system: "The computer is the automobile of this emerging information infrastructure. Laptops are the

sports cars; desktops are the sedans; supercomputers are the Formula One racing engines; and gigantic mainframe data storage systems are the 18-wheelers. The local access networks of the Internet are the neighbourhood streets; high-capacity computer networks are the highways; switching systems form the

complex interchanges. "Just as vehicles on the road can be filled with an endless variety of people and products performing a multitude of services, software applications fill the empty computing vessels to create the new products and services of the information infrastructure. Cerf offered examples of how the Internet is already being used:

A professor at the University

of Southern Louisians offered to teach a class through electronic mail on the Internet; 15,000 people asked to join the class.

 When President Clinton and Vice-President Gore visited Silicon Valley to launch their technology policy, the audio and video - as well as the text - of their speeches were "multicast" on the Internet to hundreds of sites. Wellington, New Zealand, is using Internet to promote its

tourist industry.

• A blind studeot uses Internet to access libraries around the world that can provide on-line versions of Shakespeare's plays which can be converted to speech by his desktop computer.

Peter Gommers, General Manager Industrial Surfactants Europe:

"As a management consultant with a degree in chemical engineering, I took a close look at varInus chemical companies. So when it was my turn to join the ranks of those who manage - I had a pretty clear picture of what to expect. What I wanted was

to work with people who were the best in their field. What I didn't want was to waste years waiting to run my own shop. That's why I teamed up with Akzn. The market we're in is constantly on the move. To move with it, we have to travel light. And within the corporate guidelines, we've got all the freedom to do so. Akzo represents the best of twn wnrids - the flexibility of a incal entrepreneur, and the power of a global player. You need both to create the right chemistry."

Akzo is one of the world's leading companies in selected areas of chemicals, fibers, coatings, salt and health care products. Some 63,000 people, active in 50 countries around the world, make up the Akzo workforce. For more information, write or call: Akao nv. ACC/F4, P.O. Box 9300, 6800 SB Arnhem, the Netherlands. Telephone [31] 85 66 22 66.

CREATING THE RIGHT CHEMISTRY

Opera Reimann's 'Das Schloss'

at Coustail

Waste

Aribert Reimann's Kafka opera, Das Schloss (The Castle), could hardly have made a more auspicious start in life. Its premiere at the Berlin Festival last September has been quickly followed by two other productions, most recently in Berne. And yet the work cannot be described as "popular". It makes extreme demands on an audience's concentration and the resources of a provincial theatre. On that sis, the Berne ensemble can be proud of its achievement - even if its courage sometimes outweighed its mastery of Reimann'a music.

In Berlin, Das Schloss came across as a bleak, three-hour parable of xenophobia and bureaucracy, draped in music of elaborate invention. I found myself admiring it a lot less in Berne. Kafka'a novel about K - the figure who arrives in a wintry village with a commission to work as land-surveyor at the Castle - does not lend itself easily to the

K himself does not have any personality (in the novel his speech is all indirect): we simply see him reacting passively to the rebuffs and betrayals of a succession of colourful, heartless characters Nor is there much dramatic development: K's predicament at the end is the same as at the start. Reimann organises his material into nine "frames" capturing situations in the novel - but music and dialogue offer no more than different slants to the same picture

Eike Gramss' production, designed by Eberhard Matthies and Renate Schmitzer, placed the work somewhere between Theatre of the Absurd, black comedy and philosophical fable with a few Expressionist touches thrown in for good measure. The permanent set consisted of a hare white room, with mysterious side entrances and a backdrop opening up to reveal sky and snow. Distantly visible in the first and last scenes was the Castle itself, looking more like a motel than a Kafkaesone tower. Costumes were 20th century middle-European, between a shaven-headed Dutchman and the universal

Jan Frank Danckaert missed the air of weary puzzlement essential to the role (memorably created by Wolfgang Schöne in Berlin), but the supporting cast, led by Gottfried Driesch's farcical Mayor, Elisabeth Hornung's witch-like Landlady and Uwe Schönbeck's enigmatic Bürgel, offered a collection of richly contrasted character-portraits.

The orchestral performance under Andreas Delfs would have benefitted from greater textural clarity and more incisiva brass perorations - but the chamber-music sophistication of Reimann's instrumental writing (the opposite, as in so much of this opera, to Lear) was faithfully

Andrew Clark

Cinema/Nigel Andrews

Monsters, every which way

fter Honeymoon In Vegas, Indecent Proposal: and the evidence is mounting up. The only place Hollywood sees as more corrupt than itself is Las Vegas. There, blazed by lights and buzzed by belicopter shots, people who hazard their money end np losing their souls and/or spouses.

Our last trip to the Nevada sin-bin saw Nicolas Cage lose Sarah Jessica Parker to gangster James Caan. This time Woody Harrelson and Demi Moore are the couple in straitened circs and Robert Redford is the flashing teeth with the overflowing wallet. One million dollars he offers to Mr and Mrs Harrelson for a night with Demi. Afterwards the lovebirds can rehuild their recession-racked nest - he an architect, she an estate agent - and forget about one benighted fling with Mr Golden haired Mephistopheles.

Or can they? The first and far live-lier half of Indecent Proposal is directed by Adrian Lyne with the paparazzo relish he brought to Fatal Attraction. Lyne turns every close-up into a flashbulb snap of the exposed soul, as hero and heroine wander a casino where guilt-edged insecurity is the name of the game and where a magnifying camera turns even the roulette wheel's bumping silver ball into a boulder from hell. Also from hell, but the suaver section, is Mr Redford: slipstreamed into the story in a series of glancing-eyed reaction shots, a debonair Devil in a dinner iacket.

But as a movie story, Indecent Proposal has a built in flaw. It is over with the delivery of its moral punch-line. "Can money buy love?" Yes. End of story. But obliged to fill a two-hour running time, Lyne and screenwriter Amy Holden Jones pretend that the pay-off is merely a premise. They then stretch the plot for a further bour, turning one night's sex-for-hire into a flimsily overextended romance between fallen wife and Faustian billionaire.

The truly interesting question does the damage to a marriage linger even after the interloper has loved and left? - is squashed by the bomewrecker's continued presence a lustful Grandpa who schemes to seduce a young neighbour, a weakas romantic threat. A potentially many-sided moral conundrum becomes a bumdrum emotional tri-

The cast compounds the sense of bathos. Fatal Attraction had Glenn Close using the whip on an equally short-distance plot idea, hut who could begrudge the extra show-gallops from a mad Medusa with peroxide mane? Indecent Proposal has dull Woody Harrelson and three-faces

INDECENT PROPOSAL (15) Adrian Lyne

> LEOLO (18) Jean-Claude Lauzon

> > BRAINDEAD (18) Peter Jackson MISTRESS (15)

Barry Primus IN THE SOUP

Alexandre Rockwell WILD WEST (15) David Attwood

Demi Moore (winsome, more winsome, lachrymose). And though Redford spellbinds when proposing the hellish bargain - a golden boy turned tarnished angel - even he blands out under the obligation to canter endlessly round the same whimsical romantic course.

Jean-Claude Lauzon's rude, funny and anarchic Léolo is a portrait of the artist as a mad young fantasist. "People think I'm French-Canadian" narrates the title teenager (Maxime Collin), Lauzon's fanciful sketch of himself as a boy; "bnt because I dream, I'm not." No, in his dreams he is Sicilian. His mother conceived him from a crate of tomatoes (sic) which caught a stray peasant's flying seed.

Now Léolo lives in Montreal with

seduce a young neighbour, s weak ling older brother taking body-building lessons and a mother from whom Léolo conceals his own delinquent tendencies. These include masturbating into pieces of liver - clearly no part of the food-chain is safe from this family's reproductive habits and concocting schemes to murder grandpa. These include a noose-andpulley apparatus designed to drag the old boy out of his bathtub and hang him. (It fails to work.)

Writer-director Lauzon's artistic noose-and-pulley system is at work dragging Fellini, Pbilip Roth and several others out of their bathtubs. Where his last film Night Zoo was a dry-run film noir, inspiration in Léolo is a matter of violent, splashy raids. Here some raw sex from the Jewish-American bildungsroman tradition; bere some Amarcord-ish family caricature; and as coup de grâce or dis-grâce – a group cat-raping scene which may have entire audiences fainting clean away.

Creative energy and taboo-bashing, though, have a history of honourable fellowship in cinema. Léolo makes our mouths gape with the spectacle of the forbidden and then crams more dublous goodies into the defanceless jaws. The film's chief fault is its determination to find glamour and comedy in madness. (The family's visits to asylumpenned Grandpa become awaydays to Arcady.) Its virtue is its honesty about the myths of boyhood inno-

Not even Léolo, though, had a family life quite like that depicted in Braindead. Have you ever watched your loved ones turn into zombies, mutants and man eating multiple amputees - and then felt bound to add to the carnage? Such is the des-tiny of young Lionel (Timothy Balme) in this black comedy cum splatter epic from Naw Zealand's Peter Jackson of Bad Taste and Meet The Feebles.

One moment Lionel's mother is the life and soul of the local W.I. the next she is bitten by a rare monkey and comes apart at the seams. The boy's duty is plain. Glue back that cheek-flap. Staunch that fountaining abscess. And when Mum, plus most of the town, turn into deformed and slavering cannibals, wield everything from a horse hypodermic to a rotary mower to stop them running

Holding a handkerchief to your mouth, you ahould marvel at the special effects. The call-sheet of consumer durables on this production, claim the press notes, included pork fat, polyfoam, human hair, ultraslime (sic) and "hundreds of litres of maple syrup". It makes The Evil Dead look like Mrs Miniver. And it is horrendously funny. Once again the cinema looks squarely at the forbidden and proves that with enough jet-black comic propulsion, nervous laughter can launch itself into liberating hilarity.

Mistress, a comedy about moviemaking, gives us different monsters. Cailed film financiers, they batten onto innocent film-maker Marvin (Robert Wuhl), who is hoping to resuscitate a long-neglected script about a suicidal painter. Thanks to a producer friend (Martin Landau), Marvin's backers soon include a mad Jew (Eli Wallach), a sleaze merchant from Outer Sunset (Robert De Niro) and a big ego from Little Italy (Danny Aiello). And their girlfriends. These must all have leading parts. Hence this film's title.

But we have seen it all in The Player, and director Barry Primus, alas, is no Robert Altman. Mistress advances on stepping-stones of well-worn Tinseltown apercus to lower, ever more lacklustre things. The comedy needed more fizz, the malice more momentum.

These commodities are plentiful in Alexandre Rockwell's In The Soup. But this lissom lampoon will be seen only by three men and a dog at the National Film Theatre. Rockwell proposes a young Italian-American film-maker (Steve Buscemi) embroiled with an older producer (Seymour Cassel). Since Cassel's life is in bock to the Mafia, he furnishes wilder and more interesting material than the boy's script. But as the Mob

Robert Redford and Demi Moore in 'Indecent Proposal'

keep knocking on the door, when does stimulating source material turn into serious life-endangerment? Rockwell shows Olympic skill in jumping from mood to mood, from batty vignette (singing Italian landlords) to even battier vignette (TV quiz game called The Naked Truth in which contestants are quizzed au naturel). The film may get - cross fingers - a wider release later in the

Finally, Wild West; an example of that nohle British genre that we might call Ethnic Muddying. See My Beautiful Laundrette, Sammie And interracial.

Rosie Get Laid and company. Take a Yorkshire-born director (David Attwood), add an Anglo-Indian screenwriter (Harwant Bains), then stir in two Asian-British juvenile leads, Naveen Andrews and Sarita Choudhuri as star-crossed Southalldwellers aspiring to be Country singers. Result: a comical dish with a mixed, tangy, rebellious flavour that can be poured over the heads of racial purity theorists. Modestly made - neither the sound-recording nor the photography will win Oscars but funny, charming and laudably

Paris theatre takes on a mirror image of today's world

olstered by nearly a decade of ex-arts minister Jack Lang's lavish and liberal policies, Paris has in the last few years been making a bid to become Europe's theatre capital. Compared with London, subsidy is

a major element of its theatrical budget, either as direct grants to theatres and companies, indirectly through co-production with France's rich panolply of regional subsidised theatres and companies, or through the funding of an individual production, particularly if it concerns that rarity, a worthwhile new work. Even the Parisian commercial theatre received a direct FFr23m (£2.7m) from the state for 1993. But France's recent major government cast changes are likely to see a severe curtailment of such largesse, therefore placing in jeopardy the French capital's present high theatrical pro-

But for this season at least, Parisian theatregoers can continue to benefit from the legacy of les années Lang. Skimming the top off the crême de la crême of tha hundred or so plays that have opened in and around the capital during the past ten weeks, Peter Brook's name is inevitably written large. After deftly retailoring the Debussy/Maeterlinck opera into Impressions de Pelléas, Brook now brilliantly mutates the eminent neurologist Oliver Sack's book. The Man who thought his Wife was o Hat, into a singular theatrical

Premiered at the atmospheric old music hall, the Bouffes du Nord,

where Brook founded his Centre International de Créations Théatrales some 20 years ago, L'Homme qui is a series of Sack's medical case histories: genetic tics, involuntary reactions, waking dreams, false blindness, are acted out by four of Brook's most penetrating disciples, with amazing insight, sensitivity, simplicity and a disturb-

ing verity.
MC93-Bobigny, an important suburban cultural centre, rou present theatre season with a perceptive and immensely entertaining revival of Marcel Pagnol's Les Marchands de Gloire - which against a characteristically Pagnolian provencal backdrop strikes out against war and political corruption by amusingly bringing a dead bero back from the grave. This is to be followed by Sans titre, an untitled work by Federico Garcia Lorca, which uses the theatre of acting out lies to distract from the surrounding

Unbrittoned enjoyment has little place in this season's programme at the Colline, Paris' newest, most userfriendly and outspoken national theatre, which under the enlightened artistic direction of Jorge Lavelli admirably fulfils its mission as a stage for contemporary theatre. Currently. Terres Mortes, a French production of Bauern Sterben by German playwright Franz Xaver Kroetz, is spilling its 20th century entrails over the studio theatre. Now, it is a French production Stalin by the Chilean-born Gaston Salvatore, who writes in German and lives in Italy,

that is spelling out its potent social

Demain une Fenètre sur rue, in the Colline's main theatre, goes one step beyond the watching of war live on television, and imagines a family observing, through their window, a civil war bent on exterminating the poor. Not a spoof on CNN's recent exploits, the play was inspired by TV coverage of Biafra and written in 1968 by Jean-Claude Grumberg, one

from the inside, as artistic director of the palatial Chaillot national theatre. His penchant is to take a hallowed classic and turn it into a cir-cus act, reminiscent of those that be put together in the 1960s as founder of the Grand Magic Circus. The latest old master to be framed by Savary is Goldoni's The Boors. Translated into Les Rustres it becomes a hilarious romp. For classical purists it is a travesty, for the rest of us it is

Parisian theatregoers continue to benefit from the Jack Lang years, says Diane Hill, with new productions from Peter Brook, Jerome Savary and Luc Bondy

of France's most socially alert play-

Parisian theatre is playing to the full its role as a mirror image of today's world. However, a gimmick-ridden, much-heralded French production of Edward Bond's Jackets, distorted beyond recognition the English playwright's already poorly defined reflection on children as victims of society. In complete contrast, La Compagnie Des Hommes, Bond's pin-hole view of the world of big business, was beautifully crafted into a dazzlingly glossy production when, at the start of the season, it was world premiered, also at the

Jerome Savary continues to cock a snook at the establishment, now

a laugh-a-minute British panto with a strong Franco-Italian accent Les Rustres, chased from the Chaillot in the full flight of success by Savary's new production of The Taming of the Shrew, is now at the Mogador, dark since the premature closure of a disastrous French production of Kiss Me Kate. This was the latest in a long line-up of inter-national hit musicals to bite the dust once they touch French soil.

Sell-out success was virtually guaranteed for a revival of Jean Cocteau's Les Monstres Sacrés at the Bouffes Parisiens. Who could resist the chance to see Michèle Morgan and Jean Marais in harness together for the first time. Themselves monstres sacrés of the French cinema, no matter if the play, about two stage stars at their height, and written in 1937, is beginning to show its age - or that the octogenarian Marais is a shade too mature for the Revivals of Alfred de Musset's On

ne badine pas avec l'amour and Il ne faut jurer de rien, both directed by Jean-Pierre Vincent, are a disappointment. One has come to expect the unexpected from this remarkable eminently suitable successor to Patrice Chéreau as artistic director of the Amandiers, a vast theatre com-plex in the university suburb of Nanterre. Despite the beady presence in On ne badine pas... of Emmanuelle Béart, who gained International acclaim in the film Jean de Florette. the Musset duo merely glows with professionalism, but never burst into flames of great theatre.

That elusive tiogle factor is to be found in a new French adaptation of Ibsen'a John Gabriel Borkman. Directed by Luc Bondy, a name increasingly known in operatic circles, and starring Michel Piccoli, It is set against a series of magnificent, megalomaniac décors by Erich Wonder. The production comes to the Odéon-Théâtre de L'Europe from the Vidy Theatre, Lausanne.

A French revival of George Bernard Shaw's Pygmalion at the Arts Hebertot, is playing to full houses, thus taking tha wind out of the stormy reviews it received. The scene stealer is Sophie Marceau as Eliza Doolittle, whose irreproachable performance dispels for ever her

For some time, the Comedie Francaise has been resting on its laureis as France's most historic and presti-

image as a cinema nymphet of little

gious national theatre. A double bill of Molière's Les Précieuses Ridicules and L'Impromptu de Versailles, the latest revival to enter its current repertoire, continues to display the complacent mediocrity that has attracted forceful criticism from the ingly loyal, although when the curtain comes down a lot of them are caught napping.

A green shoot at the start of the season was a French revamp of Goldoni's La serva amorosa. Not a particularly memorable production, it nonetbeless bas just won for the Comédie Française a Molière for this season's best play in the subsidised sector(the Molières are France's most important theatre awards.)

Temps contre Temps - Ronald Harwood's Another Time - at the Bruyère, was voted best play in the commercial sector. Its success rests squarely on the seemingly frail shoulders of Laurent Terzieff, who directs and plays the lead.

In recent years, the dearth of new French plays has seen an avalanche of foreign imports, particularly from among New York hits. All too often their adaptation into French has a castrating effect, which strips them to their quintessential raunchy appeal One to survive with its dramatic genitalia almost intact is David Mamet's Speed the Plow, as Partenaires, at the Michodiere.

INTERNATIONAL

ATHENS

Concert Hall Tonight: Marek Janowski conducts Claus Helmut Drese's staging of Die Aegyptische Helena, with cast led by Anna Tomowa-Sintow. Sat and Sun: Camerata Orchestra plays symphonies by Mozart and Haydn. Mon: Sonia Theodoridou song recital. Tues: Alain Guingal conducts English Chamber Orchestra In works by David Matthews, Malcolm Arnold and Mozart, with clarinet soloist Thea King. May 25: Claudio Abbado conducts Berlin Philharmonic Orchestra (722 5511)

■ BARCELONA Palau de la Musica Sat: Giacomo Aragall sings opera arias with Orchestra of La Fenice, Venice, conducted by John Fisher, Mon: Michael Glelen conducts South West German Radio Orchestra, with piano soloist David Lively. Tues: Kazimierz Kord conducts Warsaw State Philharmonic Orchestra in Stravinsky's Symphony of Psalms. Wed: Gilibert Bezzina conducts Coral

Sant Jordi and Ensemble Baroque de Nice in Monteverdi (268 1000). Next production at Liceu: Jordi Savall conducts Gilbert Deflo's staging of Monteverdi's Orfeo, opening next Thurs (412 3532)

BERGAMO The Festival Planistico Internazionale

di Brescia a Bergamo focuses this ear on Brahms, Schubert, Tchaikovsky and Rakhmaninov. Vladimir Ashkenazy gives recitals tonight at Bergamo's Teatro Donizetti and tomorrow at Brescia's Teatro Grande. Andras Schiff gives a Schubert recital tomorrow at Bergamo, Hungarian National Philharmonic Orchestra under Adam Fischer gives concerts at Brescia on Mon and next Sat, and at Bergamo on Tues and next Fri, with solcists including Andrei Gavrilov, Silvia Marcovici and David Geringas. The festival runs till June 9 (Bergamo; tickets 249631/ information 240140. Brescla: tickets 59448/Information 293022)

■ BOLOGNA

Teatro Communale Tonight and Sat: Riccardo Chailly conducts Rossini's Petite Messe solennelle, with Danlela Dessi and Giuseppe Sabbatini. Tomorrow, Sun afternoon, next Tues: Chailly conducts Rigoletto, with Leo Nucci In title role, Marielia Devia and Sumi Jo alternating as Gilda, and Pietro Ballo and Vincenzo La Scola as the Duke

■ FLORENCE MAGGIO MUSICALE

Renata Scotto stars in Poulenc'a La voix humaine tomorrow, Sun and next Wed at Teatro della Pergola. Semyon Bychkov and the Orchestre de Paris present two programmes at Teatro Communale on Mon and Tues, including music by Ravel, Lutoslawski, Bizet and Stravinsky. Next stage production: Diaghilev ballat programme, opening next Fri (277 9236)

■ GENOA Teatro Carlo Felice Sun: first night of new production of Cavalleria Rusticana and La voix humaine, with alternating casts including Glovanna Casolia as Santuzza and Simone Alaimo as Alfio, and Sylvie Valayre and Renata Scotto in the Poulenc. Repeated May 19, 21, 23, 26, 28, 29, 30, June 1, 4 (589329)

■ LONDON THEATRE

 The Showman (Der Theatermacher): Alan Bates stars in British premiere of hilarious black comedy by Austrian playwright Thomas Bernhard (1931-89). In previews, Press night on Mon (Almeida 071-359 4404) Arcadia: Tom Stoppard's new

play directed by Trevor Nunn, with cast including Felicity Kendall. In repertory at Lyttelton with Alan Bleasdale's new cornedy On the Ledge (National 071-928 2252) June and the Paycock: Gate

Theatre Dublin's production of the Sean O'Casey play. Opens on Mon, till June 19 (Albery 071-867 1115) The Gift of the Gorgon: Judi Dench and Michael Pennington in

Peter Shaffer's new play about passionate love, professional achievement and estrangement between a volatile writer and his wife (Wyndham's 071-867 1116) The Importance of Being Earnest: Maggie Smith as Lady Bracknell in Oscar Wilde's most popular comedy (Aldwych 071-836 6404)

OPERA/DANCE Covent Garden Royal Ballet repertory consists of Swan Lake, Don Quixote and a triple bill (MacMillan, Bintley, Balanchine). Royal Opera has Otello tomorrow, next Tues and Fri with Vladimir Atlantov and Katia Ricciarelli, conducted by Edward Downes

(071-240 1066) Coliseum ENO repertory consists of David Alden's acclaimed new production of Ariodante conducted by Nicholas McGegan with Ann Murray and Amanda Roocroft, and a revival of II barblere di Siviglia with Della Jones. May 20: revival of Pountney production of Macbeth

(071-836 3161) Sadier's Wells Tues: Nederlands Dans Theater opens a week of performances with choreographies by Naharin, Kylian, Lightfoot and others (071-278 8916) CONCERTS

South Bank Centre Tonight: Neville

Marriner conducts ASMF in Ravel and Elgar, with piano soloist Cecils Ousset Tomorrow and Sat: Klaus Tennstedt conducts Mahler's Seventh Symphony. Tues: English Symphony Orchestra plays Delius, Bruch and Eigar, with cello soloist Steven Isserlis. Wed: Yakov Kreizberg conducts LPO in Tchalkovsky (071-928 8800) Barbican Tomorrow: James Galway is soloist with St Paul Chamber Orchestra. Sat: Markus Stenz conducts London Sinfonietta in Ligeti 70th birthday concert, with trumpet soloist Hakan Hardenberger Sun afternoon: Tatiana Nikolaeva plays Bach and Shostakovich. Sun evening: Michael Tilson Thomas conducts LSO in Sibelius and Mahler. Mor: Gundula Janowitz sings Strauss and Mozart. Wed: Mariss Jansons conducts St Petersburg Philharmonic Orchestra (071-638 8891)

■ MADRID

Auditorio Nacional de Musica Tomorrow, Sat, Sun; Zdenek Bilek conducts Spanish National Orchestra in works by Martinu and Dvorak, Tues: Joaquin Parra piano recital (337 0100). Next production at Testro La Zarzuela: La forza del destino, opening May 24 (429 8225)

MILAN

Teatro alla Scala Tomorrow: James Conlon conducts first night of Luca Ronconi's new production of Weber's Oberon, designed by Margherita Palli and Vera Marzot. with Robert Gambill, Elizabeth Connell and Ben Heppner (also May 15, 16, 19, 20, 23, 25, 27). Tues: Fedora, Next Wed at Teatro Lirico: first night of double bill pairing Nino Rota's ballet La Strada with modern Italian choreographies (7200 3744)

PRAGUE

PRAGUE SPRING FESTIVAL The performance of Ma Viast with which Libor Pesek and Royal Liverpool Philharmonic Orchestra

opened the festival last night is repeated this evening at Smetana Hall. Charles Mackerras conducts Don Giovanni tonight and Sat at Estates Theatre. Carl Davis conducts Paul McCartney's Liverpool Oratorio tomorrow at St Vitus Cathedral. Mark Kaplan is violin soloist with German Chamber Orchestra at Dvorak Hall on Sat. The programme on Mon includes a piano recital by Lazar Berman and a Prague Symphony Orchestra concert conducted by Martin Turnovsky. Tues has a 17th century song recital by Emma Kirkby and Anthony Rooley, a programme of Haydn and Beethoven songs with Wolfgang Holzmair and a Czech Radio Symphony Orchestra concert. Next Wed: plano recital by Leif Ove Andsnes. The festival runs till June 1 (530293)

■ ROME

Teatro Ofimpico Tonight: Pierre Boulez conducts Ensemble InterContemporain in works by Donatoni, Petrassi, Berlo and Stravinsky, with vocal soloists including Suzanne Mentzer and David Wilson-Johnson (323 4890)

TURIN

Teatro Regio Tonight: first night of Giselle, guest production by Ballet of Deutsche Oper, Berlin. staged by Peter Schaufuss. Daily till next Sun except Mon, Thurs and Fri. Mon: Daniela Dessi and Giuseppe Sabbatini sing opera arias (8815 241)

Architects of their own downfall

as Donald Trump and Michael Milken. Here was a man who bad not only amassed billions of dollars, but had done it the old-fashioned

Courtly in manner and unas-

suming in lifestyle, Mr Reich-

mann masterminded the growth of Olympia & York into the world's biggest property developer. Bankers and politicians lionised him and tenants flocked to O&Y's well-managed buildings. Business negotiations with the company were invariably taxing, but that only served to compound the impression that any Reicbmann deal must be a good one. The Relchmann reputation has taken a battering, bow-ever, since O&Y succumbed to its US\$11bn (£7bn) debt a year ago. During nine arduous months of debt-restructuring talks, creditors discovered one reason after another to change their minds about Paul Reicbmann and his two brothers and business partners, Albert and Ralph. They were furious last April when they found out that Mr Reichmann hed briefed the media on his restructuring proposals the weekend before he

desperate O&Y's plight had The creditors became angrier as the full story emerged of bow the vast Reichmann family business had been managed. O&Y bad always assured Its lenders that each of its buildings was a separate financial entity. But the creditors discovered, too late, that as the property downturn deepened. the Reichmanns had funnelled rents from profitable buildings in New York to their tottering empire in the UK and Canada.

presented them to the banks.

What is more, the data given

to the banks were out of date.

and failed to disclose just how

"The seeds of destruction lay in Paul Reichmann's unquenchable ambition." writes Peter Foster in his book on the rise and fall of Olympia & York. "[His] fatal flaws were excessive belief in his own

TOWERS OF DEBT By Peter Foster Hodder & Stoughton £19.99, 312 pages

powers, corporate acquisitiveness and a penchant for larger and larger gambles."

Those attributes were evident in Mr Reichmann's comment in 1983 on Canary Wharf, the London Docklands project which was meant to be O&Y's crowning glory but ended up dragging it down. "This is not a risky project." Mr Reich mann is quoted as saying. "Doing one building there would be risky. Doing a dozen is not." Such bravado, delivered in the Reichmanns' convincingly low-kay style, impressed lenders, journalists and politicians in the heady years when real estate values

were soaring.
The Reichmann brothers' success story began with the parcel of New York office buildings which they bought in the depths of the city's fiscal crisis in 1977, in the words of one developer, just "20 minntes before the real estate market turned around". The family's reputation was cemented by a bold decision to begin construction of the imposing World Financial Cantre in lower Manhattan as the property boom of the 1980s was lift-

But these achievements were only one side of the Reichmann story. Towers of Debt tracks the family's mistakes back to 1981 when O&Y moved away from tha business it knew best to take control of Abitibi-Price, then the world's biggest newsprint producer. Four years later the family bought a 60 per cent stake in Gulf Oil's Canadian subsidiary for C\$2.8bn, in the biggest corporate takeover in Canadian

The Reichmanns diversified several more times. Though bostile takeovers were not their style, O&Y precipitated a messy struggle in 1986 for control of Hiram Walker, the drinks and resources group. Mr Paul Reichmann again

showed poor judgment by backing the mercurial Canadian entrepreneur Mr Robert Campeau during Mr Campeau's over-ambitious take-

overs of two of the US's biggest department store groups. Mr Reichmann came to regret his backing of Mr Campeau even more than he did his involvement in the Canary Wharf

Foster, a Canadian business writer, covers all the main epi-sodes of the O&Y story. But his book lacks the immediacy and fresh detail which distinguish a riveting corporate history from a passable one. While criticising journalists for being blinded by the Reichmann aura, Foster relies heavily on newspaper reports to tell his story. There is scant evidence of original research, such as first-hand interviews, with the notabla exception of his accounts of the Gulf Canada and Hiram Walker takeovers (which are reproduced from one of his earlier books).

In his preface Foster takes

pride in having had two long interviews with Mr Paul Reich-mann in 1990. But his access to O&Y insiders seems to have been more limited in the crucial two years that followe In particular, Towers of Debt gives only a cursory - and mostly second or third hand account of O&Y's relations with the banks, arguably the most important players in the saga after the Reichmanns themselves. Foster notes in passing that two banks, Canadian Imperial Bank of Commerce (CIBC) and Bank of Montreal, received more data on O&Y than other lenders. A little more digging might have unearthed the annual ritual in which O&Y invited about 20 bankers to its offices to peek at an abridged version of its financial statements, which

away The book also fails to elucidate the full story of the tensions which erupted between O&Y and some of its biggest lenders (and among the lenders themselves) after CIBC refused to put up more money for

they were not allowed to take

Canary Wharf in early 1991. While Towers of Debt does a workmanlike job of telling the Relchmann story, readers with the time or inclination to pick up only one book on O&Y may wish to wait for one of the others oow in the pipeline.

ECONOMIC VIEWPOINT

Collective panic will not help

By Samuel Brittan

reasonably good growth of real income is not a sufficient, but a necessary, condition of reelection. Even this comes up against the fact that John Major was re-elected last year in spite of a % per cent fall in disposable incomes in the recession year of 1991.

he great British histo-

rian, Thomas Mac-eulay, knew "of no

spectacle so ridiculous as the British public in one of

its periodical fits of morality".

There is, however, one almost as ridiculous the Tories in one

of their fits of collective panic.

The near hysteria with which many MPs, ministers and, above all, the Tory media,

have reacted to the shock gov-

ernment by-election and local

election defeats in mid-parlia-

ment, were to be predicted. But

the phenomenon is all too

familiar. Unfortunately, my

memory goes back to the losses of Torrington and

Orpington to the Liberals

under Harold Macmillan, Such

results tell us nothing about

the result of the next election.

Forecasting the next election is as unreliable an activity as

forecasting the timing of eco-

nomic "green shoots". How far do economic factors

explain what has happened?

posed. Various indicators have

Not nearly as much as sup-

been tried to explain govern-

ment popularity. All have suc-

cumbed to Goodhart's Law: as

soon as a measure is used as a

The least unpromising is real personal disposable income

because it is comprehensive

taking in benefits as well as

pay, and allows for taxes and

inflation. It has proved remark-

ably steady in the medium

term. The average annual

increase has fluctuated at

about 21/2 to 3 per cent - from

which between a ¼ and ½ per

cent should be deducted to get

disposable income per capita. Straight-laced economists

have often regarded these

increases as too high, because

they have not left enough over

for investment and exports, Navertheless, when real per-

sonal income growth has been

much below these rates it has

tended to bounce back, while

moch higher increases have

The achievement of rela-

tively high rates of growth of

this variable has never been a

sufficient condition of govern-

ment re-election. The first Wil-

son government was defeated

in 1970 in spite of an above-

trend increase in its last full

year of office. The Heath gov-

eroment was defeated in 1974

in spite of an extraordinarily

high increase of 6.4 per cent in

its own last year, and an aver-

age of 5 per cent over its whole

term. Lord Callaghan was defeated in 1979 in spite of an

even more extraordinary growth rate of 7.7 per cent in

proved unsustainable

policy target, it lets us down.

A mechanical analysis might say that the present prime minister benefited from the achievement of the normal 21/2 per cent a year average real income growth over the 1987-92 parliament. But it is more realistic to suggest that he benefited both from distrust of Labour and the widespread feeling that there had already been a change of government when he took over from Lady ery to 2% per cent in dispos able income Thatcher. At any rate a recovincome growth in 1992 well ahead of general economic recovery - did not prevent the political losses of a week ago. There is one negative feature

of which one can be confident the futility of cliche populist reactions such as a cabinet reshuffle or replacing the chancellor. The problems remain the same; the officials analysing them remain the same. There is just Whitehall gossip about the new occupant, wbether he reads his briefs.

rewrites speeches and so on. The odds are that a new chancellor - after an initial period of tough-sounding reassurance of the financial markets - would be more tempted than Norman Lamont to make gestures in the direction of cheap money and plenty of it, and avoiding the fiscal changes required to eliminate the structural budget deficit. The present chancellor has everything to gain and nothing to lose from sticking to sound money policies. The time for a symbolic change at No 11 has gone.

None of this means that we should pass over in silence the handling of Britain's member-ship of, and departure from, the exchange rate mechanism which remains abysmal, Bernard Simon | One is tempted to say that a or an opponent of membership.

Rising income: no sure election recipe

Real personal disposable income

Incompetence hy one's own side is less forgivable than incompetence by the other. Nor is it made more tolerable if one shared as e bystander in some of the mistakes.

But simply putting a new face in the Treasury would

Putting a new face in the Treasury would achieve nothing. Better a full public inquiry

achieve less than nothing. What is needed is e public inquiry into the full chain of events, covering prime minister as well as chancellor, officials as well as ministers, Bank of England as well as Treasury. Any inquiry would have to o back at least to the choice of entry parity in 1990 without

properly consulting the German authorities; the failure to rethink the parity when a combination of events made it less appropriate; the ignoring of the warning signals given by the divergence indicator - when the government refused either to raise interest rates or to realign; the conduct of the notorious Bath finance ministers' meeting; the failure of communication with the Bundesbank in the days before Black Wednesday last Septem-

ber, and the official surprise at the extent of the run on sterling in a foreign exchange market with e daily turnover running into bundreds of billions. A model might be the Franks Committee investigation of the events leading up to the sel-zure of the Falklands in 1982. Although this had anodyne conclusions, the narrative was revealing and accepted by both opponents and supporters of

Maanwbile, the biggest obstacle to the improvement of UK economic policy is the fail-ure of free-market and sound

the Falklands war.

money Conservatives to understand the arguments for institutional reform and for more use of rules rather than government discretion. This was a cause central to Friedrich Hayek, who died just over a year ago and whom such leaders claim to revere. (The proceedings of a confer-

ence held to commemorate the first anniversary of Hayek's death will be published by Macmillan in spring 1994. S F Prowen [ed] Hayek: The Economist and Social Philosopher, A Critical Retrospective.)
At a recent lunch I heard the

go-go Naw Zealand finance minister Ruth Richardson take legitimate pride in a 1 per cent inflation rate - the lowest in the OECD, and which was at last being accompanied hy healthy growth. She did not fail to pay tribute to one of her Labour predecessors, Sir Roger Douglas, for establishing the independent Reserve Bank. ment possible.

A British cabinet minister

was present, one of the few with untarnished reputation. Instead of inquiring further how an independent central bank can fit into a British-type parliamentary democracy, he just asked why it was necessary if the government dis-

played enough will-power. How can one begin on the fallacies in this simple question? Who knows where this minister will be in a year or two, and whether his will is going to prevail or not? Heroic acts of will-power are an unreliable, and even undesirabla, basis for constitutional democ racy. All the great exponents of limited government, from John Locke to the founders of the US Constitution and onwards, have called for institntions which will do least damage when manned by people of common-or-garden ability and morality.

The point about an indepen dent central bank is not that its governors are better or cleverer or more heroic than parliamentarians, but that, given the right constitution or contract, they have every incentive to achieva stable prices. Parliamentarians rightly have a multiplicity of objectives and time horizons. The quality of Conservative thinking was better in the 1970s - when reacting to Labour in office - than today, when the leaders squabble about which of them are to

FINANCIAL TIMES CONFERENCES

MODERNISATION OF TELECOMMUNICATIONS IN CENTRAL AND EASTERN EUROPE

- WHAT HAPPENS NEXT? Berlin, 5 & 6 July 1993

The political upheavals in Central Europe and the former Soviet Union have opened up enormous opportunities for the telecommunications industry. The urgent need to modernise national telecommunications networks has created a huge demand for equipment and expertise.

The Financial Times conference will examine the steps that have already been taken towards modernisation and focus on the next stage of development. After the first wave of privatisations and cellular telecommunications licences, how will countries in Central and Eastern Europe go about improving infrastructure?

The distinguished panel of speakers includes:

Dr Wolfgang Bötsch Minister of Posts and Telecommunications, Germany

Mr Alajos Kauser Hungarian Telecommunications Company

Mr Martin Salamon Organisation for Economic Co-operation and Development

Dr Charles Jonscher Central Europe Trust Company Limited

Dr Jürgen Müller German Institute for Economic Research (DIW)

Mrs Christina Callmer Ericsson Radio Systems AB

Mr Vladimir Bulgak* Minister of Posts and Telecommunications of the Russian Federation

Mr Krsysztof Kilian Minister of Post and Telecomunications, Poland

Mr John D Foster AT&T SA/NV

Dr Ing Norbert Knoppik Deutsche Bundespost Telekom

Dr Edouard Wylleman European Band for Reconstruction and Development

Mr Jürgen D Lagleder Siemens AG

Nadir and a question of recognition

From Mehmet Arif Demirer. Sir. Your editorial comme "... the government of north-ern Cyprus should not think tbat welcoming him [Asil Nadirl with open arms is a cost-free decision. It is precisely such behaviour which will prevent it receiving the recognition it craves" ("Jumping bail". May 6), raises two questions. First, the Turkish Republic of Northern Cyprus (TRNC) was proclaimed nine years ago. Mr Nadir was a very important man in the UK then. Why did the UK not recognise TRNC, say, in 1985? Second, how many times did the TRNC receive fugitives from British justice with open arms to justify the British diplomatic non-recognition? One final comment. Your usage of the word "crave" instead of "axpect" or "demand" implies a touch of

unnecessary ngliness not becoming to the FT. Mehmet Arif Demirer, Dükres Sokak 8/3, D6680 Ankara, Turkey

Champions aim to unify export efforts

From Richard Needham MP. Sir, Your leader of April 26 ("Mr Heseltine's magic lan-tern") commented that "government selection of 'national champions', even in the limited context of bids for export contracts, is a tricky game". In fact, we are not going back to the bad old days of government picking winners. What we are doing is working with industry so that British companies are unified against foreign competition in export markets rather than squabbling among them-salves. These efforts will ba

tor by a senior figure. That is what I mean by a national champion.

There is enormous strength in British industry which we can exploit effectively overseas if we all work together. What we are about is backing win-

Mission statements that are too often short on reality

From Dr Steve Tibble.
Sir, Your article "Men with a mission" (Management, May 10) was a very timely and appropriate comment on the state of the mission statement in British corporate life. There are three fundamental

areas in which British compa-nies fail to give mission statements the value and credibility they need: ■ They are all too often written in "management speak"; this may suit individuals et board level, but the further down the line one goes, the less relevant it is. It also has

the effect, in most cases, of making a statement which is bland to the point of anonym-Tha acid test must be that the company is still capable of being readily identified even if one crossed its name off the mission statement: surpris-ingly few of them pass that

They are often sent out in a single form to all staff, and all staff are expected to relate to them in the same way (which, of course, is almost entirely

They are not set out in a way which means that employees can relate them to their everyday tasks and if they fail that test, it means that employ-ees will have great difficulty in relating to the mission statement at all.

Britisb management seems to have accepted the idea of the mission statement without necessarily being able to turn it into a reality; a mission statement is a beginning and Dr Steve Tibble senior consultant

Policies to lure capital back home

From Mr Wolfram Schrettl. Sir, Martin Wolf, in his most useful article, "How to encourage flight capital to go back home" (May 4), does not mention two important aspects of the issue.

First, most advocates of shock therapy" (for Russia as well as for other economies in transition) do not demand full legalisation of capital flows -that is, capital account con-vertibility. Rather, they recommend either that free two-way capital flows be completely excluded from liberalisation or that only capital inflows, not outflows, be "allowed", or that capital account liberalisation be postponed until the very end of the reform sequence.

These restrictions rather reduce capital inflows and, at the same time, contribute to the "crippling outflow", as Mr Wolf rightly notes. However, it should be acknowledged that not only "gradualists", but "shock therapists" as well, are to blame for this

Moreover, part of the capital flowing out of Russia is likely to be of a criminal origin (corruption). Therefore, even with the removal of standard reasons for capital flight (such as interest rate spreads, confiscatory taxation, etc), at least some of the flight is unlikely ever to return home, contrary to what Mr Wolf seems to assume. In order to generate a full reversal of the outflows, policies need to over-compensate for the generically irreversible part of capital

Lloyd's: relief for Names only way forward to a bright future

Sir, Anyone concerned with the future of Lloyd's and the contribution it can make to the financial well-being of the country, must welcome the new business plan for its real-istic appraisal of needs for the future besed on far greater frankness ebout the mistakes of the past ("The Lloyd's busi-ness plan", April 30). The tacit or explicit admis-

sion of those mistakes, bowever, highlights the need to

address the problem of those who are already victims of them. While losses still mount, precise figures are impossible, but it appears that the 500 or so Lime Street Names now face losses in excess of £1.196bn for the years 1988-91. This is effectively 1.8 per cent of the mem-bership carrying nearly 24 per

cent of the losses. It is perhaps inevitable thet, while the battle for survival rages, ettention is more closely concentrated on the conduct of

the fight than on care for the desperately wounded; nevertheless, it would be immoral for future prosperity to be built on lessons learned from the mistakes of the past without the consequences of those mis-

takes also being put right.
On practical, as well as moral, grounds, the issue can not be ducked either; it must become increasingly clear from each further revelation that the claims of much of the little gation are well founded and

Street losses (everaging £2.3m per Name) could not be met even if the Names were to abandon all claims. For every reason, therefore, Lloyd'a cannot expect to march forward to a bright future over the bodies of those cut down without giving them proper relief. Iain Mitchell,

G7's Russian roulette

A NEW US administration, Russian President Boris Yeltsin's referendum victory, and the messy disintegration of Yugoslavia, appear to have persuaded the G7 that last year's charade cannot be repeated: Rusaia's reformers need aid and they need it soon. But no western govern-ment can he under any illusion. The game is worth playing, but the risks are high

.The G7 feels brave enough at last to leap over the International Monetary Fund's orthodoxy and recognise that western aid is a precondition for Russian reform, not a reward. To demand tight budget discipline and low inflation before aid is released, as the IMF did last year, is to risk mass bankruptcy and social unrest. Such a strategy was more likely to impede, rather than speed, the process of privatisation and democratisation in Russia. In the event, it was never tried.

Handing over billions of dollars in budget support to a Russian government which, after 18 months of reform, still allows an inflation rate of 20 per cent a month, or more, is a gamble. Handing aid to a government thet has still not swung decisively behind stabilisation, over two weeks after a referendum endorsing the president and his policies, is bound to look foolhardy.

Yet if there is even a chance of promoting reform and enabling the government to establish financial discipline, the west must grasp it. For it cannot be denied that Russia is special by virtue of

its strategic importance. More-over, the risks of a collapse of reform are great, while the obstacles to economic change - the distorted state of industry and the lack of a technically sophisticated bureaucracy - will take time to

It is regrettable that the G7 has chosen to jeopardise the reputa-tions of both the IMF and tha World Bank in the process. Both are now bound to lend on terms much loosar than they would choose, primarily because G7 governments prefer to hide their expenditures behind an institutional smokescreen. A second Marshall Fund - run, but not funded by the IMF and the Bank - would have been preferable.

The G7 owes it to the international institutions, as well as to western taxpayers, to ensure that the minimum standards it sets will be rigidly enforced. Western budget support should be provided on a monthly basis. IMF officials must be stationed within the central bank to ensure that aid is halted if ceilings on credit creation are exceeded. The G7 should also encourage systemic change by biasing aid towards privatised companies, it should ensure that general budget subsidies are cut, while specific subsidies to atate enterprises are time-limited and tied to restructuring.

Last year's response to Russian pleas for help was torpid. But the G7's new activity is a gamble. The onus now shifts to the Russian government to show that it is, and

Local finance

"WE MUST build a new accountability fit for the 21st century - a new accountability that goes directly from those who run public services to those who use them." Admirable sentiments, expressed with characteristic clarity by Mr John Major in February. However, accountability for the provision of local services has become less direct in recent years, according to a report published

today by the Audit Commission. The commission says that the scope for councils to vary spend-ing on services in line with local preferences has been shrinking. used by the government to allocate grants to local authorities, prescribe what councils should spend to provide a standard level of service. But they are also used to control council spending. Local authorities which spend too much over their SSA are forced to cut

Using such assessments to allocate government grants inevitably leads to arguments over the needs of particular areas. It also creates anomalies, rating Cambridge as more deprived than Hartlepool, for example. Worse, using them to cap council expenditure undermines the accountability of local authorities to their electorates. Councils that provide poor quality services can hlama the government for setting SSAs which are too low for their area's needs and

for capping their spending. The view that these assessments are objective is strengthened hy

to spend up to SSA. Birmingham City Council, for example, has been pilloried for spending less than SSA on education. Increasingly it looks as if central government decides what councils spend, through the SSAs, rather than the locally elected council. The result is a confusion of accountability; neither central nor local govern-ment accepts, responsibility for decisions on particular services.

At the heart of the problem is the fall in the proportion of local govarnment income which is raised by local taxes. In 1989-90, more than half of local governincome came from taxes; this year they account for about 20 per cent. Councils which depend for 80 per cent of their income on government grants can only be weakly accountable to the local electorate. And as long as Whitehall provides the bulk of local anthority income, ministers will want to interfere in how town

halls spend it. Restoring local accountability requires an increase in the discretion which local government can exercise. That means providing local authorities with a stable tax base which can finance a much higher proportion of their spending. The simplest step towards this would be to return the business rate to local anthority control, with safeguards to limit increases which might damage competitiveness. Efficiency and effectiveness will be easier to achieve if local taxpayers know that their councils exercise real power over local services.

ministers who encourage councils High-cost TV

GOVERNMENTS tend to get misty-eyed when they contemplate high-technology projects. But those with misty eyes rarely have clear vision. Such has been the case with the European Community's programme to push high-definition television. Earlier this year, it looked as though tha programme was set for a merciful death. But, following a gasping attempt this week by EC ministers to resuscitate the project, it may linger on for a little longer. Europe's HDTV failure stems

from the government-backed "techno-imperialism" of compa-nies such as Philips and Thomson. The idea was that a home-grown standard would help Europe's industry outflank Japan's.

The snag was that the plan did not take account of the market. Broadcasters were reluctant to make programmes in the new standard and it was doubtful whether consumers would be prepared to buy expensive new TV sets. The irony is that Europe has been overtaken not by Japan but by the US, where development has been more market-driven.

The EC would do well to bury its project. Unfortunately, the Commission and most countries seem determined to press ahead with a slimmed down scheme to subsidise production of TV programmes. Even Britain, which has criticised the strategy, seems will-

ing to go along.
It is understandable that Britain is thinking of compromise, since other countries have moved substantially in its direction. Pro-

posed EC funding for the plan has been cut from Ecu850m to Ecu285m and may fall further.

If the HDTV initiative were an isolated case, there would ba something to be said for waiving it through in the interests of being communautaire. But it is not. Similar white elephants in the past include Jessi, which aimed to build a strong European semiconductor industry, and others could be in the pipeline. Only last month the Commission proposed spending Ecu13.1bn on research and development by 1998.

Subsidised R&D is not tha answer to Europe's weaknesses in high technology. Philips is ailing despita an excellent record in R&D. The problems are that European companies have often been had at turning research into money-spinners, and other sectors of the economy have been slow to absorb the benefits of technology.

It is not simply that such subsidies are a waste of taxpayers' money. Aid is also counter-productive because it is almost invariably channelled through big companies which have close links with government officials. This delays necessary adjustments in what are often industrial dinosaurs, while nimbler companies which may have a better chance of profitable innovation - are unfairly discriminated against. Europe's technology policy should concentrate not on pushing technologies against what the market demands but on facilitating tha dissemination of technology in vigorously competitive markets.

uring the recent House of Commons inquiry into the price Gerald Kaufman, national heritage committee chairman, complained that one interrupting witness appeared to be performing a duet with him.

Both the UK music industry and its critics have stuck doggedly to their tunes during the debate on CD prices, without being distracted by the singing of the other party. Many listeners, however, have come away with little more than a headache and no clear answer to the question: ara UK music companies cheating consumers?

Yesterday, the heritage committee published its report, condemning CD producers for charging too much and criticising retailers for failing to use their size to insist on price reductions. Sir Bryan Carsberg, director-general of fair trading, is expected within the next few days to announce whether he intends to recommend a Monopolies and Mergers Commission investiga-tion into the music industry. Music companies are resigned to an MMC

Both the committee and Sir Bryan stressed the importance of examining restrictions on parallel imports. The restrictions, contained in the Copyright, Designs and Patents Act of 1998, allow the holder of a copyright to prevent the import of his or her work. This means that while the company which holds a copyright can import CDs, it can prevent independent companies from doing so.

To many in the public gallery, the committee inquiry was an unimpressive affair. One observer, Mr John Preston, chairman of BMG Records (UK), who describes himself as a socialist, says that neither Labour nor Conservative committee memhers seemed to undarstand how a free market worked. They had difficulty accepting industry executives' assertions that production cost should not be the only determinant of CD prices and that companies could legitimately consider what consumers were pre-

pared to pay. For their part, several industry witnesses retreated into resentment when confronted with the all-party onslaught from Labour's Mr Kaufman and Conservative colleagues such as Mr Toby Jessel.

Music industry executives say they cannot understand why they have been the focus of such intense criticism, when the publishing industry is permitted to fix prices openly through the Net Book Agreement. They also point out that, unlike CDs, books are exempted from value-added tax. The publishing industry has argued that VAT on books would be a tax on learning. "Why is Barbara Cartland more such as Polymonth, bowever, that lower CD Gram, Thorn EMI, Sony and WEA/

The music industry is resigned to an inquiry into the cost of UK compact discs, writes Michael Skapinker

educational than Mozart?" one music industry official asks. Mr Preston adds that, unlike the far less successful British film industry, music companies have never asked for government money

or special tax treatment. For all the discomfort the attacks have caused the industry, none of the critics has, until now, been able to point to anti-competitive practices by the music companies. An earlier OFT inquiry by Sir Gordon Borrie, Sir Bryan's predecessor, concluded last year that were no grounds for an MMC inquiry because there was no evidence of any collusion between companies.

Sir Gordon said there appeared no good reason why CDs should be more expensive than cassettes when production costs were the same - a point stressed in yester-day's heritage committee report. But Sir Gordon added: "Producers and retailers have taken advantage of the willingness of consumers to pay a higher price for the perceived higher quality of a CD. In other words, the prices of CDs have set tled around a level which, on the whole, the market appears willing

prices in the US had persuaded him that the issue needed to be looked at again. Most worrying for the industry, he said he would look at a specific trading practice - restrictions on parallel imports.

The heritage committee conceded that relaxing unport restrictions could put the UK at a disadvantage to countries like the US which have tight controls. The UK would be open to US imports while the American market would remain closed. The committee recommended, however, that the Department of Trade and Industry re-examine current copyright legislation. A change to the copyright laws, permitting a flood of cheap imports, is what UK music companies fear most.

Mr Nic Garnett, director-general of the International Federation of tha Phonographic Industry, which represents music companies worldwide, says unrestricted cheap imports could damage the UK industry by depriving companies of the profits needed to invest in new, often risky, talent.

Mr Maurice Oberstein, chairman of the British Phonographic Industry, says the pricing debate has focused on the effect of cheaper CDs

Warner, The BPI has 150 members. however, many of them small, and lower profit margins could drive them out of business, he says. Leading companies such as Virgin Music started out as independent producers and it is the smaller UK labels which have traditionally found new talent. If profit margins become so small that independent companies can no longer operate, new acts will find it even harder to gain recogni-

Children Control

tion, he argues. Mr Garnett adds that a more liberal copyright regime could result in imports of pirate CDs. He agrees that legislation could be drafted to allow only lawfully produced CDs to be imported, but says this will prove difficult in practice. "What if the CDs are made in the Ukraine where there are no copyright laws at all?" he asks.

The Consumers' Association pointed out to the committee that imports could be permitted from countries which have signed intellectual property conventions and which enforce them properly. Mr Carnett argues that this

would not necessarily result in lower prices. Japan, which has no copyright controls, has some of the highest CD prices in tha world, while the US, with strict restric-

tions against parallel imports, is regarded as having the lowest.

In any event, be says, EC countries such as Denmark and Ireland have no bar to parallel imports, and the situation in France, Portugal and the Netherlands is unclear. There is no legal bar to UK companies importing CDs from these countries without the permission of the copyright holders.

Nevertheless, the British Phonographic Institute estimates, based on figures provided by Gallup, that only 0.3 per cent of UK CDs are currently imported by independent distributors - the companies that might be expected to undercut the prices of the biggest groups.

ut if parallel imports do not take place at the moment, even through they are legally possible that they would result in lower consumer prices, wby is the industry so strongly opposed to them?

Mr Garnett says a possible reason prices do not fall when restrictions are lifted is that independent importers fail to pass on the benefit of their lower costs and simply enjoy higher profit margins. This would damage the mainstream industry without resulting in a significant benefit to the consumer. He says he does not know why parallel imports do not occur at present possibly because even with cheap imports, selling CDs is not suffi-ciently profitable to make it attractive to independent distributors. The problem with changes in copy right law is that the outcome is difficult to predict. Mr Garnett says.

An MMC inquiry would provide an opportunity to examine copyright rules in greater detail. It appears, however, that critics of the music companies would be unwise to regard an increase in parallel ports as a panacea.

When pressed privately about why UK prices are higher than in the US, music industry executives say that British consumers are prepared to pay more than their American counterparts. The national heri-tage committee report argues that UK companies could substantially increase the size of the CD market if they charged less; in 1991, each American owner of a CD player bought 15 discs, compared with only 7.8 in the UK.

But the UK industry is not doing badly. Delivery of CDs to UK retailers grew 12.2 per cent last year to 70.5m units, despite the recession and the availability of cheaper cas-settes. In the first quarter of 1993, CD sales rose 32.4 per cent. Reams of paper will no doubt continue to pour from the offices of MPs and consumer groups. For all the irritation they cause, however, CD companies pay more attention to what

The ABCs of a sensible testing policy

simplify national curriculum testing Libbi next year. Has he paved the way to solving the immedi-PERSONAL ate dispute? Will the

VIEW maln classroom teacher unions suspend their boycott, and will they lose the sympathy or support of governors, heads and parents if they do not?

Commentators are right to suggest that Mr Patten would have been wise to have gone the last hundred yards and suspend this year's tests, or find a political euphemism for doing so by declaring them consultative. Realists may accept, however, that his room for political manoeuvre was very limited. In practice it is very unlikely this year's tests will proceed as Mr Patten would like. So he must decide whether to go on the attack over a short-term problem and risk extending it, or accept the inevita-

cation and training. Failure to do so will lead to harsh economic and social consequences. Mr Patten acted sensibly in com-

> missioning Sir Ron Dearing, the recently appointed chairman of the new School Curriculum and Assess ment Authority, to conduct an urgent review of the national curriculum and testing arrangements. Some will argue that Mr Patten has now pre-empted the ontcome by his Commons statement this week. Many more will appreciate that

> he has increased the likelihood of Sir Ron's success by early public acceptance that the pointless complexity of national testing can be simplified only if it is restricted to the core subjects. It was always a nonsense that seven-year-olds should be assessed in English, maths, science, technology, history, geography, music, art and physical

Teachers and parents should welcome the commitment that tests for 11-year-olds in the core subjects will A long-term solution must be ba mandatory only after a full

Britain's education secretary, John Pattern, has decided to the - to raise standards of UK education. review makes good sense too.

Everything turns on that review, and Sir Ron has made a good start. He has entered into immediate talks with teachers and the organisations which represent them. They, together with independent school bodies, have submitted their views

Everything turns on Sir Ron Dearing's review of the national curriculum, and he has made a good start

on a framework for progress. Sir Ron's decision to listen to teachers gets his review off on the right foot, but does not guarantee success. It does not reconcile one absurdity - that there is not merely one body that advises Mr Patten but three, all acting independently of one another.

The School Teachers' Review Body recommends on pay and con-

school performance. It is vital that Sir Ron seeks the assessments of the review body and Ofsted on the buman resource, management and quality implications of his review. It must explore three crucial issues. First, how much teaching time should be dedicated to the national curriculum irrespective of

the elements which are tested. Second, what should testing seek to achieve? For children and parents the principal purpose is obvious: to provide confident informa-tion about bow children are performing in comparison with their age group and in terms of their individual potential. It does not follow that testing every child is necessary or will even indicate

education is paying off.

Nor does it follow that such test results, published in league table form, could in reality inform parental choice among schools. The government's fixation with league tables ignores the lack of consumer interest in them, as opinion polls

whether the national investment in

ket where, in reality, the consumer has restricted choice. Parents may be far more interested in how individual schools are competing against their own past performance.

Third, the review needs to consider the fundamental tension in government philosophy between central regulation and local manager autonomy. Schools can now manage themselves however they like, provided that they do it Mr Patten's way. But school managers must be freed to manage, and not be hamstrung by Whitehall. Corporate direction which throttles should give way to local initiative which liberates.

THE LEX COLUMN

ICI's leap in the dark

The financial engineers who dreamed up the Zeneca rights issue as a way of paying off ICTs debt may be a little disappointed. Splitting a pharmaceuticals company with a fancy rating from dowdy ICI may have made financial sense when Hanson spotted the opportunity two years ago. Now the demer ger has cranked through the system, it looks like yesterday's idea - particu-larly since it also involves dumping a £1.3hn rights issue on the worst per forming FT-A sector in 1993. Sir Denys Henderson, ICI's chairman, has always argued for demerger on industrial, rather than financial, grounds. But the notion that nothing less than fission of the company is enough to change ICI's culture is a tacit admission of manage-

ment fallure. That severed management is oow faced with the same joh it had before - getting performance out of the parts of ICI. Greater focus may result in the ICI bulk side being rationalised more quickly. Petrochemicals operations such as ethylene may be sold to oil companies which seem increasingly likely to dominate the sector. iCI will can afford to slip. in the short term. shareholders will doubtless be attracted by the guaranteed yield. Further out, the case for the great experi-ment remains unproven.

emerged from recession.

have to specialise in those niche markets where it has a technological edge or market dominance - and hope that those niches do not become tombs. Zeneca may be freer to geoerate the hard marketing edge which characterises other drugs companies. But the financial resources of a combined strong balance sheet will be lost. That limits the flexibility of either company to develop into new capital intensive markets in future. The corollary of greater focus is that neither company

J. Sainsbury

in the real world of groceries, J. Sainshury maintained its serene progress last year, registering a 17 per ceo advance in annual profits. In the unreal world of finance, Sainshury's shares have fallen by a similar per-ceotage since the start of the year. making it the sixth worst performing FT-SE 100 stock. The company's derating owes much to the normal turn of the investment cycle. At this stage of the game, defensive food retailing stocks go out of fashion as investors chase recovery situations and overseas earners. Much the same happened in 1982 when the UK last

J Sainsbury

Share price relative to the FT-A All-Share Index

1973 76 78 90 82 84 86 88 90 92

The important question this time round, though, is whether something more than cyclical forces are at play. Does the aggressive growth of the dis-counters and the maturity of the superstore operators' development programmes presage an end to the sector's remarkable earnings gains? Although such concerns may be pressing hy the end of the decade, Sains-

hury's latest figures suggest a pessi-mistic conclusion would be premature. Respectable sales volume growth, continuing productivity gains and the addition of new space at an annual rate of around 8 per cent points to maintained earnings momentum for the next few years at least. The retail-er's best friend - inflation - may also return to lend a hand. The market may soon warm again to the sector's virtues of steady earnings increases and solid dividends, especially if the hroader recovery disappoints. By the second half of the decade, the hig food retailers' ratings may depend upon their success in diversifying. Sainsbury's efforts may then have to be on a far grander scale if it is to sustain a premium status.

Currencies

It is curious how little attention the currency markets paid yesterday to the jump in US producer prices. Per-haps one reason is that the dollar has already risen more than three pfennigs over the past week. Another is that the figures were distorted by higher tobacco prices. But the overriding factor is continuing uncertainty over the degree to which the recovery is accelerating again after the disapemployment data failed to provide conclusive evidence one way or another. Today's retail sales data may prove a better pointer. Reasonably strong figures would imply a boost for industrial production later in the

quarter as inventories are rehuilt. Until confidence in the recovery returns, though, the dollar's scope for appreciation will remain limited. which gives the Bundeshank more room for manoeuvre. That is just as well when German bond markets face heavy supply of public sector paper and Mr Theo Waigel's future as finance minister is uncertain. Yesterday's reduction in the Bundesbank's money market repurchase rate makes a cut in the official discount rate now a mere 35 hasis points below money market rates - more likely next week. Whatever happens in the Danish Maastricht referendum, the bank will at least be able to say it did Its hit for Europe.

Body Shop

At least Body Shop International is now fighting back. Whether the com-pany will succeed in re-establishing its hrand position in the UK is another matter. The problem is not only doubt over whether the fashion for environmentally friendly cosmetics is passe and over Body Shop's ability to attract older customers. It is also one of whether margins can be recaptured, given the competition from Boots and others. Body Shop will try very hard to convince consumers that Its products are of superior quality, but persuading them to pay premium prices could prove an uphill struggle in an age where customers appear more concerned with value than brand image.

Restricted to

A. ...

Without a solid hase in the UK, international expansion, which is seen as the main engine of growth, would be all the harder. Like for like sales growth of 6 per cent in overseas markets outside the US is encouraging. and US operating profits more than doubled after stripping out the cost of moving the head office to North Carolina. But competition in the US is growing. While Body Shop is not doomed to fail, it is not doomed to succeed either. Given that uncertainty, an historic multiple of nearly 28 looks stretched. Perhaps that is why Body Shop is touting the interest in its shares which has surfaced in the US. Its new ADR facility could prove a source of demand, although US investors are every hit as fickle as the Britpointing first quarter. Last week's ish buyers of pineapple facial wash.

British hijack Danish referendum

Hugh Carnegy and Hilary Barnes see the scourge of Maastricht in action

Denmark's Maastricht referendom contest yesterday to the hemusement - and some irritation – of the Danes.

British politicians, trailed by British camera crews and British reporters, traded insults and doled out advice to the Danes in the ante-chambers of the Folketing, the Danish parliament, all in English of course.

In one corner was Lord Tehhit, erstwhile Conservative cahinet minister, scourge of Maastricht and polltical street-fighter of repute. Lord Tehbit was invited to Copenhagen by the June Movement, fellow travellers cam-paigning for a repeat of the "No" verdict by Danish voters last

In the other, seeking to hlunt whatever impact Lord Tehbit might have, was the scholarly Mr Giles Radice, Labour MP and

gnest of the governing Social

Democratic party.

Lord Tehbit, Mr Radice warned at a press conference, was a "xenophobic meddler" with no genuine concern for Denmark. The referendum, he said earnestly, was "not something the British should interfere with at all" glossing over what he was

GPA may get funds from GE Capital

By Roland Rudd in London

GPA Group, the troubled aircraft leasing company, hopes to sign an agreement in principle to obtain an investment of more than \$300m from GE Capital. General Electric's financial ser-

GPA was last night in talks with GE Capital, and is expected to make an announcement today. Such a deal may involve GE Capital subscribing for new GPA shares and buying some of the group's prime assets in exchange for new finance. However, it was not clear whether the deal will prove acceptable to all of the group's lenders.

Some of the banks fear such an agreement could lead to GPA selling its most lucrative leases and assets in exchange for GE Capital taking a controlling

Irrespective of whether the talks are conclusive, GPA is unlikely to ask its bondholders for a debt moratorium, when it meets them today in New York. Instead, it plans to give them a financial update on the company. It hopes that a deal in principle

to persuade its banks to pay bondbolders. GPA has a temporary waiver of its banking covenants until May when more than \$50m of bonds mature. A further \$170m of bonds mature by the end of

with GE Capital may be enough

If a deal cannot be signed with GE Capital within a week, GPA will be forced to ask bondbolders for a moratorium on bond payments, since the banks will not allow them to be paid.

One of the group's biggest lenders said: "I fear that a moratorium with bondholders will inevitably led to examination [the Irish equivalent to administra-tion]. The only sure way to avoid it is to persuade a strategic investor to inject equity into the com-

However, two of its bankers said they would not support the deal if GE Capital takes the best assets in return for subscribing for new shares.

"I do not want GPA to end up as a liquidation trust unable to generate sufficient cash flow to pay off all its creditors," said one. The talks have been led by Mr Gary Wendt, chief executive of GE Capital and Mr Tony Ryan, GPA's chairman and founder.

Mr Wendt, a former non-execu-tive director of GPA, is understood to have assured Mr Ryan of his continued support as chairman if the deal goes through. Mr Ryan recently fought off an attempt by two of GPA's execu-

tives to have him replaced If the talks with GE Capital do not prove conclusive or fail to win the support of all its lenders then a debt-for-equity swap with the bondholders is seen as inevi-

Group uses rule 144A for private placement by Lehman Brothers

NESTLE, in a pioneering initiative likely to be followed by Nestlé looks to institutions promises other large European companies, is arranging for US institutional investors to participate in its imminent rights issue, writes Ian in SFr1bn US rights issue Rodger in Zurich.

Neetlé, the world's largest foods company, is invoking a 1990 US Securities and Exchange Commission rule which permits non-US registered companies to make offerings to "qualified institutional buyers".

Rule 144A has been used up to now to enable non-US registered companies to float new debt and equity issues in the US. Nestle is the first to use it for a rights

Nestlé believes that about 15 per cent of its shares are held by US investors, most of them insti-tutions. Until now, these investors have not been allowed to participate in the group's rights issues because of US legal restrictions on fundraising by non-USregistered companies.

This [the restriction] was not very fair and it depressed the market for the rights," Mr Reto Domeniconi, finance director. said at the group'e annual press conference yesterday.

Mr Helmut Maucher, the chairman, told the meeting that firstquarter group sales rose 6 per cent to SFr13.5bn (\$9.2bn). Only 1 per cent of the growth was vol-ume, with another 1 per cent from monetary effects and the rest from acquisitions. Mr Maucher was confident,

however, that the group would have "a decent profit and sales increase this year". In 1992, Nestle's net income was SFr2.7bn on sales of SFr54.5bn. Mr Domeniconi said the

Helmut Mancher, Nestlé chief executive, in Zurich yesterday said he expects profits to rise again this year short-term borrowing. The rights will be on a one-for-25 basis at a extension of the rights issue to US institutional shareholders will be done in the guise of a private price to be set after May 27.

down to about SFr2.3bn. Mr Domeniconi said the issue Nestlé is one of a few big European companies considering applying for a listing on the New York Stock Exchange. However Mr Domeniconi argued that meeting the exchange's disciosure requirements would require a "tremendous effort" but would not give sbareholders better

terday promised investors a sharply improved performance and forecast record 1994 earnings per share, yet was met with a substantial protest vote by dis-satisfied shareholders at the

annual meeting.

The meeting was held against a background of rising concern by some of Kodak's largest institutional investors over its lacklustre financial performance.

This anxiety was reinforced late last month when Kodak's share price fell sharply after Mr Christopher Steffen, the compa-ny's chief financial officer, quit after only 11 weeks, because of differences with Mr Whitmore over the best way to restructure

Three Kodak directors up for re-election yesterday won over-whelming support from sharehoiders, getting 96.2 per cent of votes cast, but investors sent a strong message of dissatisfaction by casting 42 per cent of ballots in favour of a proposal to make the entire board stand for re-

election every year. The College Retirement Equities Fund (CREF), the single largest managed equity fund in the US which holds 1 per cent of Kodak's shares, announced it had withheld support for the three directors because of its conviction that "Kodak has continued to delay restructuring and effective management decisions". It distrusted the company's willingness to make "long overdue changes".

Mr Whitmore told the meeting in Fort Lauderdale, Florida, that Kodak would generate substantially more cash flow between now and 1996 than the previously stated target of \$1bn.

He repeated that he expected a solid increase in 1993 earnings, compared to 1992.

Research and development spending would be reduced as a percentage of sales; selling, administrative, distribution and advertising costs Would become more comparable with peer companies; and there were likely to be "major changes in the asset base" - an apparent reference to the disposal of businesses.

Ha repeated that a plan to improve performance would be revealed by September and announced the establishment of a new board committee to take part in major financial decisions, replacing one with a narrower

News Corp doubles to A\$668m on cut in interest charges

By Bruce Jacques in Sydney and Raymond Snoddy in London

NEWS Corporation, the Australian-based media group, yesterday reported doubled net profits of A\$668m (US\$466m) for the nine months ended March, Lower interest costs and

strong performances from associates were the main reasons for the improvement, while the bulk of tha group's core businesses mada steady gains. Revenue rose by 3 per cent to A\$8hn. Associated companies, mainly

BSkyB - the UK-based satellite broadcasting arm - in which Pearson, owner of the Financial Times, has a significant stake, Ansett Transport Industries, the Australian airline, and Pacific Magazines, the Australian publisher, turned round their contribution from a A\$76.8m loss to a A\$112m profit in the nine

News Corp said BSkyB's weekly revenues were exceeding 27m and weekly operating profits more than £1.7m at the end of March compared with break-even a year earlier. Ansett had moved from loss to profit with better yields on improved essenger numbers.

The group said continued debt reduction and falling interest rates cut News Corp's total interest expense by 22 per cent to

the majority of its earnings in the US where operating income rose from \$A654.9m to \$A686.6m. The Fox television businesses increased earnings almost 20 per cent, but earnings from the

Twentiath Century Fox Film

Magazine and inserts operations lifted earnings by 17 per cent, profit from TV Guide rose 27 per cent, but the Harper-Collins book group had an earnings fall in the period in spite of a slightly improved latest quar-ter, UK activities lifted their

operating income from A\$275.3m to A\$313.6m in the nine months. The company's newspapers had continued to lift results through efficiencies in a flat

BSkyB now has 2.3m homes subscribing to at least one of its services with 1.6m subscribers to the Sports Channel.

The company says the numbers of bomes receiving Sky channels is increasing at an average rate of more than 20,000 a week through satellite dishes and cable television.

In the antumn BSkyB will scramble all its channels and offer a "basic package" of at least 10 channels for around £4 (US\$6) a month. This will be free to all those subscribing to both the BSkyB film channels and the Chargeurs results, Page 19

Anglo American rejects Gencor unbundling lead will not necessarily be following Gencor's lead. Since the issue of unbundling was first raised three years ago, By Philip Gawith in

ANGLO American Corporation, South Africa's largest company, said yesterday it would not be following Gencor's policy of unbundling into smaller units. It said that while unbundling might make sense for some

groups, it did not believe that its current structure required it. Anglo's statement follows cor, the country's second largest mining bouse, that it will be distributing all its non-mining assets to shareholders, so halving

Anglo, with its complex corporate structure, has long been considered by both politicians and analysts as a likely candidate for unbundling. Yesterday's statement makes clear that South Africa's other large corporatee

Anglo has vigorously defended its size. It says it is a mining finance group "with different lev-els of bolding and operating com-panies, many of which are listed, with separate though overlapping

Without mentioning Gencor, Anglo stressed its structure has (Sanlam in Gencor's case) "nor any pyramid structures designed purely for holding purposes" (Gencor's Genbeheer). It also said more than .50 per cent of its shares were held publicly.

Anglo said its size helped it undertake large capital projects while the geographical and product diversity of its assets conferred contra-cyclical

Zenaca ex-rights fell from a first price of 682p to 664p, little more than a 10 per cent premium to the rights price, where they yiald 5.2 per cent. That compares, institutions said, with a yield for Glaxo of 3.5 per cent or Wellcome of 2.5 per cent.

66p. New-ICI shares rose from 569p to 609p. Official trading in the shares will start on June 1, so long as shareholders approve the demerger at a special meeting on May

The nil paid fell from 86p to

Starting with \$50,000 seed money in 1975, Tony Ryan built GPA Group into the world's largest aircraft lessor. But over-ambition, a flawed financial strategy and recession have driven GPA into last-ditch talks with its creditors starting today in New York. GPA's - and Ryan's - role in the industry hang in the balance.

Purchase policy that led to scramble for equity

SEVEN YEARS after Mr Tony Ryan founded GPA Group he made a decision which appeared inspired but which eventually brought the aircraft

leasing group to its knees.
Instead of only leasing used aircraft, Mr Ryan ordered 100 aircraft direct from the manufacturers, telling his directors "to ignore the price of aircraft and look at the logic of what we were doing.

By 1986 GPA was positioned to exploit the world-wide aircraft shortage that developed in the late eighties.

But as Mr Craig Jenks, head of the New York-based Airline/ Aircraft Projects Consultancy, says: "GPA's appetite for low credit and high margin deals expanded as swiftly as the availability of finance

fts success promoted a further round of explosive orders and in April 1989 it committed itself to a total of almost \$17bn (£11hn) in options and firm

As the market turned against GPA It suffered a sig-nificant deterioration in the credit quality of its lessees. Some defaulted, such as VASP, the Brazilian Airline, forcing GPA to repossess aircraft; others rescheduled lease rentals, and American West Airlines, filed for protection from its editors under Chapter 11 of

the US bankruptcy code. Faced with \$12hn of firm orders from aircraft manufacturers to the end of decade and

equity via a global flotation. The question was at what price should the shares be valued.

The fate of GPA was determined largely by its inability to raise that equity, which it has tried to do on many occasious over the past year.

Had GPA put a lower valuation on its stock during these attempts they might just have

The problem was not that GPA ever refused to accept that its shares were worth less than It had hoped. It was more that each time the company was ready to price its shares more competitively, investors took the view that they were worth even less - a suicidal

game of beggar my neighbour. After a public row with advisers, Mr Ryan agreed to sell the shares at \$20 each, instead of the \$30 he helieved

they were worth. But the issue was pulled at the last minute on June 18 because of lack of support from institutions. Some of the biggest, including Alliance Capi-tal, which manages about \$60bn of pension and mutual fund assets in the US, complained that the shares were

significantly overpriced. GPA did not give up, it simply changed its strategy and opted for something less complex than a global issue. A few weeks after it was

forced to abort its flotation. Nomura, the group's main adviser, approached a number of outside investors in an attempt to place up to \$500m of have declared that they have new shares. Discussions cen- no intention of reinvesting at the company decided at the tred on the shares being any price.

But hy then the market took the view that the value of the shares bad fallen furtber, In line with the decline in the value of aircraft and the deterioration of the credit quality of

GPA's lessees. In September the company appeared to have accepted this when it asked some of its biggest shareholders to support a 350m preference sbare issue with a conversion price of \$8.

Yet by now the ordinary shares were being quoted on the Dublin grey market at between \$8 and \$8. The issue was shelved as the

group was forced to hegin negotiations with banks on its borrowing arrangements. Earlier this year the comholders for the last time, offering them new shares at just \$1.

As one of its bankers said at the time: "This was the last throw of the dice". If investors declined to take up their rights in the new preference share issue they would

be saying something about the perceived price of the shares that the banks did not want to By writing down the value of their shares to less than \$1 many shareholders confirmed the banks' worst fears.

Mr Davld Kingston, chief executive of Irisb Life, said GPA was probably the worst investment ever undertaken h the company.

That view was ecboed hy many other shareholders, who

Bankers share the blame for debacle

By John Plender

IT IS no mean feat for a company to come so close to seeking protection from its creditors within less than 15 months of reporting profits of

\$279m (£181m). But GPA is no ordinary undertaking, and the fact that it rose so far and fell so fast owes as much to the bizarre decisions of its bankers as to the mistakes of the management, headed by the founder, entrepreneur Mr Tony Ryan. GPA took off on the basis of

a classic market opportunity. In the recession of the early 1980s, after the buge increase in fuel prices that followed the second oil shock, airlines were financially stretched.

in the US their problems were compounded by deregula-tion. Aircraft manufacturers found their order flow shrinking at an alarming rate.

For GPA and other companies in the operating lease business, this meant that aircraft were available cheaply and airlines welcomed new sources of off-balance sheet finance. Mr Ryan and his Shan-non-based team seized the opportunity just in time for the

conomic upturn. What might have been a viable operation in the long run then became something altogether more dangerous, as Mr Ryan's ambition coincided with the urgent need of big international banks to find new clients.

In the aftermath of the Latin American debt crisis, the banks found their credit ratings were lower than those of

their big corporate clients, who promptly decided to cut out the banking middlemen and go direct to the markets for funds. In their search for replacement business, the banks turned to higher-risk lending.

At the same time, the Japanese banks, which came to account for 38 per cent of GPA's credit facilities by 1990, were seeking to internationalise their operations.

Aggressive accounting (whereby profits on the sale and leaseback of alreraft were taken immediately instead of being spread over the term of the lease) combined with a veritable cascade of bank money, helped GPA's pre-tax profits rise from \$17.4m in 1985 to \$279m in 1992.

But the risks were mounting phenomenally, as the fleet of aircraft owned by GPA rose from 40 to 400 in the same

Among those risks were: Operational gearing in the market itself.

Analysts estimated at the end of the 1980s that every 0.5 per cent variation in the growth of demand for aircraft between 1990 and 2000 would lead to a variation in the worldwide fleet, needed to satisfy that demand, of 700 aircraft - this on a total jet fleet et the time of 8,300.

Given that GPA's profits and solvency hinged substantially on making sound judgments about the balance of supply and demand in the aircraft market the implicit leverage was potentially lethal. · Mismatching of costs and

GPA's operating leases with airlines mainly ran for five to seven years, which was much less than the life of the aircraft. If the leases fell in, or were terminated when demand was weak, GPA, the owner.

Rarely can so much have been borrowed by so few, on the basis of so insubstantial a balance sheet

could find itself paying finance ing and other costs on aircraft that were not producing reve-Weak residual values of air-

Since GPA became increas ingly dependent for its profits on the sale and leaseback of aircraft, any decline in values was threatening. It would also reduce collateral for further finance and deter investment

· Lack of creditworthiness of many airlines, both in the US and the Third World.

With so many inherent hazards in the business, GPA needed a substantial cushion of equity to help minimise

Instead the banks permitted degree of financial gearing that looked absurd long before the company ran into trouble.

abortive attempt to float the company last year, GPA's liabilities soared from \$892m to a stunning \$5.3bn.

Share capital and reserves in 1992 of \$1.2bn were dwarfed by firm commitments to huy aircraft in future years of \$9.4bn, plus options to purchase a further \$8bn more. GPA thus found itself trying

to make an international offer of equity shares last year with a prospectus that baldly stated that "there can be no assur-ance... that adequate sources of capital will be available to fund the group's aircraft purchase commitments." This was, in short, a spectac-

ular banking aberration. Rarely can so much have been borrowed by so few, on the basis of so insubstantial a balance sheet.

Yet the principles involved bear some similarity to those that prevailed in the British fringe banking flasco of the

mid-1970s. Then, the Bank of England instructed the clearing banks to reduce their lending to an overheated property market. But the banks simply lent more to the secondary banking system, which promptly ploughed money into specula-tive developments at the peak of the market. The clearing banks thus suffered huge provisions and write-offs when property prices fell and the

fringe collapsed. By the same token, the existence in the 1990s of aircraft leasing companies - specialist fringe financiers - made It easier for the banks to convince themselves that they

were not exposing themselves to the ohvious risks of the overstretched airline companies. They took comfort from residual aircraft values at the end of the lease. Yet the risks have come home to roost none-

One of the more remarkable things in all this is that GPA's management has succeeded in keeping the proportion of nonrevenue earning aircraft in its fleet to surprisingly low levels, given the weak market.

Yet the immensity of the financial burden has made a nonsense of the effort. And GPA's financial crisis is now compounded by the fact that its business is so etructured that any slow down has penal consequences.

Large discounts and credits received from aircraft manu-facturers become repayable where GPA goes back on its purchase commitments.

In selling aircraft to investors, it has guaranteed to meet a proportion of any sbortfall against stipulated values on subsequent sale of the aircraft.

And since many investors bought aircraft from GPA on the understanding that it would remarket the aircraft in due course, GPA's ability to sell aircraft will be substantially damaged if investors con clude that its survival, and its ability to fulfil the undertakings, are threatened by the present financial upbeaval.

The American humourist Ogden Nash once remarked that bankers are like everyone else, except ricber. As one City wag remarked: Should he have said stupider?

Protection available under Irish

procedures

By Andrew Jack

IF GPA fails to strike a deal soon with its creditors, It is likely to turn to the Irish courts for protection while It works out a financial restruct-

By asking the courts to appoint an examiner, the GPA board could remain in control of the company during the negotiations. As such, the Irish system is much closer to Chapter 11 insolvency procedures in the US than adminis-

tration in the UK. Examination was brought to the statute books three years ago in an emergency all-night session of the Irish parliament. It was designed to provide a last-minnte insolvency option to prevent Mr Larry Goodman's beef empire passing into receivership.

in it

MANUAL PROPERTY AND ASSESSMENT

Typically the directors request the courts to approve the appointment of an examiner. It is believed GPA has already lined up a candidate. Creditors can also request an examiner to be brought in.

If creditors instead attempt to appoint a receiver, the directors may lodge an appeal with the courts to have the receiver removed and an examiner appointed.

The examiner has wide powers including the right to apply to the conrt to bave directors removed from office. He or she receives a statement of affairs of the company from the directors, and has up to 21 days to make a report to the court. This will cover its financial position, the reasons for insolvency, and a summary and assessment of any

restructuring proposals.

During that period, the company may seek new loans from banks, which become preferential creditors.

More recently since the introduction of the procedure, the Irish courts have been granting interim examination orders lasting seven days.

If a judge allows the process

to continue, the examiner has a further three months to make proposals to a creditors' committee. Any decision taken must be ratified by the court.

Lessor with the biggest reach Banks count their debt exposure may have its wings clipped

By Richard Gourlay

AS GPA enters a critical week, it can be no comfort that the vultures are already picking over its back yard.

Aer Lingus, Ireland's national carrier and the airline that helped Tony Ryan launch GPA 18 years ago, has just taken delivery of its latest Boeing 737-500 - leased long term m GPA's biggest competitor. California-based international Lease Finance Corp.

While GPA has been fighting to prevent the collapse of its finances, ILFC, which is backed by the American Inter-national Group, has been going from strength to strength. GPA has also been growing

the number of leases, although the creditworthiness of some of its operators has deteriorated. Last year it leased 203 aircraft worth more than \$4bn (£2.5bn) and has taken a domi-nant position in rapidly expanding markets such as

It would be a strange financial restructuring that did not, however, clip GPA's wings and its ability to fund the

So what would the airline even more valuable in the next and Roland Rudd industry miss if GPA was to ehrink and who

would fill the gap?

GPA is probably the largest distributor of aircraft after Boeing. It prides itself on marrying financiers and manufacturers with airline operators. The company has not always leased to the strongest customers and last year, in particular, it faced a debilitating level of early-terminating leases after the Gulf war.

But GPA still has the greatest reach among airline leasing companies. In spite of the rise of ILFC, GPA still leases twice as many aircraft around the world as its rival.

manufacturers and airline operators with a flexibility they have cherished since the Lessors bave offered aircraft manufacturers more secure order books by enabling the

airlines to keep the aircraft off the balance sheet. Airlines have also been able to take aircraft for considerably sborter periods than the lifetime of the aircraft.

With the latest generation of aircraft designed to last for 30 years, leasing is forecast to be an increasingly popular form of aircraft finance.

Unfortunately, in providing this flexibility, GPA has taken much of the operational risk on to its own shoulders which, lacking financial muscle, have proved inadequate for the task. If GPA were to go into examination, the Irish equivalent of Chapter 11, there would be a rush of perhaps better floanced pretenders to fill the hole.

"There is still very attractive core financing to be done on aircraft," says Sir Michael Bisbop, bead of British Mid-land Airlines. "Residual values of the leases should increase in the next few years as supply becomes tighter."

There is also one other consideration. As an intermediary or marriage broker - GPA's main assets are its experienced staff. Without implying any disrespect to Mr Ryan's West of Ireland base, if the GPA team is prepared to work out of Shannon it could work out anywhere - and for anyone.

By Robert Pestor

THE FRONTLINE casualties in GPA's fall from grace are its sharebolders, whose shares are worth less than \$1.

Many investors bave written off their entire stake in the company. Any debt-for-equity swap in a financial restructuring will replace them as sharebolders. The biggest current share-

bolder is Mitsubishi Trust and Banking, the Japanese bank which owns 12 per cent of the ordinary shares Other big sharebolders are Air Canada, with 10 per cent, and Mr Tony Ryan, GPA's founder, who owns 100 per cent of a special class of shares and

per cent of the ordinary sbares. Some of these are pledged as collateral for a \$35m (£22.7m) personal loan from Merrill Lynch International Bank, the European arm of the biggest US securities firm. The next most important shareholders are Irish Life and Aer Lingus, which have about

10 per cent between them.

Clticorp, the blggest US

bank, paid \$78.8m at the peak

sharebolding. Citicorp also has substantial deht exposure to GPA, although it recently said its loans to GPA are "less than

Nomura International, GPA's global co-ordinator during its ill-fated attempt to raise equity via a public flotation, bought 1.36m shares at an average of \$20 a share. The run-up to the flotation was a public relations disaster

for GPA, and some of the group's executives blame Its GPA was also irritated that Nomura was only able to meet one of its three commitments

made when it won its mandate in 1991 as the group's lead It provided liquidity for existing sharebolders by buy-ing Im of their shares and later

bought out shareholders who refused to agree to a lock-up before the flotation was due to go ahead. But it falled to raise \$250m through a convertible redeemable preference share issue and did not underwrite any of the sbare issue. GPA believed Nomura had given it an undertaking to underwrite \$500m, although this was dis-

shi Trust and Banking, which said it had provided a credit line of \$191m. Its Japanese rival, Sakura, provided credit estimated at more than \$110m. Toronto Dominion Bank of Canada is also understood to have substantial exposure, as

A total of 138 banks provided

between middle management, effectively running the operations, and senior directors, involved in the restructuring, which to date bas failed to meet most of its objectives. Angry about the lack of progress on the restructuring, two key middle managers, Mr Patrick Blaney and Mr Phil Bolger, wrote to the board asking

However, the rest of the non-executive directors, who include Sir John Harvey-Jones, the former chairman of Imperial Chemical Industries, Lord

for Mr Ryan to be replaced by Mr

and Mr Garret FitzGerald, the former lrish Prime Minister, gave their unequivocal support to Mr Ryan,

Three of the non-executives were already on record as citing Mr Ryan as the main reason why they joined the board and they were not about to let him down when he needed help. As one of the non-executives put it: "We are all very close to Mr Ryan, who has been doing a splendid job in very difficult circumstances. We did not entertain the thought of replacing

him: there will be no more management changes." in the event, Mr Blaney was promoted to the board as chief operating named Project Rebound. Other members of middle management had already moved into key

These include Mr Bolger, who is in charge of lessing, Mr Mike Dolan, responsible for the negotiations with bondholders as managing director of GPA Capital and Mr Steve Johnson,

who is the company's general council.

According to one banker the four
"young turks" no longer have confidence in Mr Ryan's leadership. He
believes they will resume their battle for control of the company if the bondholders swap part or all of their debt for equity: this would have the

effect of diluting Mr Ryan's 8 per cent stake to nothing. But it would be a mistake to writeoff Mr Ryan. If be pulls off a deal with GE Capital his position as chairman

will be strengthened. Mr Gary Wendt, chief executive of GE Capital, has assured Mr Ryan of his continued support should the

financial services arm of General Electric take up a stake in GPA. Nor is Mr Ryan adverse to making sudden board changes to strengthen his hand. Last September he sur-prised some of his directors when he abruptly took over as chief executive from Mr Maurice Foley.

There has been speculation that Mr Ryan may be willing to accept an honorary post such as life president. But Ireland's best known entrepreneur is unlikely to go in the immediate future unless he is pushed.

INTERNATIONAL COMPANIES AND FINANCE

Chargeurs warns of losses | UK retailer | EC reforms hurt agrochemicals at its industrial operations

By Alice Rawsthom in Paris

CHARGEURS, the French textile and media group, yesterday warned that its industrial activities would make a loss in the first half of this year because of the cost of a rationalisation package involving 1,000 job losses.

The group, which is a prominent player in the international wool textile industry and a significant shareholder in BSkyB, the UK satellite television service, plans to close a wool processing plant in Argentina and to reduce its manufacturing capacity in

Mr Jérôme Seydoux, chairman, said the job losses, which would reduce Chargeurs' workforce hy more than 10 per cent, would aggravate the problems of the industrial division ducing the first half, but should contribute towards an improved performance in the second half.

The media division is expected to produce similar results to last year when the group as a whole saw net profits almost double to FF1724m (\$134m). after a FFr410m surplus on the sale of its stake in the UTA airline to Air France, from

rises 16.7% as sales per cent in the first quarter pass £10bn and by 12 per cent last month. The group's wool textile interests have been hit by the

gloomy economic climate and J. SAINSBURY, Britain's its transport activities by the weakness of the European car biggest retailer, yesterday reported a 16.7 per cent increase in full-year pre-tax

By Paul Taylor in London

The results of the group, whose sales exceeded £10bn (\$15.4bn) for the first time, compare with the 6.5 per cent profit gain posted by its rival

Sainsbury's pre-tax profits in the year to March 13 increased to £732.8m from 2628m the previous year on sales that grew by 11.6 per cent to £10.27bn, including £584.2m of VAT and US sales taxes, compared with £9.2bn. The profit improvement,

which was at the low end of market expectations, was nuderpinned by a small increase in like-for-like sales volumes in the group's UK supermarkets and Savacentre hypermarkets, and by higher operating margins and a 0.7 percentage point gain in UK market share to 11.3 per cent.

Mr David Sainsbury, chairman, said the "extremely strong" results had been achieved in "very competitive market conditions".

He attributed the gains to the group's aggressive trading position and improved price competitiveness, enhanced quality and controlled costs. In the UK, supermarket and Savacentre sales increased by 12.6 per cent to £8.9bn with 23 new stores contributing 8.8 percentage points of the gain the largest contribution from

profits were 19.1 per cent higher at £752.2m. Sunday trading at 160 supermarkets was only marginally profit-

9.8 per cent to £282.8m. Rarnings per share were 28.47p against 25.69p. The

final dividend of 7.8p per share makes a total of 10p against 8.75p. Sainshury's stock closed down 14p at 467p.

Monsanto

American Cyanemid

Paul Abrahams looks at Schering's mooted deal with Hoechst

THIS week's announcement that Schering, the Germao hiosclence group, is negotiating a possible merger of its agrochemicals husiness with Hoechst, the Du Pont German chemicals giant, Bayer Rhone-Poulenc raised more than a few eye-

brows. It was the choice of partner rather than the merger itself that caused the surprise. A deal would create a new number two in the world agrochemicals league after Ciba of Switzerland: hut the geographical synergies between the two companies is minimal.

Rationalisation is clearly necessary in this \$27bn industry, involving fungicides pesticides and insecticides, though not fertilisers. The sector has been severely battered in recent years, enduring an unhappy combination of rising costs and falling demand.

Costs are on the increase because of rising development overheads - a direct consequence of increasing government demands for safer and more environmentally friendly

products.

Demand is tumbling almost wholly because of the reforms last year of the European Community's Common Agricultural Policy that involved setting aside 15 per cent of farmers'

Estimates of the impact of the reforms vary. Alian Wood-burn Associates, the Edinburgh-based agrochemical market research specialists. estimates that the EC market

AGROCHEMICAL SALES

last year fell between 10 per cent and 12 per cent. Wood Mackenzie, the agrochemicals analysts, estimates that it

dropped 13 per cent. "About half the fall in west Europe was due to the reforms and about half due to the weather," says Mr Alian Woodburn. He expects the market to fall a further 8 per cent to 10 per cent over the next two to

The US market is also struggling. BASF at one point cut the price of products for sovabeans by 30 per cent in America last year.

Monsanto has been cutting the prices of Roundup, Its bestselling herbicide, after its US patents expired last year. Zeneca, ICI's bioscience division, estimates the world market declined between 2 per cent and 3 per cent last year because of the reforms and

price competition in the US. The agrochemicals market is clearly stagnating," admits

and deputy chairman.
"The CAP reforms have really changed the conditions of life. The lower subsidies mean farmers are unwilling to increase purchases of agrochemicals. At the same time, demands for increasing environmental performance mean higher R&D costs. We have to adapt to a smaller market," says Professor Pohle.

Schering has been particularly hit by the EC reforms. The group has 60 per cent of its sales in the region, according to Mr Woodburn. Sales fell 16 per cent last

During the first quarter of this year, its agrochemicals division's turnover collapsed 22 per cent, a fall that Professor Pohle partly attributed to changing huying patterns. The division is no longer offering discounts at the beginning of the year to encourage wholesalers to take early stock, and aims to cut staff by 20 per cent

he impact of the reforms has been exacerbated by Schering's product mix. Cereal herbicides can be used on some set-aside land, but no fungicides, and It is this prodnct area that had been hit harder than any other. Schering's strength is in cereal fungicides and sugar beat herbicides which have not been affected.

If it comes off, the merger between Schering and Hoechst

ring's chief financial officer would link the world's 12th and eighth largest agrochemicals businesses and put the new group ahead of the operations at Bayer of Germany and Zeneca, according to Mr Woodburn.

Last year, Schering's business had a turnover of about \$820m; Hoechst agrochemicals

sales were \$1.29bn. Rhone-Poulenc of France has already linked its agrochemicals business to that of Sumitomo, while Shell and American Cyanamid are understood to be negotiating a potential

combined venture. Schering almost merged its business with that of Sandoz until the Swiss company also mooted a merger of its pharma ceuticals operations.

However, although there is some synergy between the products of Hoechst and Schering - the former is strong in cereal berbicides and insecticides and has only limited exposure to fungicides - the geographical arguments for a link are not overwhelming. Both are strong in the Euro-

pean market. Mr Woodburn estimates 48.5 per cent of the new combined group would be in west Europe, 16.5 per cent in North America, 13 per cent in Latin America, 12 per cent in eastern Asia, and 10 per cent elsewhere.

"This deal will do almost nothing to reduce the two companies dependence on the rapidly weakening European mar-ket," says Mr John McDougall at Wood Mackenzie

Simon deficit breaks bank deal

Aegon improves 20% to Fl 230m in first quarter

By Ronald van de Krol

AEGON, the Netherlands' second-largest insurance group, said first-quarter net profit rose by nearly 20 per cent to Fl 230m (\$128m) on turnover up 11.4 per cent at F1 4.93bn.

The company, which described the results as a "promising" start to the year, said the first-quarter performance confirmed its optimism about 1993, adding that It stood by earlier predictions that fullyear operating profit would sbow e slight increase over

Operating profit after tax in the first quarter rose by 6.7 per cent to Fi 200.3m. Aegon's realised profits on investments showed an even stronger rise to Fl 29.6m from Fl 5.3m the year before. The company noted that investment results tended to fluctuate from quar-

ter to quarter. Life insurance, Aegon's single largest business, posted a 17.8 per cent increase to FI 205m.

Profits at Italian energy group plunge to L126bn

By Haig Simonian

AGIP, the Italian upstream oil and gas group controlled by the Eni state holding company, suffered a steep fall in profits to L126bn (\$82.6m) last year from L1,188bn in 1991.

The drop at the company, due to be partially privatised hy the end of this year, will come as a blow to plans to float Agip's shares and reflects the heavy additional burden of Agip's stake in the lossmaking EniChem chemicals operation.

Agip gave no indication of how deeply it bad been affected by EniChem's losses, which more than doubled to L1,560bn last year. Agin owns 49.6 per cent of Sci, a holding company owned with other Eni group operations, which in turn controls almost 60 per cent of EniChem.

Among other factors accounting for its profits fall were higher interest charges and exchange rate factors. Overall, Agip had to set aside 1.2.622bn in amortisation and L933bn for taxation.

From the outside, Repap looks like the fastest growing coated paper company in the world. Why?

Because, on the inside, we're Canada's high technology forest products leader. Take a closer look. Meet Repap Enterprises of Montreal, the fourth largest coated paper company in North America and the sixth largest in the world. We are vertically integrated from forest to the marketplace and have produced

of coated recycled paper and premium lumber in the last three years. How? By manufacturing valueadded products that our customers will buy. It's as simple as that.

Our Strategy We sustain such growth by building coated paper, pulp and lumber mills designed around a solid, long term strategy: to be the lowest-cost provider of

high quality, value-

added environmentally

responsive forest products in the world. It's that simple.

We'll continue to grow by investing in high technology, scientific research and training our people to be the best. We insist that money can be made, costs can be lowered and quality can be improved by using technology, brains and imagination. Our people prove it everyday.

We'll send you

Maybe you haven't read

about a forest products company like Repap for a long time. We understand. Call, write or fax Mr. Daniel D. Veniez, our Vice President, Corporate Affairs today. He'll gladly send you a copy of our 1992 annual report when it comes off the press. It's great reading. And we're a great investment in tomorrow.

First-term improvement at Turner TV group

By Jeremy Bennaliack-Hart in New York

TURNER Broadcasting System, the Atlanta-hased cable television group controlled by Mr Ted Turner, yes-terday reported higher reve-nne and income for the first

Net income totalled \$20.14m, against \$731,000, although the 1992 figure reflected costs associated with Winter Olym-

pics coverage.

The income figure for the latest period was struck before a charge of \$286m following the adoption of the FAS 109 accounting standard on income tax. Revenue rose 9 per cent to

\$398.4m. Mr Turner said: "The overall tone of the advertising market has been healthier."

Operating profits for the includes TBS SuperStation and Turner Network Television, rose to \$46.5m from a depressed \$16.1m.

Revenue advanced 11 per cent to \$189m, dne to increased subscription and advertising revenue

In the news division, which includes CNN, operating profits rose 23 per cent to \$52.15m on revenue 15 per cent higher at \$144.2m. The syndication and licen-

sing division suffered an operating loss of \$5.95m, against a \$2.74m profit, due to a shift in the revenue mix from higher to lower margin businesses. Revenue fell 8 per cent to Losses in the sports division

rose from \$3.98m to \$4.87m, on revenue of \$1.17m, against \$1.14m.

On Wall Street, Turner shares were down \$1/4 to \$20 before the close.

Varta may cut dividend as sales slip 9%

By Ariane Genillard in Bonn

VARTA, the German hattery maker partially controlled by the Quandt family, said firstquarter sales had fallen by 9 per cent to DM528m (\$328m). The company warned it was dividend. The 1992 payont was

an unchanged at DM10. Profits for the year to December 31, 1992 fell to DM50m, from DM52m the previous year on sales up by 9 per cent to DM2.4bu, reflecting the merger of the automotive bat-tery activities of Varia and Bosch, the German engineering group. First-quarter sales in Germany decreased by 7 per cent and abroad by 10 per

cent. The sharpest fall in first quarter sales was recorded in industrial batteries with a 21 per cent decline. Sales of antomotive batteries fell by 11 per

INTERNATIONAL COMPANIES AND FINANCE

Continental places \$4.5bn order with Boeing 9

By Nikki Tait In New York

CONTINENTAL Airlines, the fifth-largest US carrier which recently emerged from Chapter 11 bankruptcy protection, is placing a \$4.5bn order with Boeing to update and simplify its fleet. The order could be worth more than \$600m to the UK's Rolls-Royce. which will supply some of the engines for the aircraft

In total, the Continental deal covers firm orders for 92 aircraft, to be delivered between January 1994 and the year 2005, with options for another 98.

However, a portion of the purchase agreement – for 50 Boeing 737s and 25 this aircraft, it has options on a further Boeing 757s – essentially reinstates an 25, and Rolls-Royce said the potential

then cancelled by the carrier while it was in bankruptcy.

The new element is Continental's decision to acquire 12 wide-body 767-300ER aircraft, with options for another 18, and five of the new 777s, with

options for a further five. The Continental 777s will be the longer-range B model of that aircraft. Continental also announced for the first time that the new fleet of twinjet 757s will be powered by Rolls-Royce

In addition to the 25 firm orders for this aircraft, it has options on a further

order placed by Continental before it value of the order could exceed \$600m. went into Chapter 11, and which was The first delivery date for the 757s is May 1994, and the final deliveries would be made in March 1997. Delivery dates for the optioned aircraft begin in 1995

and continue through to 1998. The first 777s, meanwhile, are due to be delivered in August 1997, and the final delivery date on the firm order aircraft is April 1998. Continental said the airliner, carrying GE engines, would be used to replace 747s on longerhaul international routes.

The firm-order 767s are due to be delivered between 1995 and 1999, and will also appear in Continental's fleet

for the first time. The most numerous part of the order

is for the 50 737s, with engines made by CFM International, a joint venture between General Electric in the US and France's Snecma, with options of another 50. Tha firm orders will be delivered between January 1994 and July 1997.

The US airline said the overall size of its fleet - currently about 325 aircraft should not change substantially over the next three years.

However, by end-1997, about 96 per cent of its aircraft should meet the new "stage III" noise requirements, com-pared with only 51 per cent at present. Along with Trans World Airlines. Continental has one of the oldest fleets

Further loss at Trustco ahead of takeover

By Bernard Simon in Toronto

ROYAL Trustco, the Canadian financial services group con-trolled by Toronto's Bronfman family, has recorded another large loss as it limps towards a takeover by Royal Bank of

Canada. The first-quarter loss was C\$75m (US\$58.8m), or 57 cents share, against earnings of C\$24m, or 6 cents, a year earller. RT posted losses of C\$852m in 1992.

Investment income dropped 30 per cent, to C\$174m. RT said

falling deposits and the repayment of borrowings curtailed lending and investment activity. Margins were squeezed by higher non-performing loans, a smaller equity base and a lower yield on its securities portfolio. Loan loss provisions mped to C\$61m from C\$21m. RT is negotiating the details of the C\$1.6bn sale of its

operations to Royal Bank. Under the deal, RT will be left with a portfolio of mostly real-estate loans with a book value of C\$4.3bn and is likely to change its name. Its assets

stood at C\$22.5bn on March 31. Royal Bank, Canada's hig-gest financial institution, will gain 146 branches in Canada, as well as 15 overseas units. Mr Allan Taylor, RBC's chairman, sald recently the acquisition would enable the bank to "expand quickly in four profitable high-growth markets where our own pres-

ence is relatively small". The acquisition will raise the proportion of consumer deposits in RBC's total funding from 61 per cent to 68 per cent.

sell eight boxboard plants By Robert Gibbens

Cascades to

CASCADES, the international packaging and fine paper group, has put eight North Amarican boxhoard plants, valued at C\$300m (US\$235m). up for sale.

The cigarette packaging and converting plants, which employ 1,250, were part of Cascades' acquisition of Paper-

board Industries in 1992. Paperboard, which is 63 per cent owned by Cascades, now includes all the Cascades group's European and North American boxboard interests. It went public last year.

Mr Lanrent Lemaire, Cascades chairman, said the eight plants, some of which are unable to use recycled material, did not fit Into the company's long-term strategy. There were five or six potential bidders for the plants, he

added. Cascades Paperboard recorded a loss of C\$5.1m, or 13 cents a share, in the quarter to March, against a profit of C\$443,000, or 2 cents.

1992. Operating profit, year-on-Mr Lemaire said that Paper board sales and profits should improve later this year, though the North American and Enropean markets remained generally depressed. A boxboard plant in Duffel, Belgium, will be closed temporarily and converted to use

recycled materials. · Air Canada is raising US\$190m by selling five Airbus 320 aircraft to a group of international banks in a long-term leasing deal.

Recovery at Woolworth stalls

By Nildd Talt

By Nikki Tait

RECOVERY at Woolworth, the US retail group, stalled in the first quarter of the current financial year, when the company recorded earnings of just \$1m after tax on sales of \$2.13bn.

In the same three months last year, Woolworth reported a \$17m after-tax profit, on sales slightly lower at \$2.09bn.

Woolworth - which takes in several specialty chains, such as Foot Locker, as well as the

in v board

In a Lexus, before the gearbox does anything, it lets the engine know. No wonder everything *goes* so smoothly.

As you pull away in a Lexus LS400, you'll notice how very smooth your progress is. You'll not notice any of the lurches or hesitations you'd find in other automatics. But how is this achieved? Lexus' designers pioneered ECTi which, in full, means Electronically Controlled Transmission with intelligence. The intelligent part is an advanced computer which informs the Lexus transmission of your speed, when to change gear and how much power to transfer to the road. A split-second before the transmission shifts, the computer sends a message to another processor in the engine. The 4.0 litre V8 then momentarily reduces power output, and as a result, the gear shift is virtually imperceptible.

With smoothness again in mind, Lexus engineers developed a revolutionary drivetrain designed to minimise vibration. It's in one straight line from the engine crankshaft through to the two-piece driveshaft. Now that you're cruising along smoothly, feel how comfortable the seat is. Six independent motors inside the seat mean it can be adjusted to accommodate almost any physique. It can even remember your favourite driving position — and that of your spouse — at the touch of a button.

Now look around you. You'll notice the Californian walnut trim, and the softly illuminated instruments. Next, imagine you're driving past a farm yard. Take a breath. Not a thing, because you specified an odour extractor for the air conditioning. And listen. Peace and tranquillity. Because of Lexus engineers' fanatical resolve to eliminate noise, the LS400 is near-silent. (That is, until you turn on the Lexus' seven-speaker sound system.) Visit your nearest Lexus dealer and experience the LS400. We'd be delighted to let you know about the world's smoothest—and most original—luxury car.

INTERNATIONAL COMPANIES AND FINANCE

Charles Leadbeater, Michiyo Nakamoto and Robert Thomson expect a batch of disappointing results from Japan

Sega bucks trend with an advance of 64%

SEGA Enterprises, the amusement centre machines and video games manufacturer, bucked the expected trend of the Japanese corpo-rate results season yesterday by reporting a 64 per cent increase in profits.

Sega said pre-tax profits in the year to March were up to Y55bn (\$494m) from Y33.4bn after revenues rose 63 per cent from Y213.3bn to Y346.9bn.

Sega, whose video games are opular internationally, notably its games hero Sonic the vide one of the brighter spots in the Japanese results season as most industries suffered a sharp downturn.

Sega has been extremely effective in competing with its main rival, Mintendo, in the US and Europe, where it has increased its market share to about 40 per cent, according to industry analysis.

Sega saw a 91 per cent rise in export revenues to Y210.9bn, compared with a 23 per cent fall in domestic sales to Y19.3bn in its consumer products division.

Sega is forecasting revenues of Y400bn and pre-tax profits of Y63.3bn for the current fiscal year.

Pre-tax profits ease at Daiwa

DAIWA HOUSE Industry, a leading builder of steel-framed bomes, said sales for the year to March rose 5 per cent to Y926m (\$8.3m), in tandem with a rise in housing starts, in spite of waning land prices, writes Wayne Aponte in

Bnt the Osaka-based company said pre-tax profits eased 3.8 per cent for the first time in 13 years. Declining Interest rates led to a fall of more than

Gloom is Tokyo's corporate rule

Michiyo Nakamoto reports that some upturn is expected this year

APANESE corporate cuiture regards conformity as a virtue. It is a virtue that will be in ample abundance over the next few weeks when the majority of Japanese companies announce dismal results for the year to March.

Manufacturers, service companies and financial institutions are expected to report reduced profits for the third

Brokers have forecast that companies listed on the first aection of the Tokyo atock exchange will report profit falls of 20 to 30 per cent.

The reason is the weakness of business and consumer confidence between April 1992 and March this year.

Despite an emergency government spending package of Y10,700bn (\$96bn), announced in August, business confidence worsened throughout the year. The Bank of Japan's diffusion index, which measures short-term economic prospects. fell from minus 5 in February 1992 to minus 49 by February this year in the manufacturing sector and from a positive indication to minus 33 in the non-

manufacturing sector. The dramatically-altered business environment forced companies to adjust their strategies. As a result, the fall in profits in fiscal 1992 will reflect not only the effects of lower demand but restructuring charges as companies positioned themselves for recovery.

Consumer confidence declined not only because of the sagging economy but also because of indications that the system of lifetime employment, ong taken for granted, is no onger sacred. Personal consumption actu-

ally rose 0.8 per cent in fiscal 1992, according to estimates by BZW, the securities company. But this is a low figure for Japan, where growth in con-sumption had been running at 3 to 4 per cent in previous

A seemingly insatiable thirst for material goods in the years of asset inflation in the late 1980s has been replaced by a mood of frugality. Motor manufacturers suf-

fered a sudden halt to demand for luxury cars, just as they had invested in new plants and state-of-the art automation to meet expected strong demand. Electronics manufacturers discovered that minor redesign of existing products no longer

lured consumers into replacing TV or audio sets. Meanwhile, the fall in busi

ness confidence led to a sharp drop in capital spending, nota-bly by financial institutions.

Tokyo set about restructuring to cope with the recession. BZW estimates that capital expenditure in fiscal 1992 was NKK, the steel manufac down by 5.7 per cent, in contrast to high growth in capital to Japan Airlines and IBM investment in the so-called "bubble" years, when compa-nies competed to invest in new Japan, have introduced voluntary early retirement programmes to encourage staff to look for a second career. Such manufacturing and communications equipment. measures are being supple-

The decline in capital exper diture was reflected in a fall in machine tool orders in 1992 of 35 per cent, according to the Japan Machine Tool Builders Association. Computer manufacturers, telecommunications and office equipment manufacturers were all affected by the drop in capital spending.

he slowdown of the Japanese economy means companies that are not competitive overseas and are dependent on domestic demand will be hard hit, says Ms Kathy Matsui, strategist at BZW. Another feature will be the

S African **Breweries** boosts income 6%

By Philip Gawith

SOUTH African Breweries, the country's largest consumer industrial company, increased attributable income by 6 per cent, from R779m in R825m (\$260m) in the year to March.

A good performance from the group's core beer interests - SAB is the seventh-largest brewer in the world - with attributable earnings rising by 16 per cent to R541m, was off-set by a 10 per cent fall in earnings from non-beer activities to R284m.

The results were in line with analysts' expectations. Most of the non-beer interests, including clothes retailing, textiles, furniture, electrical appliances, and non-alcoholic beverages, performed better than expected. OK Bazaars, however, the supermarket chain, made a R45m attributable loss of which about R31m was

attributable to SAB.

Mr Meyer Kahn, executive chairman, said the prolonged recession - a fall in GDP for 14 quarters - "had devastated consumer spending and placed unprecedented pressure on SAB's widespread consumer goods interests"

Mr Kahn said the damage to the economy would take a considerable time to repair, with no real growth in consumer eding until well into 1994. But he predicted increased earnings and operating cash flows for the year ahead

Group turnover rose by 24 per cent to R21.8bn with 16 per cent coming from inclu-sion of the Plate Glass group for the first time. Trading profit rose by 21 per cent to R2.3bn, but higher tax held growth in after-tax profits to 15 per cent.

With a higher number of shares in issue following the Plate Glass acquisition, earnings per share rose to 304 cents from 290 cents. The dividend was increased to 137 cents from 130 cents.

surprised investors yesterday with a plan to swap \$9.15bn of its existing Eurobonds into two new issues in an attempt to pave the way for its return to the Eurodollar bond market.

INTERNATIONAL BONDS

Italy has not launched a Eurodollar bond since January 1991. Issues in other currencies have also been limited due to growing concern about the economy and the budget defi-

Hopes of capitalising on a successful return to the markets after a DM5bn bond in January were hit by the inten-sifying corruption scandal – which exacerbated the mood of political uncertainty and led to a sharp decline in the value of the lira - along with down-gradings of Italy'e credit rat

suggests the treasury and its advisers may believe the mood towards Italy has now turned, THE Rapublic of Italy and that political reform will gain momentum under the new government of Mr Carlo Azeglio Ciampi, the former central bank governor.

Yesterday's deal allows investors to exchange outstanding Republic of Italy Eurodoliar bonds for one of two new issues. Investors in any of five issues with maturities from 1993 to 1997 will be able to swap into a 5.625 per cent five-year bond. An initial \$500m tranche of the new bond was yesterday fully subscribed by Morgan Stanley and a pool

of other banks. Holders of two outstanding Italy bonds with maturities in 1999 and 2001 will be able to exchange their paper for a new 6.625 per cent 10-year bond. However, holders of at least \$300m of bonds will have to come forward for this transaction to take place.

Investors taking advantage of the offer will receive a new bond in exchange for their old The timing of the latest deal, issue, along with accrued intermanaged by Morgan Stanley, est due and cash adjustment

amount based on the price dif-ference between the old and better placed to price any new new bonds.

The deal will offer existing bondholders the chance to swap into much more liquid paper, as many of the existing issues are relatively illiquid, without having to buy new

paper.
The transaction has several edvantages for the Republic of Italy. It will enable the treasury to gain a much better assessment of its investor base and establish benchmarks for possible future Eurodollar bonds.

The treasury indicated in January that it would like to borrow hetween \$10km and \$15bn on the Eurodollar markets this year to reduce its dependence on the domestic bond market and extend maturities on its existing debt. That ambition, scotched by political events soon after, may now have been revived.

Bankers believe the treasury had been planning a very sub-stantial Eurodollar bond, estimated at up to \$5bn, to follow the D-Mark transaction. Assuming the swap offer is

Moody's rating suggests. Eurobond dealers in London commented favourably on certain aspects of the exchange arrangement, pointing out that be keen to swap into a more liquid bond issne, especially since some existing Eurodollar debt is trading well over par.
"It's a good idea to try to clean

The treasury may also be keen to assess the impact on the market of last week's downgrading to A1 from Aa3 in Italy's creditworthiness by Moody's, the US debt-rating agency. Some officials suggest that the tightening of spreads on existing paper which accompanied yesterday's exchange offer suggests investor confidence in Italian paper is actually higher than

some investors will probably up existing issues because of, the various distortions in the market arising from tax exemption" said one syndicate head.

But many houses had reservations about the offer. For a start, Italian investors who

hold tax-exempt peper are unlikely to swap into the new, taxable issue, while those investors who are asset-swappers are unlikely to want to

unwind their swaps. Those investors who bought Italian paper at a yield spread of around 30 basis points in the last year will probably be unwilling to sell it at 60 basis points," said one European banker.

Another syndicate manager questioned how many investors will want to increase their duration by exchanging their

The bonds were reoffered at spread of 17 basis points over the issue price of 99.52 but were quoted at 99.24 by late afternoon for a yield spread of 65.5 basis points, according to

Morgan Stanley. While Italy grabbed the market's attention, there were a clutch of other interesting deals. The International Finance Corporation, the private sector affiliate of the World Bank, made its debut in the Euroyen sector with Y40bn of 4.375 per cent, five-year

The deal was seen as aggressively priced with a yield

the No 111 JGB, and some rival houses suggested a yield spread of 24 basis points would have been more appropriate. The IFC issue was priced to yield 10 basis points more than an existing World Bank Euroyen bond, the 4½ per cent due 1997, and the deal held its spread, according to Nikko, the

lead manager. The proceeds were swapped into dollars and the borrower is expected to achieve "substantially sub-Libor" funding of at least 30 basis points below

Trading in **Argentaria** gets off to a brisk start

By Tom Burns in Madrid

ARGENTARIA, the statecontrolled Spanish banking corporation which has issued 25 per cent of its shares on the domestic and international markets, traded briskly on its opening day yesterday when its share price rose by more than 11 per cent in Madrid.

The sbares rose sharply from Pta3.800 to Pta4.305 before easing to Pta4,230 amid heavy trading. Analysts said the trading indicated that Argentaria had etruck a correct balance in its share price by offering a sufficient premium to investors.

Heavy demand for Argentaria meant domestic retailers were limited to maximum investments of little more than Pta280,000 (\$2,370) against the original Pta8m limit outlined in the share

Salomon plans market in UK equity options

By Tracy Corrigan

SALOMON Brothers plans to start making markets in UK equity options on Liffe next month, as part of its expansion of its European equity market operations.

Salomon will act as an assigned market maker in at least 20 options on the most internationally traded UK stocks, but will not trada FT-SE options.

Mr Paul Varcoe has been hired from Swiss Bank Corporation to head a small team of equity options traders.

Poor trading volume in UK equity options has failed to revive following the muchvaunted merger of the London Traded Options Market with Liffe last year, but the market has managed to attract a fresh supply of market makers, now numbering eight. Salomon "intends to add liquidity" to the market, according to Mr Andrew Barret, head of European equity trading.

Bundesbank pleases with bigger-than-expected repo rate cut

By Jane Fuller in London and Patrick Harverson in New York

GOVERNMENT bond markets rallied ecross Europe in the wake of a bigger-than-expected cut in the German repo rate.

GOVERNMENT BONDS

The 11 basis point cut to 7.60 per cent was not only a pleasant surprise in itself, but also raised hopes that the Bundesbank Council might reduce official interest rates at next Wednesday's meeting. The repo is now only 35 basis points above the discount rate and 90 basis points below the Lombard rate.

The move was seen as confirmation that the Bundesbank was accelerating the reduction in interest rates. This was par-ticularly good news for the short end of the market, and the yield curve took a step nearer normalisation with twoyear stock starting to yield less than five year stock.

demand again. The yield fell by about 5 basis points to 6.72 per cent. But this area is still seen as vulnerable if the Danes vote Yes to Maastricht, lessening the safe-haven motive for holding longer-dated bunds.

The June bund futures con tract rose from 94.83 to 95.15 during the day.
The Dutch and Belgian cen-

tral banks followed the German move with bolder cuts of 25 basis points in their key rates - another factor giving the Bundesbank scope to ease next week. Both their government bond markets benefited. Dutch state loans continued

to surge, with the yield falling to 15 basis points less than that on bunds. The question was being raised as to whether it was time to take

France ontperformed the German market slightly and the yield spread between the 10-year benchmarks went back through the 40 basis Further out along the curve, point barrier.

10-year bunds, which had suffered the biggest losses in the recent sell-off, found some ■ IN the UK, trade in government bonds was comparatively quiet. Without any stimulating ment bonds was comparatively quiet. Without any stimulating economic data to mull over most thoughts were trained on the likely gilt anction announcement by the Bank of

England tomorrow. However, the pre-auction aversion that had attached to 10 to 15-year stock relented to some extent. The 8 per cent gilt due 2003 gained about % of a point and the 8% per cent 2013 was nearly 1/2 point up.

■ US TREASURY prices fell across the board yesterday after a bigger-than-expected rise in the April producer prices index revived fears of inflation.

By midday, the benchmark 30-year government bond was down H at 1034, yielding 6.861 per cent. At the short end of the market, the two-year note was down & at 100%, to yield 3.791 per cent.

Prices began falling after the Labor department announced that the PPI rose 0.6 per cent last month. Analysts bad fore-cast a rise of only 0.2 per cent.

GILT EDGED ACTIVITY May 11 May 19 May 7 62t Edged Berguine 110.7 5-Day average 102.4 • SE setivity indices rebesed 1974

To make matters worse, the "core" measure of producer price inflation, which excludes volatile food and energy prices, rose 0.4 per cent in April, a worryingly hig rise. Analysts said the figures

confirmed their view that inflation is on an upward course, but warned against over-reacting to the data. The big fall in bond prices, however, was partly to blame on the timing of the PPI report's release. Coming in the middle of a huge refunding round, bad news on inflation could only have made a market facing a large injection of fresh supply even more

In particular, dealers were worried that the PPI news would scupper the afternoon auction of \$10.75bn in 10-year

■ IN THE absence of fresh economic news, the Japanese government bond market continued to float downwards as technical factors and negative sentiment dominated trade.

The background has been tha growing belief that economic recovery is on the way, as reflected in the recent posttive mood towards equities (with yesterday's fall in the Nikkel stock market index

seen only as a normal daily fluctuation). This week's softness of the yen against the dollar has also removed a prop for government bonds.

In the cash market, the benchmark No 145 bond due March 2002 underperformed again, its yield rising from

4.51 per cent to 4.57 per cent in Tokyo trading. The view seemed to be that the 145 still looked expensive compared with both the benchmark-designate No 153 due December 2002, which trades nearer par value, and the

Dull performance in UK behind 15% decline at Body Shop

ANNUAL PRE-TAX profits from Body Shop international, the natural toiletries and cosmetics group, fell 15 per cent from £25.2m to £21.5m in the year to end-Fehruary.

The decline matched forecasts, however, and the shares rose 6½p to 204½p.

Despite the reduction in earnings per share from 8.8p to 7.4p, the recommended final dividend is increased from 0.92p to a recommended 1.02p. to give a total of 1.7p, up 6.25 per cent after an unchanged

Mr Gordoo Roddick, chairman said the rise reflected underlying confidence and showed the board's "view of the business on more than just

The profit fall was attributed to lower like-for-like sales in the UK, down 6 per cent for the year after a 3 per cent fall in the first half; the £1.3m cost of moving the US headquarters. and the increase in overheads from the move to a new UK head office, production and

Mr Roddick sald a "major operational reorganisation" would "have a crucial effect on our future strategy".

Group turnover rose 14 per cent to £168.3m. However, including franchisees' retail sales, turnover was up 18 per

The group opened 173 shops, taking the total to 900, of which 233 (210) are in the UK. It plans another 150 in the current year, with only a few in

UK operating profits fell from 16.5m to £11.2m. A new head of the UK retail business has been appointed, and more aggressive advertising is

In the US, profits rose from

Anita and Gordon Roddick: dividend rise reflected underlying confidence and showed extended view of business

21.5m to £2.1m, despite the £1.3m relocation cost. Retail sales were up 53 per cent, 3 per

Mr Roddick said that Chicago and Los Angeles, cities which had each had two stores and two new ones opened, had seen sales in the older stores fall 15 to 20 per cent. But he said each city would eventually support far more shops, and this was a short term effect. Profits from elsewhere in the world rose from £9.9m to £11m. Like-for-like sales growth was 6 per cent.

Mr Roddick said gearing had fallen from 43 per cent to 35 per cent, as deht reduced to £28.5m at the year end. Working capital had been cut. A \$45m (£29.2m) 7 year loan note had been privately placed in the US allowing the overdraft to be repaid.

Capital expenditure of £20m last year would fall to £12m in the current year, he said. Spending will be on new information systems, the cosmetics manufacturing side, and in the

overnight flight from Brazil, where she has been arranging supplies of Brazil nut oil, admits to being too tired to cope with her colleagues' excitement about her trip. She has escaped to ber busband Gordon's office and does not

intend to interrupt. Her hair - so wild in the press photos - is neatly tied back; the car park is full of cars, not bicycles; the writing on the lab wall "it is obscene to test something so unimportant as a moisturiser on an animal"

is not crazy. But it is Gordon that gives the Body Shop game away. There is a commercial company behind the image. He does not attempt to dis-

guise the problems Body Shop has met. They are typical of small companies which have "It has grown to a dimension

where you get the illnesses of giantism. When it was small you could drop an idea in one end and it would reach the other end in two weeks. It got to the point where it took two

An example he gives is a window display design created for the whole group. "People Mr Michael Ross, for eight would say it won't work in years a franchisee of Body

Shop, has been put in charge of international retailing. Body Shop has reached maturity in the UK, Gordon admits. But he reckons to attract more people into the shops through increasing the range of goods, and to become a more aggressive promoter.

With about half the group's profits made in the UK, maturity there inevitably means a slowing of the group's profit

But Gordon expects that ovarseas expansion will be atrong. Anita butts in: "When you think how big the planet is we are not a speck in the eye". Body Shop will open its 1,000th store this year, and only a quarter of them will be in the UK. But, the sceptic asks, retailera who venture

abroad have a low success rate. Gordon has evidently heen asked that many times. "The evidence is we have controlled it quite well." He puts the success down to franchising. Each country is run by a head franchisee. "They are all individual entrepreneurs, all keen to be successful. If we'd tried growth overseas in any other way l houestly helieve we would have failed. Boots pulled out of Canada after years there. Body Shop is trading very well in Canada," he says.

e puts the group's profit tall last year down to the poor ecoprofit fall last year nomic climate in the UK, the overbeads at Watersmead where the factory is running at only 25 per cent of potential capacity, and the costs of relocating the US head office.

These should be temporary problems. Similarly, Gordon asserts, the group's borrowing levels will fall as capital spending, £20m last year, reduces. He has no anxieties about the share price. "We are not in the arena to do acquisitions or

And he is relaxed about relations with the City, "They hate heaps of the things we say. I

raise cash to do anything".

Bibby hit by recession in Spanish construction sector

By Peggy Hollinger

THE EFFECTS of deepening recession in the Spanish construction sector has left J Bibby & Sons, the industrial and agricultural company, with sharply lower pre-tax profits of £6.5m, against £17.3m, for the six months to

March 27. The sharp decline, on sales 48 per cent higher at £416m, appears to have cast a shadow over the future of the dividend following a 30 per cent cut in the interim to 2p. Mr Richard Mansell-Jones,

Bibhy's profits were depressed by a £6.9m pre-tax loss in the capital equipment

division, which comprises Finanzauto, Spain's only Caterpillar distributor, and Stet, Its Portuguese subsidiary. Bibby, 79 per cent-owned by South Africa's Barlow Rand group, purchased Finanzauto last summer for £86m after a hostile six month long bid battle. The acquisition of heavily chairman, said a final payment indebted Finanzauto has also

per share dropped from 9.16p to

"will need to be considered in resulted in a sharp rise in light of the circumstances pre- interest charges from £2m to vailing at the time". Earnings

immediate outlook in Spain remained gloomy. Although equipment market.

recession in continental Europe and the Far East had made prospects uncertain. However, he was more optimistic about the IIS

Mr Mansell Jones said the

Finanzauto had been restructured, the beneficial effects had been masked by a further decline in the construction Mr Mansell-Jones also warned on the group's outlook in the second half, saying

> apiece.
> In addition, Norex is being issued 584,796 shares, at 342p, and has undertaken to retain the stake for 12 months from completion.

The two companies being acquired, Norex Insurance Brokers and Norex Financial Planning, produced brokerage of £7.2m in the year to June 30 1992 and an attributable profit of £47,000. Lowndes said that in addi-

tion to the shares being placed in relation to the acquisition another 1.1m were being placed for cash at 335p to provide funding for future oppor-

Pittencrieff improves 28% to £4.5m By Peggy Hollinger

PITTENCRIEFF, the natural resources and communications company embroiled in a hostile bid for USM concern Aberdeen Petroleum, yesterday reported a 28 per cent rise in pre-tax profits to £4.5m for the year to December 31. Sales were 83 per cent ahead at £18.7m. Mr Terry Heneaghan, the

chief executive who warned

last week that annual profits would not meet analysts' expectations of £5.5m, said the lower than expected return was entirely due to difficulties in integrating the 13 communications businesses acquired for \$23m (£15m) last year. "We had a bit of indigestion

trying to take on those 13 acquisitions," he said. However, the problems had been tackled and the group was currently making savings of more than \$100,000 a month from measures implemented since the year-end.

The communications division, which will be floated in the US this summer, saw a rise in monthly revenues from \$1m to \$2m. Oil and gas production rose by 9 per cent in 1992. Mr Heneaghan said the group expected to spend \$2.8m this year on capital expenditure in

Net debt rose from £4.9m to £11.7m. Mr Heneaghan said the group had more than adequate banking facilities to finance its offer for Aberdeen, which includes a cash alternative valuing the target at £8.7m. The final dividend is

increased from 3.5p to 4p, for a

total of 7p (6p). Earnings per

share fell 5 per cent to

BIBBY

INTERIM RESULTS

"The Company should, however, benefit from a good performance from its operations in the United States, from the positive impact of any recovery in the United Kingdom and from the actions taken in other geographic areas to reduce costs and improve efficiency. I remain confident of a material Improvement in the Group's profitability in the medium term. The propects for the second half year, however, are very uncertain because of the effects of the recession in mainland Europe and Japan."

> Richard Mansell-Jones, Chairmon 12 May 1993

Profits of Jessups, the Rom-ford-based car dealer, sliped from £189,000 to £160,000 pretax for the six months ended February 28

Turnover improved from £38.3m to £40.4m. The directors said trading conditions in the opening months of the period were particularly severe aggravated by an unprecedented fall in used

car values.

However, they added that they believed the worst of the recession was now behind them and that the group would respond well to a more stable trading environment.

Losses per share widened to 0.96p (0.24p) but in view of the improved outlook the interim dividend is maintained at 1.5p. Tha shares declined 6p to

COMPANY NEWS: UK

Fine Art up 16% to £34.4m

Heron Intl restructuring is 'flawed'

By Maggie Unry

lntaroational's financial restructuring is flawed and carries a "fairly high probability of default" according to one representative of the property group's bond holders.

Howaver, he accepted that the proposed refinancing, explained to bondholders in a 219-page document, would have to go ahead. The group is already surviving on the good-will of its banks, which have had to put up furthar new money. If there was a sugges-tion that tha reatructuring plan had to be renegotiated, he said, the banks would withdraw thet support.

In the document Price Waterhouse, the accountants, say that insolveocy proceedings would produce a lower pay-out to creditors and long delays in payments. The document sets a final date for the restructuring to be complete by July 31. Creditor meetings will be held at the end of June.

The business plan underlying the refinancing of Heron's debts, which totalled £1.7bn in November, when sterling a weakness increased the value of foreign currency borrowings, depends oo a recovery in the property market.

The bond holder representa-tive said that the structure of senior debt, junior debt and equity was meaningless since value of their homes.

servicing the senior debt alone requires an improvement in the property market. He said the different categories were no more than "entitlements to

whatever there is". The document details Heron's losses for the year to March 1992, when net losses of £693.1m produced negative net assets of £328m. On a proforma basis the restructuring would give the group net

assets of £12m. However, the document also says, "further material reduc-tions in values will need to be incorporated in the financial statements for the year ended March 31 1993." Also net assets would fall again because interest charges exceeded operating income and the fall in the pound had increased the foreign debt.

Four pages of the document are devoted to 27 legal cases Heron is involved in. These include a \$88m (£53.9m) claim from the owner of Pima, a US savings and loan company taken over by a government agency in 1990. The suit is against Mr Gerald Ronson. Heroo's chairman, and other directors and managers, but Heron has indemnified them.

Heroo'a housebuilding subsidiary is being sued by purchasers of properties in a Docklands development. They say council tenants were housed in the development reducing the

FINE ART Developments, the mail order and greetings card company, continued to buck the trend in the retail sector and yesterday unveiled a 16 per cent increase in pre-tax profits in the year to March 31. The record pre-tax outcome of £34.4m (£29.7m) was struck on turnover up 8 per

cent at £311.5m (£287.3m). The mail order side was the main engine of growth, contributing operating profits up 10 per cent at £22.8m from turnover of £171.1m (£150m). Both profits and turnover in the cards and paper products division grew by 2 per cent - to £19.7m (£19.8m)

and £140.5m (£137.4m) respectively. Sales at Express Gifts slipped 5 per cent to £89m, as did they did in the charity trading business to £22.1m, due mostly to tha recession-driven decline in average order values. However, sales in the ham-

COMMENT

As and when the recession recedes Fine Art should reap the rewards of the capital investment it has made during the slump. A thorough-going redesign of the cards, an increase in the retention of agents, and these better-than-expected results all augur well. Moreover the management has said that Fine Art's constituent businesses are running smoothly enough for it to explore expansion possibilities. A US manufacturing acquisitioo or a greenfield start-up there could be on the cards, as could an attempt to offset the UK mail order side'a Christmas bias. Although the shares - up 6p at 552p - stand at a not undeserved premium to the sector, they may not have too much upside, possibly limiting acquisition options.

central ITV Network.

The LWT money was half of what Sir Christopher described

as "the cost of his departure."

The other half of the £750,000

payment, which was intended

to compensate Mr Plantin for

his loss of LWT share options,

was paid by the ITV system. There was no sign of a share-

holder revolt against the man-

agement share acheme that

should net more than £55m

gross for 44 managers and create 15 LWT millionaires.

Oriel shows turnround to £74,000 loss

USM-quoted insurance broker, announced pre-tax losses of £74,000 for the year to end-December compared with profits of £2.44m in the previous 12 months.

The group also announced the acquisition of a used car breakdown warranty company for an initial £8.71m, funded by a £3.5m placing with partial

Oriel is paying £4.77m for Warranty Holdings' total share capital. It will pay one of the remaining shareholder-directors £200,000 in advance of a deferred payment acheme. It will also advance Warranty a total of £3.74m to settle debt.

Exiting shareholders will receive £3m, mostly in cash, while remaining shareholders will be paid £650,000 in ordiunlisted coovertible redeemable shares of 10p each.

Mr Peter Head and Mr David Latimer, the principal vendors, will continua as managing and sales directors respectively They stand to gain a further

ation, payable in 1996, depending on profits.

Warranty made pre-tax profits of £183,000 (£725,000) in 1992. At the year-end, it showed a oet deficiency of assets of £4.46m, of which £4.47m related to goodwill written off following a management buy-out.

Oriel said the acquisition would consolidate its strategy of developing businesses which control their own distribution networks focused on a high volume of low value transac-

The acquisition will be funded by a bank loan and a £3.5m placing with the Oman National Insurance Company at a premium price of 100p per share. Shares in Oriel climbed

6p to close at 84p. Qualifying Oriel shareholders will be able to subscribe for about half the new issue on an 8-for-I basis at the same price. Oriel's turnover dipped to £11.5m (£12m). The board pro-posed a final dividend of 3p (3.2p), giving an unchanged total for the year of 5p. Losses per share were 5.8p (earnings

Time Products clocks up 22% advance to £9.3m

any spanner in the works that could bring you nightmares in the future.

All the time and trouble we take pays off in the quality of the decisions we give you. Decisions which doo't simply protect you against bad debt, but which play a vital role in your overall development strategies. For instance, we can check out the strength of the links in your distribution chain. Something which could easily make or break your export success.

Trade Indemnity is the leading British credit insurer, and is sble to provide hoth political and commercial risk cover in virtually every country in the world. And at a highly competitive price.

At Trade Indomnity, we'll make surc the deal you bring home is worth the paper it's

For more detailed information about how Trade Indemnity can help your export husiness, contact Trevor Byrne on 071-860 2577 or talk to your broker.

Scottish TV chief paid £0.3m

By Raymond Snoddy

MR GUS Macdonald, managing director of Scottish Television, was paid a total of £319,700 last year, making him the highest paid director of the ITV com-

The sum included a bonus of £131,166 for winning the franchise, based on one a year salary at the 1991 rate. Scottish retained its franchise with a bid of just £2,000 a year in the 1991 tenders.

The company also has to pay 2 per cent of its advertising revenue to the government. This year the payments are expected to total £1.6m.

Kuwait to push for Opec quota boost

By Deborah Hargreaves

KIIWAIT IS expected to push hard for s higher production ceiling at the next meeting of the Organisation of Petroleum Exporting Countries, a move that is causing tension between ministers and could shake the oil market out of its current balance.

Mr Ali Ahmed al-Baghli, Kuwait's oil minister, has this week been stressing the emirate's demands for a higher quota with his claims that output will reach between 2.2m and 2.4m barrels a day by the end of June. Industry experts dispute Kuwait's capacity growth figures, saying produc-tion should reach 2m b/d by late June, but that level is significantly higher than present output of 1.75m b/d.

Opec has successfully managed to fine-tune the market in the past two months by trimming its output to 24.1m b/d in April (according to the international Energy Agency, the Organisation for Economic Co-operation and Development's oil market monitoring body). Although this is some 500,000 b/d above its overall production ceiling it is in line with demand, which has been rising slowly.

However, producing countries are now delivering their opening gamblts before naxt month's ministerial meeting while traders watch nervously. ready to push prices downwards at any sign of increased

"The apparent stability in the market is due to totally confused signals that are being given out by different sectors, said Mr Vahan Zanoyan, senior director at Petroleum Finance Company, the oil consultants Oil demand is growing, particularly in the Far East. The IEA said in its April oil report that It expected demand to rise by 1.5 per cent or 500,000 b/d in the second quarter.

That is tempered, however, by continuing news from Russia of declining production. The latest reports in Russian newspapers have pointed to a drop in output in the first quarter of 15 per cent to 610.7m barrels from 718.4m barrels in the corresponding period of

Mr Geoff Pyne, oil analyst at UBS, believes that Russia will have to begin cutting back on exports to the west this year as output declines further. He expects exports to drop to an average 1.1m b/d from 1.4m b/d

On the back of an increase in demand and continuing falls in production in Russia, Opec will be able to justify an increase in Its ceiling to about 24.6m b/d at its June meeting. That would represent a rise of about 500m b/d compared with the present output level.

Kuwait will argue for a substantial share of that increase as it continues its recovery from the Gulf war, but its demands will be strongly countered by Nigeria and Iran which are also looking to raise output. Improved relations between Kuwait and Tehran have led to rumours of a deal being arranged between the two to carve up any increased quota, but Saudi Arabia would also want its share of any rise

Mr Daniel Yergin, head of Cambridge Eoergy Research Associates, says the market is still dominated by Opec's "triangle of contection", between Saudi Arabia, Iran and Kuwait, all of which are anxious to cap-

Drumming up interest in Sakhalin crude

A fresh tender is to be held for foreign operators, writes **Hugh Fraser**

THE RUSSIAN Government has announced the second tender in two years inviting foreign companies to develop offshore oil and gas fields on the continental shelf of the far eastern island of Sakhalin.

The committee organising the tender, chaired by the scademician Mr Farmen Salmanov, held its first meeting in Moscow oo April 19,

The Russian authorities plan to hold up to five more tenders in the vicinity over the next few years, holding out the possibility of the Sakhalin waters becoming one of the largest offshore oil and gas regions in the world.

The second Sakhalin tender will cover fields with confirmed deposits and other areas where little geological data is available, in 23,000 square km (8.880 square miles) in the Sea of Okhotsk, East of Sakhalin, and 17,000 sq km in and around the Bay of Sakhalin in the North West of the

In May last year the MMM consortium consisting of Marathon Oil Company, McDermott International, and Mitsul & Company emerged as eventual winners in a tender contested by six groups of international

The consortium is now known as MMMMS, having been enlarged to include Royal Corporation.

Since winning the tender, MMMMS has spent \$80m on a feasibility study of the Lunskoye and Piltun-Astokhskoye fields, which have combined reserves of 400bn cubic metres of gas and 730m barrels of oil. The consortium is now negotiThe local administration of Kamchatka, in the far east of Russia, is preparing to open competition for gold mining rights in the southern part of the Kamchatka peninsular, writes Hugh Fraser. The tender will mark the first occasion oo which foreign companies have been invited to bid for rights to mine precious metals in Russia. It will be held in conjunction with the Russian

Federation's geological committee.

The three deposits contain about 90 tonnes of gold held in quartz. Interested companies will be able to buy packets of

geological data this summer. The Russian government holds a purchasing monopoly on all gold produced in the country. If a foreign company wins the tender the government will pay 25 per cent of the purchase price in hard currency and 75 per cent into a ronble account inside

The criteria for judging the tenders have yet to be announced but the administration says environmental safety is its top

ating with representatives of the Russian Government in Houston, Texas, about details of the deal, including profit sharing. Development costs will be in the region of \$10bn making it the biggest foreign investment under discussion in

One factor absent from the second tender will be the forceful personality of the former Governor of Sakhalin, Mr Valentin Fyodorov, who almost single-bandedly took on the Russian government in June 1992 when he refused to acknowledge MMM as the winning consortium. His interven-tion lead to a highly publicised struggle between Sakhalin and Moscow over which side owned tbe rights to the natural

President Yeltsin named a new governor of Sakhalin, Mr Evgeny Krasnoyarov, on April 8 following a virulent campaign by the local soviet to remove the former governor. Mr Keith Holmes, general manager of Shell Development

sbelf

Sakhalin said: "Fyodorov

fought hard to get extra bene-

fits for the island and took on

the might of the Ministry of

Fuel and Energy and the

Moscow access that leads to.

But as a direct consequence of his actions the project is proba-bly a year behind schedule". The administration of Sakhalin now appears to acknowledge the priority rights of Moscow. According to Mr Nikolai Arsenyev, vice governor of Sakhalin: "Unfortunately we are not in the same position as Alaska, where all the natural resources belong to the local

The Russian authorities hope to raise the profitability of future developments by sharing infrastructure costs among the various projects. But some foreign oilmen are doubtful about the feasibility of such an arrangement.

"Shell would not want to build a pipe line big enough to carry gas from future projects, even if they later turned out to be ours," Mr Holmes said. "If Shell knew 25 years ago what sea it might have achieved optimal efficiency. But life is not like that."

Ground rules for the new tender will be announced as soon as the final deal with MMMMS is signed - which may be as early as June.

Presentations are expected to be held in Sakhalin and Houston, Texas, and packets of geological information will be sold to interested companies.

Mr Peter Sadovnik, chairman of the Sakhalin Regional Committee of Geology and Mineral Resources, refused to indicate what the possible scale of recoverable reserves might be. "All the areas look promising. or we would not be holding a tender," be said.

He said that the tender zone would be divided into several blocks with varying quality of data, ranging from those where deep drilling had taken place to others where no preparation for drilling had been done.

Russian oil companies have made exploratory drilling of two fields inside the tender zone Kirinskaya, which contains mostly gas deposits, and Arkutunskoye, which contains mostly oil. The fields covered by the MMMMS negotiations are in the region of the tender zone, but will be excluded from the tender.

The Japanese State owned Sakbalin Oil Development Company (Sodeco) holds development rights for the Chaivo and Odoptufields under an agreement signed in 1975. A \$277m feasibility study of

the fields carried out by Sodeco in 1976 concluded that further development would not be economical under the conditions of the time.

Norway to streamline gas policy

By Karen Fossli in Oslo

NORWAY YESTERDAY announced sweeping reforms to gas policy designed to give foreign oil companies greater influence over their natural gas reserves and to facilitate more efficient gas resource

Speaking in Oslo to delegates of the Seventh European Gas Conference, Mrs Gro Harlem Brundtland, Norway's prime minister, said that foreign oil companies would be allowed representation in gas sales negotiations with potential buyers. Hitherto, gas sales negotlations have been conducted solely by the Gas Negottating Committee (GFU), comprising Statoil, the state oil company, Norsk Hydro and Saga Petroleum, the other Norwegian oil companies.

Mrs Brundtland said although she was pleased with the achievements of the GFU. adjustmenta were necessary to gas policy. The changes would enable closer links between resource management and sales activities to be forged in order to accommodate a more efficient system for gas disposal, she explained.

She also unveiled a new system in which gas fields would be designated as sources of supply for contracts under negotiation. Under the new scheme the energy and indus try ministry would decide which gas fields would supply a given cootract before its conclusion, instead of after.

Mr James Allcock, bead of gas purchasing at Britisb Gas, said he was pleased by Norway's announcement. "The GFU itself was formed to deal with some unsatisfactory elements in the negotialion relationships and now we see its structure evolving in the light of experience. As gas buyers we welcome the decision cover ing the sources from which contracted gas will come and we believe this will assist our negotiations," Mr Allcock said.

negotiating with tha GFU on contracting annual Norwegian gas supplies of 5bn cubic metres. Gas price renegotiations between Norway and Germany covering supply from the giant Norwegian North Sea Troll field have become protracted and arbitration could be called

for to resolve the issue. Ruhr-

gas, the big German distribu-

tor, has contracted 14bn cu m

of gas from the Troll field and

British Gas is at present

has an option that must be exercised by 1995 to take on an additional 7bn cu m. The GFU is calling for higher prices because of the advantages of gas over competing

WORLD COMMODITIES PRICES

S African mine group may miss out on Billiton assets

By Kenneth Gooding, Mining Correspondent

SOME OF the juiclest mining and metals assets which Gencor wants to buy from the Royal Dutch/Shell group might slip from the South African group's clutches because other companies have pre-emptive

rights to them. This means that Shell's mining and metals business, Billiton, must give its partners in the joint ventures an opportunity to match any terms it is willing to accept from a third party.

The assets involved are: The Boddington mine in Western Australia, which last year produced nearly 352,000 troy ounces of gold. Billiton owns 30 per cent and its partners are Reynolds Metals, the US aluminium group with 40 per cent. Newcrest, the Austra-lian mining company, 20 per cent and Kobe Aluminium Associates of Japan, 10 per

 The associated Worsley Alumina business, which mines bauxite, aluminium ore, and refines it into alumina, an iotermediate product. Worsley's annual capacity was recently expanded to 1.5m tonnes of bauxite. The shareholders and their holdings are the same as for Boddington. · Alumar of Brazil, which produces about 1m tonnes of alumina and 350,000 tonnes of

owns 40 per cent of the alumina refinery and 47 per cent of the aluminium smelter. Alcoa of the US owns the rest. Valesul, another Brazilian aluminium producer (annual capacity 92,000 tonnes) where Billiton owns 41.5 per cent. Cia Vale do Rio Doce of Brazil 49.5 per cent and Multisilicon 9 per

 The Collabuasi copper project in Chile, expected to start up in 1996-97. A company owned by Minorco and its parent Anglo American Corporation of South Africa recently paid \$190m for a one-third stake in Collahuasi. The rest is shared equally by Falconbridge of Canada and Billiton.

Whila Billiton's partners in these joint ventures are suffering financially because of present low metal prices, they might be reluctant to pass up the opportunity to acquire more of these assets. Mucb will depend on the prices Gencor is ready to offer - there are indications that these might be what other companies would consider to be on the high side. It is suggested that Gencor is willing to pay more than the \$1.8bn book value of the Billiton assets because the move is of tremendous strategic importance to the South African

group. Other interests Gencor has bid for include: the Cadjebut lead-zinc mine in Australia (Billiton, 42 per cent); the wholaluminium a year, Billiton ly-owned Selbaie copper-zinc

operations in Canada; Cerro Matoso nickel (52.3 per cent) in Colombia; the Bogusu gold mine in Ghana (81 per cent); the Lerokis gold mine in Indonesia (90 per cent); and the Perlng lead-zinc operations in South Africa (100 per cent).

Gencor obviously has great faith in the future of aluminium – it is backing a \$2bn project in South Africa for Alusaf to build a 466,000-tonne aluminium smelter, the western world's biggest ever - and so, apart from the previously-mentiooed operations in Australia and Brazil, it has also bid for Billiton'a other alumina operations: Paranam in Surinam (76 per cent) and Aughin-

ish in Ireland (35 per cent). Gencor also wants Billiton's global metals trading and marketing network - which would certainly help sell some of the extra aluminium from Alusaf. Billiton's other downstream operations are conspicuous by

their absence from the list, the most glaring omission being the half-share of the Budelco zinc smelter in the Nether-South African exchange control rules prevent Gencor exporting cash to pay for the

Shell assets, so it will have to borrow a great deal if its offer succeeds. However, Shell has given Gencor and its adviser. S.G. Warburg, an exclusive option allowing them 120 days grace in which to work on that

Zinc concentrates shortage forecast

By Kenneth Gooding,

TODAY'S HUGE surplus of zinc concentrates, the raw material used by smelters, will swing into a big shortfall in the next two to three years, warn consultants Brook Hunt & Associates.

The shortfall could rise to 1.2m tonnes by 2,000 and 2.8m

tonnes in 2,005. Brook Hunt says in a new study that the problem is being caused by today's low prices and smelters' high treatment charges, which has made about half the western world zinc mine capacity uneconomic and caused the closure so far in 1993 of 400,000 tonnes of mine capacity.

The study identifies those

smelters that might lose their concentrate supplies because of mine closures and says several companies which today rely on their own mines may be forced into the custom concentrate market in future. The Zinc Concentrate Market to 2005: £8,000 from Brook Hunt, 11 London Street, Chertsey, Sur-

rey, KT16 8AP, UK.

Floodwaters cover half of Argentina's arable land

By John Barham In Buenos Aires

FLOODWATERS NOW cover about half of the grable land in the Province of Buenos Aires, Argentina's prime farming region, according to government officials. The heaviest rainfall in the province's recorded history has flooded some 4m hectares of farmland, cut off towns and villages, and washed roads away.

Officials now estimate flood damage at about US\$400-500m. Earlier this week, the government had put damage in the region of \$100m. Most of tha damage has been

concentrated in the north-west and south-west of the province, but waters are now slowly spreading across the flat Pampas to the south-east.

Mr Felipe Sola, federal agrisaid yesterday that much of the province's soyabean output had been lost. He added that Banco de la Nacion Argentina, the government-owned commercial bank, and the Central Bank would refinance farmers' debts over four years with sub-

Slaughterhouse strike continues

By Hilary Barnes in Copenhagen

TRADE UNION and employer representative resumed talks bere yesterday to find a solution to a 19-day strike by 16,000 abattoir workers, which has paralysed the pigmeat export

The strikers were expected to return to work this week, but they rejected a mediation agreement by a large majority in a membership ballot.

The conflict is primarily over working hours and the organisation of the working week. not pay.

MARKET REPORT

A higher than expected rise in the April US Producer Price Index helped to steady London GOLD and SILVER prices and lift early Comex prices. Gold bounced from an early dip on good physical business in London, dealers said. The market was still digesting the recent Goldsmith Newmont Mining shares sala and awaiting the return of physical demand, dealers said. COPPER continued to raily away from recent 51/2-year lows on the LME. with sentiment becoming slightly more positive whan the technical rally lifted three-month Three-month NICKEL fell below

LONDON STOCK EXCHANGE

Rate hopes spur fresh gains in shares

By Terry Byland, UK Stock Market Editor

INTEREST RATE cuts in Germany and elsewhere in Europe provided a favourable background for a UK stock market featured yesterday by the successful reception for the pricing of the Zeneca rights issue which triggers the demerging of ICI. Last-minute fears that the Zeneca issue might bring surprises proved unfounded and the terms and size of the rights offer were comfortably in line with the market's original expectations.

Equities were in good form from the opening, helped hy Wall Street's strength over-night and led forward throughout hy a good premium on the FT-SE 100 index June future contract. A larger cut than expected in the Bundesbank's 14-day repurchase rates, widely regarded as the precursor to e reduction in Lombard and discount rates next week, strengthened hopes that a beleaguered UK government can be bounced into lowering domestic base rates.

The FT-SE 100 closed 24.7 points ahead at 2,860.8, just below the best of the session. In late trading, London brushed off a sluggish opening to the new session on Wall Street, which was 5.2 Dow points off in London hours. Trading volume increased to

773.6m shares, swollen by good

pharmaceutical company to be demerged shortly.

conventional ICI shares, and grey market dealing in postmerger ICI, in Zeneca ex-rights shares and in Zeneca nil-paid rights. Investors appeared to be moving towards the conventional ICI shares rather than Zeneca, the bioscience and

holds a 27 per cent interest.

Kong market,

test of confidence unless it clears the 2,900 mark. Second-line stocks, which suffered much less in last week's sell-off, have also fared

better than the Footsie shares

Yesterday, the FT-SE Mid 250 Index gained 13.7 points at 3,145 and is now within 10 points of its all-time peak.

Retail, or customer, volume in equities, which is regarded hy fund managers as the most convincing guide to the market's health, has remained satisfactory, if not exciting, over the past week. On Tuesday, Seaq trading of 676.8m shares was worth £1.29bn in retail

Strong performances among bank and oil shares led the blue chip sectors ahead yesterday. Selective US demand was seen, although London traders somewhat over-anticipated this during the first half of the ses sion and were caught out hriefly when Wall Street proved slow to follow through after its 25-point gain oo the previous day.

Zeneca pricing dominates

THE SWAN song for ICI in its existing form, marked yesterday by the pricing of the £1.3bn demerger rights issue, saw investors apparently moving away from Zeneca, the new bioscience operation which is being spun off. While shares in existing ICI shares progressed gracefully, this performance masked some brisk position-

Turnover in the existing shares of the company was, at 6.4m, far larger than normal but the share price rise of 22 to 1285p merely countered the

previous day's fall.
The unofficial market, sanctioned by the stock exchange and now involving 17 marketmakers, saw a shift of emphasis. ICl-ex demerger shares were actively bought up from 569p to 609p on turnover of sold down 18 to 664p with 5.1m traded and the Zeneca nil-paid shares fell 20 to 66p with vol-

ume of 3.8m. The Zeneca side of the trading had prompted some confusion because the original "grey market" set up by Salomon Brothers on April 26 had been

trading Zeneca cum-rights rather than ex-rights. Consequently, the heralded Zeneca price of 600p a share seemed more generous to some than it

actually was. There were also some cynical comments that the idea of a one-for-three cash call had been so thoroughly floated by lead broker S.G. Warburg that when the terms came in at 5-for-16 the relative benefits encouraged huyers.

Ultimately, the consensus was that new buyers were not the chief factor in the market yeeterday. Marketmakers, arbitraging hetween the old and new prices, and institu-tions hedging underwriting commitments were more influential in the day's dealings.

Sainsbury hit

Final results from J. Sainsbury came in at the bottom end of the market range and this, together with a swathe of moderate downgrades, led the shares down. Food retail specialists' attention was also focused on the level of earngrowth the supermarket group was likely to achieve in the next 12 months. After a sharp increase in recent years, Sainsbury, in common with other supermarket groups, has shown a marked slowdown. Bears of the sector regard this as a major sea change, with food retailing in a mature stage and unlikely to repeat the recent earnings growth success. One cantious analyst concluded: "Sainshury shares are in for a dull time."

However, the stock still has its supporters. Mr Andrew Burnett at NatWest Securities, which reiterated its positive stance yesterday, said the com-pany had the potential for continued growth through its dominant position and its ability to "turn the screw on the compe-tition". Sainsbury shares ended the day 14 down at 467p in turnover of 6.7m. Most brokers brought their forecasts back to around £830m for next year.

Rolls contract

Shares in aero engine group Rolls-Royce leapt forward in the last few minutes on news thet Continental Airlines. which recently emerged from Chapter 11 bankruptcy protec-tion, had placed a \$4.5bn order for 92 Boeing aircraft, includ-ing a high proportion powered

by Rolls-Royce engines. The firm order includes 25 Boeing 757s (with an option on another 25) to be powered hy Rolls-Royce engines, and the company put the potential value to the British aero engine group at £375m. The shares started moving ahead just after lunch, although analysts initially ascribed that interest to a positive presentation from the company at its industrial power division on Tuesday. However, there were suggestions that the early demand may have come from US buyers already aware of the impending contract announcement. With delivery set to begin in 1994, analysts expect a spate of upgradings of

Rolls-Royce profits for next year. The shares closed 5 better at 138%p. Turnover was

Rank upset

Nervousness ahead of today's annual meeting of the board with City analysts upset Rank Organisation and the shares tumbled 14 to 696p, although volume was weak. One leading securities house also took the opportunity to turn negative ahead of the meeting, believing that some poor overseas trading news was likely to be disclosed.

This is likely to include continuing concern over the Japanese photocopier market. One dealer said that the shares' decline yesterday had been triggered because a line of stock was on offer at 700p and buyers were unwilling to commit themselves ahead of the

EQUITY FUTURES AND OPTIONS TRADING

THE REDUCTION of interest rates in several European countries led to good buying in the derivatives, sending the futures contract sharply ahead and boosting volume in traded

options, writes Joel Kibazo. The first trade in the June PT-SE 100 Inture contract was struck at 2,851 and buying said to liave come from Nat-West Securities and UBS drove

slight hill then followed before the surprise announcement of a cut in the Bundeshank's 14day "repo" rates once again propelled it forward.

The interest rate reductions in the Netherlands and Belgium in the afternoon only served to increase demand, which eventually led to a slight squeeze. The day's high

it forward in the first hour. A of 2,880 was reached just 100 option were particularly before the market close at around 4pm, and following some profit-taking June ended at 2,877, up 33 from the previous close and some 11 points above its fair value premium to cash of about 5. Turnover

was 11.306 lots. Volume in traded options rose to a hefty 40,729 contracts. Dealings in the FT-SB

heavy, reaching 15,160 lots, but that in the Euro FT-SE option was a modest 2,668 Glazo was the busiest stock option with 3,833 trades, followed by J. Sainsbury at 2,188. Dealings began in seven new stock options: Royal Insurance and NatWest were particularly well received, trading 1,886 and 1,403 respectively.

A positive annual meeting hoosted Tl Group and the shares improved 12 to 337p. A for the first half at Simon

A sense of relief greeted results from Body Shop, the anticipated fall in profits to £21.5m from 25.2m at the ton end of forecasts. The shares which have underperformed

Dollar firmer on inflation data

pean trading yesterday after US inflatinn figures turned out to be higher than expected and the Bundesbank again eased mnnetary policy, writes James

The US currency has been in the throes of a good recovery since the start of the week, after the market took the view that last Friday's nnn-farm payroll figure was not as bad as some dealers had antici-

Yesterday, the dollar peaked at DM1.6135 after US producer prices rose 0.6 per cent in April against market expectations of a 0.3 per cent gain. It later closed in London at DM1.6115, up nearly 1/2 a pfennig on the The higher inflatinn figure

underlined the belief of some dealers that US short-term interest rates have hottomed out at about 3 per cent, and that the fed funds rate could rise before the end of the year. Mr Paul Chertkow, ginbal currency strategist at UBS in London, believes that today's US retail sales figures for April will be watched closely. "We need a good retail sales figure to show that, by June, there will be a run down of the large

THE DOLLAR remained firm inventories made in the first against the German currency and second quarters of this nn Tuesday, clusing dnwn 1 year," he said. The market's forecast is for a rise of around

0.6 per cent on the month. Mr Chertkow believes that increasing signs of a pick up in the US economy will set the scene for a rise in the fed funds rate hy 1/4 a percentage point after the summer. His 3-month fnrecast fnr the dollar is DM1.72.

The Bundesbank yesterday surprised dealers hy cutting its repo rate by 11 basis points to 7.60 per cent for both 14-day and 28-day funds.

The move helped to alleviate pressure on the Danish krone in the run-up to Tuesday's ref-erendum on the Maastricht treaty. The krone closed yesterday at -46 percentage points nf divergence against its central Ecu rate, compared to around 50 percentage points at

pfennig nn the day at DM2.4700.

A dealer at one of the major London cnunterparties sa there had been strong sell nf the pound by the Bank England at DM2.4800. The authorities still need to bu up reserves following expulsion of sterling from exchange rate mechanism

The peseta also came un very strong selling pressure Europe yesterday, although Bank of Spain again appea able to hold the exchange through intervention.

There were reports th Spanish banks were acting proxies for the authorities. selling dollars and buying D-Mark to help build up Sp the start of the week.

However, sterling lost some of the ground it had made ish reserves. The peseta clos at Pta73.56 to the D-Mark from the ground it had made ish reserves. The peseta clos at Pta73.35 to the D-Mark from the ground it had made ish reserves.

1-pag. 3-mat. 6-mat. 12-pag. 1-5285 1-5234 1-5127 1-4954 **MONEY MARKETS** Surprise repo rate cut (11.0

EUROMARK futures rose sharply across the board yes-terday after the Bundesbank surprised financial markets hy cutting its repo rate more aggressively than had been expected, writes James Blitz. The Bundeshank cut the repo rate, which sets the cost

points to 7.60 per cent on both 14-day and 28-day maturities With Germao call mooey hovering at around 7.73 per cent at the start of the day. there had been little expectation of a significant easing in policy, since official interest rates and market interest rates were more-or-less in line.

of leoding short-term funds to

commercial banks, by 11 basis

UK clearing bank base lending rate 6 per cent from January 26, 1993

Hnwever, yesterday's move by the Bundesbank raised new expectations that the official discount rate, which sets the floor for money market rates, will be cut at the central bank's next council meeting on

call money German yesterday fell to a close at 7.68 per cent, putting it back to the level it was at before German unificatinn.

One London-based dealer suggested yesterday that £210m. The nvernight rate was lower rate floor once the cost

of overnight mmey has fallen to 7.50 per cent. The betting in some banks yesterday was that, if this was the case, the discount rate would be cut by 25 basis points on that day.

The cut raised expectations that the Bundesbank is easing policy more aggressively than had been expected. The June Euromark contract rose 8 basis points on the day to close at 92.91. This assumes that there are another 29 basis points to come off 3-month money in the

next four weeks. French franc futures rallied even more strongly in the belief that yesterday's mnve opens the way for more cuts in France's official interest rates.

The June Pibor contract was up 18 basis points on the day, to close at 92.66. The September contract was up 17 basis points to close at 93.40. Sterling markets were quiet following several days in which speculation has spread that there will be another cut

in UK base rates this year. Three month money was a fractinn tighter nn the day. closing at 54 per cent from a previous close of 5% per cent. This was partly due the difficulties removing a sourtage of £600m in the discount market, for which there was late assistance of pressure will come nn the at 6.50 per cent at one stage of

dampens sentiment

Wall Street

A BIG fall in bond prices, triggered by bad inflation news, depressed sentiment on US stock markets yesterday, leaving prices flat-to-lower in light trading, writes Patrick Harverson in New York.

At 1 pm, the Dow Jones Industrial Average was up 4.70 at 3,473.45. The more broadly based Standard & Poor's 500 was down 0.38 at 443.98, while lower at 427.22, and the Nasdaq composite down 1.28 at 681.78. Trading volume on the NYSE was 145m shares by 1 pm, and declines outnumbered rises by

950 to 815. After Tuesday's solid gains. equities may have been expected to advance further yesterday morning, possibly to new highs on the major indices. Those chances were scuppered, however, by unexpectedly bad news on inflation, which came in the form of a 0.8 per cent rise in the April producer prices index. Not only had anaonly 0.2 per cent in the PPI, hut the "core" measure of pro-ducer price inflation, which

energy prices, was also wortystrong at a 0.4 per cent

The had inflation figure npset the bond market, where the benchmark 30-year issue quickly fell hy almost % of a point, pushing the yield up to 6.87 per cent. This increase in bond yields, and the fear that rising inflation could, at some stage, persuade the Federal Reserve to lift interest rates, unsettled equity market investors, setting the tone for a downbeat opening to trading.

Retailers were in the spot-light after some of the industry's biggest groups reported quarterly earnings. Wal-Mart umped \$1% to \$27% in volume of 2.6m shares after announce ing first quarter profits of 20 cents a share, up from 17 cents a share a year earlier. The company also said that first quarter sales rose 19 per cent to a record \$13.9hn.

in contrast, Woolworth fell \$1/2 to \$29% after the company announced disappointing earnings of only 1 cent a share, down from 13 cents a share at the same stage of 1992. Federated Department Stores, however, fared better, the stock rising \$% to \$21 on the news that extraordinary items, was

lightly higher than a year ago. Philip Morris, which posted strong gains last week on the news that its main rival in the domestic cigarette market was no longer offering discounts on its cheap brands, ran into further profit taking, and fell \$1% to \$50% in volume of 3.2m

Chevron climbed \$1% to \$87% on the news that the company has already booked initial reserves of 1.1bn barrels of oil from its Tengiz venture in the former Soviet republic of Kaz-

Canada

TORONTO was moderately lower at midday, with losses seen in gold and transport shares, as the market continued to consolidate in quiet Canadian bonds along with a slide in the Canadian dollar, also weighed on the market. The TSE 300 Composite Index fell 8.54 to 3,771.82 in volume of 32.8m shares. Gold shares slipped on profit-taking following recent gains.

Rise in inflation data Mixed performances after rate cuts

FT-SE Eurotrack 100 FT-SE Eurotrack 200

THE reduction in German CAC-40 index, which gained money market rates, which sparked a fresh round of interest rate cuts on the continent, was also taken to indicate that the Bundesbank will ease the Lombard and discount rates

soon, writes Our Markets Staff. The cut did not surprise strategists, who had been expecting an acceleration in the process by the middle of the year. Mr Andrew Bell, of BZW in London, noted that there had been signals from the Bundesbank thet it was to step up the pace of cuts and said that the next few months would see a continuation of the process. "Rate cuts are a necessary damage limitation exercise owing to the state of the

economy in continental Europe, not a bonus," he said. He now forecasts German interest rates of 4.5 per cent by next spring. However, this should be accompanied by a spate of sharply reduced company earnings forecasts over the next quarter, a further indication that 1994 is unlikely to provide the hoped for counce" in growth.

PARIS paid little attention to the hase rate cut, turning instead to a raft of mixed first quarter sales figures. The 1 per

SOUTH AFRICA COR, which has inced plans to unbundle GENCOR, its non-mining interests, closed 15 cents lower at R11.80. The overall index gained 17 at 3,763 and industrials 22 at 4,401. The golds index improved 14 to 1,444.

The Brussels bourse was and steel cord producer, among the best performreturned to profit last year ing European equity and more than doubled its net markets in the first quarter of

dividend. But recession is still the dominant economic factor in continental Europe. Results from other cyclicals and, in particular, their gloomy predictions for the rest of 1998, have punctured the optimists' forecasts of an upturn within nine

For example, Arbed, the Luxembourg steelmaker, was the best-performing stock of the first quarter, with a 61 per cent increase on the beginning of the year. But it lost LFr2.9bn (\$88m) in 1992, and warned last month that it would be unable to pay a dividend in 1993. Belgium's exporters - which

means almost all its large companies - have also suffered from the strength of the Belgian franc against recently

devalued European currencies. Glaverbel, the glass-maker, complained publicly that "com-petitive devaluation" last year had allowed some of its rivals, such as Pilkington, of the UK,

to undercut prices. Chemicals and steel producers have experienced similar price competition, exacerbated by cheap imports from eastern

Europe. Speculation on individual large stocks has also failed to bear fruit. The hardy Brussels perennial – possible divest-ment of holdings by Société Générale de Belgique – has yet to flower, and widespread rumours of a takeover bid for Petrofina, the oil and gas producer which is Belgium's larg-

est industrial company, have

been cut down hy the most likely suitor, Elf-Aquitaine, of France, and the group's principal shareholders. The shares now stand at BFr8,160, having touched BFr9,750 a month ago.

n the near future, then, the outlook for the bourse must he gloomy, with investors waiting until the Sep-tember results season for solid

evidence of trading conditions. The exchange has a new president - Mr Henri Servais of brokerage firm Dewaay, Servais - who has pledged to attract some of Belginm's extensive individual savings towards the bourse and away from government bonds. In the current climate, he may find that he has his work cut out.

...the only thing printed red in our accounts is the company name.

By continuing to meet the special communication needs of discerning organisations, the five UK Ascom companies report a profitable 1992 with after tax profits more than doubling to £3.8m on turnover of £71.2m (£43.8m).

Ascom technology can be found in Financial Institutions, P.T.O.s, Police Forces, Fire Brigades, Railways, Water Companies, Government Establishments, Hotel Chains and High Street Stores. In fact wherever quality and dependability count, the Ascom name is there.

Choosing Ascom could help your profitability in 1993.

Pearls in a cobalt sea: the exotic Spice Islands are on the tourism map Page 4

BACIFIC

President Suharto's election for a sixth term of office has muted discussion of Indonesia's political future. Concern now focuses mainly on the economy as domestic consumption increases while output of oil, the main currency earner, declines. Victor Mallet reports

Everything to play for

President Suharto for his sixth term of office as Indonesia's undisputed leader has temporarily dampened the long-running debate about who should succeed him - he is 71 - and about how the country should engineer a peaceful transfer of

A more urgent topic of discussion these days among apprehensive indonesians in the capital Jakarta, and in booming industrial towns like Surabaya in East Java, is the future of the economy.

For the past 25 years Indon-esia has successfully followed

a pattern common to several fast-growing south-east Asian economies, absorbing foreign aid and investment and exploiting its own natural resources to finance the creation of labour-intensive export industries.

With oil production falling and domestic energy consumption rising, Indonesia may become a net importer of oil in the next decade, but textile factories, shoe companies and television plants, springing up on what were once Java's ricefields, are replacing lost reve-

The \$5hn of manufactured

goods exported annually is now un a par with gross exports of crude oil. Poverty is declining and last year Indonesians continued to enjoy real economic growth of almost six

per cent. Yet just as Indonesia faces the need to spend tens of hil-lions of dollars on industry and on the infrastructure projects required for further growth power stations, roads, ports and telecommunications, not to mention schools or the \$16bn plan to develop the offshore Natura gas field - It is meeting some unwelcome competition for investment funds from China, india and Viet-

Foreign investment flows to Indonesia appear to have peaked and domestic investment has fallen sharply, prompting officials from President Suharto downwards to promise improved incentives and new measures to cut through Indonesia's notorious red tape.

Mr Saleh Afiff, the senior minister who oversees the economy and finance, acknowledges that Indonesia's rivals are economic threats. "We have to compete for funds which are shrinking," he says, "A couple of years ago, no-one would go to Vietnam. Ten years ago China was small. Suddenly they are in the field and we have to compete."

Some of Indonesia's prob-

lems are geographical. With about 187m inhabitants - more than the other five members of the Association of South East Asian Nations (Asean) put together - it is the world's fourth most populous nation and has plentiful supplies of cheap labour to tempt inves-

The territory ruled by Jakarta, however, extends nearly 5,000km across more than 13,000 islands.

Indonesia encompasses the intensely Islamic people of Aceh on the northern tip of Sumatra, the densely populated main island of Java, the tourist resorts of Bali, the island of Flores (where more than 1,200 residents were killed hy an earthquake and tidal wave in December last year), the Christians of East Timor (the former Portuguese colony where Indonesian troops shot dead at last 50 supporters of separatism at a funeral in 1991), and the primitive tribes of Irian Java in the east.

Even if investors confine themselves to the relatively manageable logistics of Java, as most do, they cannot avoid nationwide problems of bureaucracy and corruption which earn Indonesia a reputation for some of the highest hidden husiness costs in Asia.

Another, related deterrent for investors is the tendency of the President's children to seek and win lucrative contracts ECONOMY: sound but too slow; POLITICS: what follows Suharto's sixth PAGE 2 ENERGY: lots of coal but oil runs shortPAGE 3

IN THIS SURVEY

and monopolies, for everything from toll roads in Jakarta to orange trading in Kalimantan, and to take stakes in joint ventures against the better judgment of the other partners; foreign antrepreneurs and ethnic Chinese husinessmen wince at the mere mantion of the companies controlled by the President's children.

It is not just that such corporations may make only limited contributions in the form of expertise or capital; critics say their presence could actually make it more difficult for a venture to raise finance because of the reluctance of foreign banks or international financial institutions to lend to pulitically influential figures over whom they have no lever

The latest transaction to arouse concern was the quiet privatisation, without open tender, of part of Indonesia's state satellite communications business. It emerged that a business headed by the presi-dent's second son had acquired 60 per cent of Satelindo, a new holding company, with two state telecommunications bodies holding the rest.

Another concern among the economic "technocrats" who have steered Indonesia down the road of export-led growth is power of Mr B.J. Habibie, the eager minister of research technology.

☐ Continued on Page 6

SOME PROPERTY COMPANIES BUILD OFFICES

WE BUILD CITIES.

Cities, new towns, industrial estates and resorts. That's the future for Indonesia and LIPPOLAND is playing a leading role.

Look at the facts.

Indonesia is the world's fourth largest country with 180 million people and a growing urban middle class with more disposable income. Income to spend on homes and leisure.

The manufacturing sector alone is growing at 13% annually - twice the national GDP - and an important source of jobs for the 2.3 million people joining the labor market every year.

In LIPPO CITY we have developed 2000 hectares of marginal farmland into a premier industrial estate - it's so large you can drive for 8 kms and still be inside the estate boundary.

In LIPPO VILLAGE, pictured above, we are building a 500 hectare fully integrated new town with a modern central business district, schools, a hospital, shopping and recreation facilities - home for 40,000 people. And the demand is there. Last month we sold 750 houses in just three days.

Which is why at LIPPOLAND building office developments is only part of the story.

THE LEADING EDGE IN REAL ESTATE.

ANNOUNCING

SPECIAL TRADE EVENT

Indonesia is one the fastest developing nations in Southeast Asia. With its vast natural resources and large population (world's fourth largest), it enters and exciting and challenging period of economic growth, and offers many outstanding opportunities, particularly in the trade sector.

Resouce Indonesia '93 runs from October 26-31, 1993. It is being organized by the Ministry of Trade through the National Agency For Export Development (NAFED), in cooperation with different Government Ministries, as well as the Chamber of Commerce and Industry and various commodity associations.

Resource Indonesia '93 will be held at the Jakarta Fair Grounds Kemayoran Centre, a sprawling complex of 16,708 square meters in the center of the city. Over seven hundred exhibitors are expected to display their latest innovations.

ON DISPLAY

Yarn, Textiles and Textile Products, Apparel and Accessories: Women's Wear, Men's Wear and Children's Wear, Toys, Footwear, Cosmetics, Herbs, Home and Office Furnishings, Processed Food and Beverages, Sporting Goods, Chemical Products, Plastic Products, Rubber Products, Paper and Paper Products, Components and Automotive Spare Parts, Glassware, Electronic and Electrical Equipment, Means of Transportation, Wooden Products and Building Materials, Metal Products and Machineries, Heavy Equipment, Plained Craft, Textile Craft and Fashion Accessories, Plantation, Woodcraft and Furniture, Various Handicraft, Fishery, Fodder and Horticulture, Various Spices and Volatile Oil, Forest By-Products, Medicines, Mining and others

> NOW'S THE TIME TO MAKE YOUR PLANS

For buyer interested in top quality goods and services, and ready to do business lakarta is the place this year and Resource Indonesia '93 is the reason

The economy is basically sound but growth is not fast enough, writes William Keeling

An untried team takes the helm

THE business community has so that a sudden devaluation heen alive with gossip since the March cabinet reshuffle. Businessmen's concerns range from whether the economic ministers have the political support to push through further deregulation to whether the cahinet backs deregulation

The new government has taken over a macro-economy in relatively good fettle. in the last financial year, ending March 31, non-oil exports such as textiles, shoes and consumer electronics - grew an eetimated 21 per cent to \$22.98bn allowing the country to maintain a small trade sur-

The cost of servicing foreign deht, bowever, resulted in a current account deficit of about \$3.75bn in 1992/93, hut this is a significant improve-ment on the \$4.4bn deficit a vear earlier.

Not all the indicators are positive. Public and private international deht (with the latter making up an increasingly large proportion) rose from \$80bn at the end of 1991 to \$85bn-\$90bn last December, although there has been a rise of almost equal magnitude in net foreign assets held by the banking sector.

The deht service ratio remains stubbornly bigb at about 32 per cent of export proceeds, exacerhated hy the recent appreciation of the yen in which 40 per cent of public foreign deht is denominated. Although Japan remains Indonesia's principal export market, trade in the four leading products - oil, liquefied natural gas, plywood and shrimps - is denominated in dollars.

Fears over Indonesia's ability to service its foreign debt have led to speculation within the business community that the government may decide on a sharp "one-off" devaluation of the rupiah.

Such fears are almost certainly unfounded, not least hecause the government already has a pobcy of "staggered depreciation", lowering the value of the ruplah against the dollar by about seven per cent a year.

Indonesia also operates a free foreign exchange regime, could spur mass capital flight; it would lead to a surgs in inflation - already running at about 10 per cent a year - from higher import costs; and inflation and the need to protect against capital flight would result in spiralling interest

The removal, however, of Messrs Radius Prawiro, J.B. Sumarlin and Adrianus Mooy, the three main economic technocrats of the last cabinet, has raised concerns over the gov-ernment's ability to keep a tight rein over the economy. Their replacaments - Mr

Saleh Afiff, Mr Mar'ie Muhammad and Mr Sudradjat Djiwandono as coordinating minister for the economy and finance, finance minister and central bank governor respectively are largely unproven and may lack the team-spirit developed by their predec

One safeguard against e dramatic policy swing is the need to placate donors, such as the World Bank and the Asian Development Bank. Indonesia remains reliant upon donor aid - commitments in 1993/94 are expected to total about \$5hn when donors meet in Paris on June 29-30 - to cover its current account deficit

And in spite of rumours, there is little evidence the new ministers plan anything other than to maintain prudent economic policies, Indeed, they have come out with surprisingly strong statements on the need to liberalise further and faster if Indonesia is to remain competitive with China and Vietnam, its two main rivals. While inflows of foreign

and domestic investment, particularly from the Indone Chinese community, has fallen it is difficult to imagine the trend of over six per cent annual growth being broken

investment may have peaked -

under the new administration. The question facing Indonesia, however, is whether six per cent growth is good enough. While developed economies would be delighted with growth at half that rate, Indonesia is not only starting at a low base - average per capita income is \$620 a year - but it must absorb over 2m entrants to the labour market each

Government ministers say seven per cent is the maximum growth the country can achieve without the economy overheating. The fect, bow-ever, that Malaysia and Thailand can maintain 8-10 per cent growth, and China is currently growing even faster, suggests that major impediments still exist within the Indonesian economy.

It does not take a sleuth to see what the impediments are. Whereas export-oriented industries operate in e relatively free environment, the domestic economy remains hlighted by public and private monopolies enjoying a high degree of tariff

Donors highlight the emerging petrochemicals sector as en example of where the country is going wrong. The government recently introduced a 25 per cent import tariff on polypropylene resin alongside a 30.40 per cent import tariff on plastic films with which the resin is made.

Such tariffs allow politically well-connected husinessmen to build petrochemical plants with little regard to minimis-ing cost and still record hand-

some profits. Inefficiencies of this type affect almost every sector of the domestic economy from telecommunications to foodprocessing where the government's control of sugar imports keeps the cost of a key raw material high.

Donors are also concerned at the level of government subsidy to state-owned high-tech-nology industries such as aircraft manufacturing and ship-huilding. Ministers concede the industries make e loss but say finance is limited to the Rp660bn allocated under the state budget. Donors, and officials from the industries themselves, say funding is far higher, possibly exceeding

Rp3,000bn e year. While the government officially operates a balanced budget, donors say about \$1.5bn of revenue and expenditure (about five per cent of ths total) is received and distributed each year off-budget. The extra money, from such sources as higher than anticipated oil-revenues, may be well spent but a lack of transparency is no incentive for efficient financial management.

Deregulating the domestic economy and disbursing state revenue more efficiently will become increasingly important if the rate of growth in non-oil exports begins to decline. Battling with well-connected business monopolies and casb-hungry government enterprises. however, will require firm political will.

sident and Mrs Suharto celebrating their 45th wedding anniversary: two of their sons and a daughter are membera of parliament

Suharto tightens his grip but time is against him, says William Keeling

Armed forces hold the key

PRESIDENT Subarto's election to a sixth five-year term of office last March came as no surprise. Not only was he the sole candidate for the post, backed by both opposition parties and the ruling Golkar party, he also had a direct say in appointing more than half the 1,000-member electoral col-

Instead, Mr Suharto seved the surprises for the cabinet reshuffle. Out went 20 of his 35 ministers including the three leading economic ministers, the home affairs minister and the minister of defence.

It is too early to pass judg-ment on the new cahinet but Mr Suharto appears to have further tightened his already strong grip on the country's political affairs.

Looking to the past, the depth of his personal power has ensured political etability and provided the environment for economic growth.

Facing up to the future, with Mr Suharto turning 72 next month and no clear successor in sight, doubts are increasing over whether a smooth transition to the post-Suharto era can be achieve Much will depend on the

armed forces (known by their Indoneslan acronym Abri), which enjoy a fifth of the seats in the national assembly and have a political role enshrined in the constitution. Abri is seen by the husiness community as a source of slability. The smooth transition from the old generation military leaders to the new generation is complete," says the head of one Indonesian conglomerate.

But Ahri does not always act as a homogeneous force; and certain groupings within Abri may not see eye-to-eye with Mr Suharto over who should he the next president.

The depth of Mr Suharto's personal power ensures the political scene remains a mostly closed affair and the tensions within government rarely break through a veil of obfuscation. A decision, how-ever, by Abri to nominate General Try Sutrisno, armed forces commander until early this year, for vice-president several weeks before the March elec-

tion caused a stir. Many indonesians interpreted the move as a way of manoeuvering Mr Suharto Into a corner and avoiding e recurrence of the 1988 election when Mr Suharto nominated State Minister Sudbarmono, a trusted legal adviser, against the wishes of several Abri offi-

Whilst Gen Sutrisno is a former personal aide to Mr Suharto, the latter may not wish him to be the next president. As one western diplomat explained, Gen Sutrisno is "surrounded by Abri and domi-nated by them. He's not a particularly strong man."

Political opponents say Mr Suharto has already exacted retribution on Abri by removing General Benny Murdani -previously seen as an important counter-balance to the president - as defence minister and reducing the number of military officers in the cabinet.

General Edl Sudrajat, recently appointed Abri commandar, and General Ida Bagus Sudjana, the new oil minister, are "regarded by Abri as their only real representatives in the cabinet," notes a diplomat. Abri is now pushing to retain its influence by having an officer head the ruling Golkar party.

Mr Suharto, himself a former general, has been promoting within Abri officers more to his liking - a military background and Islam as a religion are almost certain pre-requisites for the next president. At the top of the list is General Wismoyo Arismunandar, the army chief who has the added benefit of being Mr Subarto's brother-in-law.

But Gen Arismunandar is thought to have e weak power.

Gen Try Sutrisno: the army's

base within Ahrl. perhaps because of his first-family connection, and is regarded by many officers as e soldier-politician.

The concern of some Ahri officers is that Mr Suharto's choice of successor will be made on the narrow grounds of who will best protect his family after he has gone. Should be harhour any

desire to step down, Mr Suharto's influence over his possible replacement remains strong. For instance, if Mr Subarto wera to stand for e seventh term of office in 1998, push through his nomination as vice-president and retire shortly after, his favoured candidate would automatically

assume the presidency. The likelihood is that Mr Suharto and senior officers will negotiate a compromise and a smooth transition will follow, although, as the regime's opponents point out, this assumes popular support for such a

While there is very little open political dissent - the United Development and Indonesian Democratic opposition parties usually support the

government to maintain political consensus - the few dissidents who do speak out hold strong views.

"If Sukarno breached the constitution in one act (by being elected president for lifa), Suharto has done it in installments," says a dissident from his musty Jakarta office. Mr Suharto's critics fear that

be may override his better judgment in his determination to leave an indelible legacy by moving towards a more nationalistic - and risky- economic policy. Mr Suharto's March reshuf-

fle of the cablnet - removing three economic ministers strengthened the hand of Mr B.J. Habibie, the energetic minister for research and technology, who backs a policy of nurturing industries such as aircraft manufacturing, sblpbuilding and weaponry. Supporting these industries treads a fine line between costing indonesia dear and accelerat-ing industrial development.

Donors say funding to stateowned high-technology industries is running at about \$1.5hm e year, e figure unlikely to decrease if plans such as the construction of 12 nuclear power stations are pushed

Mr Suharto's supporters say the president will back Mr Habibie but not to the detriment of the economy. They say controlling inflation, keeping a balanced budget and limiting offshore borrowing are guiding factors for Mr Suharto in setting his political agenda.

Such is the business of maintaining the status quo in Indonesia. Extending the status quo, however, to beyond his own reign will be Mr Suharto's toughest task. Accommodating the interests of the Indonesian populace, satisfying the demands of Ahri officers and providing for the future wellbeing of his family could stretch the president's

The Indonesian government is struggling to develop a coherent domestic gas distribu-tion policy, but Pertamina is said to be unwilling to give up too much influence to Perum Gas Negara (PGN), the state gas distributor which is expected to develop gas transmission systems. Indonesia has complex hureaucracy as well as complex geology.

"It's hecoming urgant because of the high demand." said a senior PGN official. "It's very urgent and 1 hope that this will be fully understood hy all the hureaucrats in the gov-

Some steps, however, have heen taken. After more than a year's delay, a pipeline from an Arco-operated field off east Java is being huilt to supply a new power station at Gresik near Surabaya. Future projects may include pipelines from south Sumatra gas fields south to energy-hungry west Java and north to the huge Duri field operated by Caltex - to replace oil currently hurned in making steam which is injected into the reservoir to heat and lift the heavy crude.

Another strategy adopted to conserve oil has been to increase the domestic retali

price of fuel - which had been

below world prices. Most petroleum product prices were raised by more than 20 per cent in January, and although the authorities are concerned about the inflationary effects of the increase, further rises may follow in coming years to suppress growing demand and promote the use of gas.

The man responsible for the sensitive task of directing energy policy is Gen I.B. Sud-jana, who is said to have a background in army logistics and no experience of the oil and gas industry. He was appointed minister of mining and energy in the March cabinet reshuffle. "It came as a surprise to a lot of people, proba-bly including tha minister himself," said a leading Jak-

arta husinessman. One energy source he can look to with confidence, both for domestic use and for exports, is coal. Production is rising fast following the welcome given to foreign investors in the 1980s. Indonesia has 32bn tonnes of coal and lignite reserves. Exports doubled last year to 15m tonnes. By 1995, Indonesia should be producing 35m toppes, of which about 21m will be exported.

This year, Indonesia is expec ted to overtake Colombia as the world's fourth largest coal exporter, hehind Australia, South Africa and the US.

A Prove of Timeless Solidity

Two Among Indonesia's outstanding monuments. One of the world's wonders, Borobudur Temple, is a proof of our ancestors' grade knowledge, meticulousness and dedication even far back in the 8th century.

While today, in the Indonesia's modern world finance, Bank Dagang Negara is the living proof of those admirable traits. And further enhanced by the famous Indonesia friendliness. With deepest first-hand knowledge of our people and business, Bank Dagang Negara exudes as your solid and friendly partner.

BANK DAGANG NEGARA

tion contact The Finance Director, PT Semen JL MT Haryone Kav 12. Jakana

STOCKBROKERS in Jakarta, used to the good life of chauffeur-driven cars, wood-panelled offices and generous bousing allowances, are facing the challenge of justifying their expense. While a few security houses claim a profit on their trading operations, brokers admit the majority of foreign and local houses are running

at a loss. Few brokers, bowever, doubt the long-term potential of the Jakarta stock market; a presence in Indonesia, the world's fourth most populous country, will remain a must for foreign

hrokerages "It flts in nicely with the south-east Asia package security houses offer," says Ms Jacqueline Lenterman, head of research for Jardine Fleming in Jakarta, adding that an active trading department is necessary to service the profitmaking corporate finance operations

The market is still recovering from the trauma of a boom to hust cycle in 1990-91 when the composite index crashed from 682 points to 225. The result has been a damaging loss of confidence of local investors in equities.

Company dividends only yield about four per cent, while bank deposit rates of 14 per cent are still available. Brokers complain local investors bave a poor understanding of capital growth.

Most Jakarta stockbrokers are in difficulties but look foward to better times. William Keeling reports

An economy that is too big to ignore

Local investors retort that they bave seen the value of their shares halved in the last two years.

Foreign investors, in particular global and regional fund managers required to hava Indonesian exposure, are now the market's key players in terms of trading volume and in raising finance for new issues. A foreign hroker says: "We technically have a public offering In Indonesia but in practiterms we pre-place shares with foreigners."

This has, however, exacerbated the market's illiquidity as foreign institutions tend to buy large blocks of shares as long-term investments. Authory Davies, managing director of Baring Securities Indonesia, says: "The foreigners are the long-term players, It's the locals who create the day-to-day volume which makes a market."

has remained stagnant, averaging just \$13.2m a day last year. compared with \$12.4m in 1991 Although in tha last two

years 30 new companies have

listed - hringing to 158 the

total number of listed compa-nies - the market's capitalisation has fallen from \$24.4bn in 1990 to \$19.3bn at the end of As a result, trading volume

One way of improving liquidity would he to mobilise pension funds into becoming active participants in the market. The two principal statefunds. Taspen and Astek, held assets equivalent to \$3.2hn at the end of 1991, but only about \$200m in equities, compared

withg more than \$1.9bn In time deposits.

Private banks are paying the price for injudicious lending during the 1980s, reports William Keeling

Achilles Heel of the business sector

An aqually cautious approach to equities has been adopted by private pension schemes with estimated assets of \$4.5bn, insurance companies with more than \$800m in assets and five major charitable foundations chaired by President Subarto with funds of about

A new pension law, however. regulating the assets pension

funds may hold should increase their holdings of equities. Brokers say the shift may be gradual hut could lead to pension funds investing a fur-

within a year. The government is also expected to support the creation of investment funds, which would allow small pension funds to pool assets. At least two companies are planning onshore funds, listed on

ther \$250m in the stock market

still recovering from the boom-to-bust cycle of 1990-1991

the Jakarta stock exchange investing in equities, bonds

and government paper.
Other moves being considered by the government to improve liquidity include: allowing foreigners to buy more than 49 per cent of a company's listed sbares, the current limit; removing capital gains tax payable hy local investors; and accelerating a move toward scripless trading. The need for an improved

trading system was underlined in March when two fraudsters sold about Rp12bn of fake shares into the market. Trading in five of Indonesia's largest and most actively traded companies was suspended whilst the scam was investi-

The forged share certificates were of exceptionally high quality, carrying brokers' stamps, correct Identification numbers and passing ultra-vio-let tests on water-marks. More worrying, however, was an admission by stock exchange officials that the printing quality of a third of genuine share certificates is sub-standard.

The week before the scandal broke the market was in bullish mood with turnover exceeding Rp500bn. Trading volume in the following week was less then Rp100bn. But as Mr Davies explains, market illiquidity is not just a function of poor trading system, "it's a matter of there not heing enough shares around".

This stems from the willingness of Bapepam, the government's capital markets authorjust a small minority of shares to the public, whilst keeping the majority in the founders'

hands. The estimated "free-float" of shares (those actively traded) for Bank Internasional Indonesia, the largest listed bank, is 11 per cent; for Gudang Garam, the dominant cigarette manufacturer, 12 per cent; for indocement, the country's largest listed company, 13 per cent. Whilst brokers publish glossy equity lists recommending investors to buy into companles, in practical terms the stock is simply not available.

Some brokers suggest the government should insist on the majority shareholders of existing listed companies further diluting their stake and demanding that new compa-nies coming to the market have a minimum "free float" of 25 per cent.

Such a move, however, could be counter-productive. Owners of private companies could become wary of going public if the government sets a precedent of forcing majority shareholders to sell off their hold-

ings.
Brokers still believe Indonesia will follow the path of Thalland and Malaysia to become a major emerging market with a daily turnover of \$100m plus. They also concede however, that deep-rooted structural problems within the market will take several years to overcome.

PLACED in the corner of the central hank governor's walting room last November was the medical apparatus to measure blood pressure. It was a sign, perhaps, that the banking system, hurdened with non-performing loans, was taking its toll on those assigned to

Indonesia is still feeling the effects of financial sector deregulation initiated five years ago. By the end of 1992 banking sector assets bad almost tripled to Rp123,689hn, while there has been concomitant growth - to over 200 - in the number of banks.

While the increase in availability of credit helped to develop a new generation of profitable, export-oriented industries, not all loans were so well-placed, Indeed, rather than represent the cornerstone of growth, the sector is now the economy's greatest weak-

The problems of a rapid expansion in credit combined with Ill-trained and incompe-

tent management were higbligbted tast December when the government ordered the liquidation of Bank Summa, one of the country's top 10 pri-

Owned hy the wealthy Soeryadjaya family, the bank became heavily exposed to property companies in which the Soeryadiayas held an inter-

After domestic and International property prices fell in 1990/91, the bank's loans began to turn sour. When Bank indonesia (BI), the central hank, finally stepped in Bank Summa had Rpl,600bn in outstanding obligations and only a fraction of that in way of col-

While BI officials argued that Bank Summa was a unique instance, their figures for the banking sector's non-performing loans are almost certainly too low. A week before closing Bank Summa's tills. Bl put the sector's bad dehts at less than

Rp3,000bn and the total non-

performing loans (on which no

interest had been paid for three months and over) at just Rp7.400hn. Banks bave shown an "extraordinary reluctance to categorise anything as a bad debt which has been collateralised or which is outstanding to

donor official.

And BI appears to have sbown naivete in believing the banks' explanations of their books: collateral may be loadequate or difficult to secure,

people who they believe can

afford to pay," says a senior

while the practice of collateralising interest payments on overdue loans to the wealthy encourages non-payment.

Given the scale of Bank Summa's debts, the tales of graft within the five state commercial banks (which account for half the sector's assets) and the poor credit analysis of most private banks, the scale of problem loans may be substantial.

Most bankers estimate that 25 per cent or Rp17,000bm of the state banks' loan portfolios are non-performing. Estimates of the non-performing loans of private domestic banks range from six to 15 per cent of their port folios (Rp2,540bn-Rp6,350bn). In the worst case scenario, the non-performing

loans of the sector would be

equal to Bl'a international

reserves.
Of equal concern is the failure of banks to provide sufficiently against bad debt, Banking analysts say a minimum of 2.5 per cent of productive assets should be provided for non-performing loans but, in 1992, of Indonesia's top six listed banks, arguably among the country's best managed, none reached this level.

Brokers treat with scepticism, therefore, the higher netprofits reported by most banks last year.

A broker explains: "If banks provided adequately for their non-performing loans, most would be running at a loss," even given the high spreads between deposit rates of 14-16 per cent and lending rates of 22 per cent and higher. While the banking sector is

fragile, however, it is not necessarily in danger of collapse. Economisis point out that the relative scale of non-performing loans can be reduced by continued economic growth and natural expansion in

ected to several key

Banks' outstanding credits

portfolios this year. Whether new loans, however, can be made on a more prudent basis depends largely upon better supervision by Bl and the strict imposition of banking regulations.

Newly installed cabinet ministers bave expressed their determinations to pull the sector into line. Mr Saleh Afiff, senior economics minister, said in an interview that the government was "very concerned about the state banks and the banking system as a whole. We have to do something...We will take steps first to know what is

Mr Sudradjat Djlwandono,

the newly-appointed central bank governor, has a reputation as a competent, single-minded administrator and the replacement of BI's board in April has met with the approval of foreign donors.

Bankers also note that steps taken by the last government to improve banking supervision should soon begin to bear fruit. Banks were told to raise their capital adequacy ratio (CAR) to seven per cent by the end of last March, a figure reached hy most private banks. and to eight per cent by next

Bl has also been training up new teams of auditors. While

these have mostly confined themselves to auditing foreign banks to date, they should soon be delving into the disor-derly hooks of the privata banks. Ministers say they will insist on the merger or closure of poorly run banks.

Last August the government completed a reshuffle of the state banks' boards and issued a stern warning that the practice of "memo-lending" where banks lend on the basis of clients' political connections, not their credit worthi

ness – must cease. Concerted efforts are also underway to raise the capital base of the state banks, which economists estimate needs to be doubled if they are to attain the government's CAR targets. The World Bank has made a \$300m loan to inject capital into the state banks and the government has requested donor permission to convert more than \$1hn in two-step loans being channeled through the state banks into either tlertwo capital or equity.

Consolidation within the banking sector is likely to be a slow and painful process. Last year the assets of the private domestic banks grew just 1.2

A condition of the World Bank loan to the state banks is a limit on loans growth to less than 15 per cent a year. For indonesian husinesses, therefore, new lines of domestic credit are likely to remain both hard to come hy and expen-

The Rays

Life itself springs forth from the sun. Sinar Mas, as one of the leading business groups in Indonesia, appreciates the gifts of nature and is committed to responsible development and the pres-

ervation of the environment in order to improve the quality of life for the benefit of mankind.

The Group's agro-business activities help provide the most fundamental of all human needs - the

The Sinar Mas Group has roots in the vegetable

oil business, having begun operations in this area more than 40 years ago. Today, the Sinar Mas Group has modern refineries producing edible oils and fats required by domestic consumers and food industries of The Group also owns and develops over 160,000 hectares of plantations devoted to oil palm, 1ea, coconut, cocoa and hananas.

Through its vertically integraled structure, the Group has achieved significant market shares in agro-industry while adhering strictly to the national standards of health, safety and environmental protection.

SHELTER

From urban housing estates to luxury hotels, the Sinar Mas Group contributes to the essential human need for housing and sheller.

As one of the leading developers in Indonesia, Sinar Mas ensures its diverse real estate projects are developed in harmony with the surrounding environment. The Group's interests include commercial real estate and office huildings, residential subdivisions and condominiums, shopping centers, industrial estates and golf course developments.

EDUCATION

As one of the leading exporters of pulp and quality paper to over 40 countries, and with its dominant share of the printing and writing paper market in Indonesia. Sinar Mas helps make learning possible.

Its subsidiaries, Tjiwi Kimia and Indah Kiai provide a model for Indonesia and the world in waste management, including their exemplary waste water treatment facilities. The Group also makes extensive use of recyclable paper products and bagasse in its

The Group's activities in the pulp and paper industry adhere to strict environmental policies, including extensive reforestation projects, and maximum use of forest plantations.

> QUALITY OF LIFE Sinar Mas works to enhance the quality of life with its wide range of financial services. Sinar Mas operates one of the most profitable local private banks in Indonesia, Bank Internasional Indonesia (BII), which actively supports programs such as the World Wildlife Fund's endeavor to save the Javanese Rhinocerous. Through its consumer marketing program, Bll contributes to this project for every new credit card issued. Sinar Mas has been selected to participate in the

government sponsored program "Care '92", designed to educate the public on environmental issues. including pollution control and recycling. The Group's activities in this program include providing loans to small businesses for waste management projects, and the purchase of materials for recycling purposes.

With the source of its husiness and inspiration found in nature, the Sinar Mas Group is committed to responsible development through its environmentally sound policies and activities.

Just as the rays of the sun give life to nature, so Sinar Mas shares the benefits of its success.

Pearls in a cobalt sea AS THE sun sets over the idyllic island of Banda, the shadow cast by Gunung Api volcano, with snlphurons fumes rising from its summit, acts as a reminder of the In the eastern reaches of the archipelago, Banda is one of the original spice islands which attracted the European powers in the 16th century and led to more than 300 years MIDWAS PLONES

William Keeling on the Spice Islands' exotic charms and grizzly past

extension, his island a colonial

guage of guidebooks as clusters of pearls resting in a cobalt-hine sea - are now attracting their first tourists. Jakarta, 1,500 miles to the west and two time zones away, To greet them in Banda is Mr is so distant as to rarely enter Des Alwi, the Chief Orang the island's consciousness, he explained. Instead, if a bête leader), owner of the Maulana noire had to he chosen, it Hotel and much else besides in would be the provincial goveroment in Ambon, an island Mr Alwi is credited by many, including himself, with

10 hours by boat to the north. Five administrative officials sent by Ambon had recently heen removed from Banda on grounds of corruption, whilst an Ambon civil servant's order licensing 38 guest houses in Bandaneira bad been rescinded after he intervened, Mr Alwi said.

Whilst too many gnes-thouses would be as damaging The flow of tourists is likely to increase after a British Sunday newspaper named the as too few. Mr Alwi is sensitive to criticism of protecting world's finest. Its nomination might be considered fortunate his near monopoly of the town's tourist accommodation. given the lack of hot water, There's no pleasing everyone, he says, announcing that the profits from his hotel are ploughed back into renovating sure, however, of the island's Banda's historic buildings.

And bnwever great the anthority he wields, Mr Alwl ls certainly more benevolent than the Dutch who first visited Banda in 1599 and took the region by force 22 years

ruin, has an unhurried pace of Banda and its neighbouring life and an almost unnaturally islands were the world's sole peaceful air. Caught in one of source for bigh quality nutmany free momenis, Mr Alwi meg, an essential ingredient in preserving meat in the years ded to a popularly held theory that Indonesia is a before refrigeration, whilst to the north of Ambon lie the Javanese empire and, hy

islands of Ternate and Tidore.

the original source of cloves. The islands were a source of cousiderable wealth and the Dutch employed savage means to impose their rule. In 1621, Jan Pieterszoon Coen arrived in Banda to take np residence as governor general with an army of nearly 2,000 men. including about 100 Japanese

mercenaries. Interpreting the collapse of a ceiling lamp in the governor's residence as an assassinatinn attempt, the Dntch extracted retribution by razing villages and engaging in mass-

In one Incident 44 condemned prisoners, including eight orang kaya, were beheaded and quartered by Japanese mercenarles. An eyewitness described the execution as "awful to see. The orang kaya dled silently withont uttering any sound except that one of them ... said, 'Sirs, have you then no mercy?'." Of an estimated 15,000 population on Banda and the surrounding islands, only about 1.000 survived the massacres.

As with the clove barvest in Ternate and Tidore, the Datch imposed a trading monopoly over Banda's Incrative nutmeg crop with the islands' annual expurts valued at the equivalent of \$30m today. But rampant corruption and a lack of basic financial accounting infected the United East India Company (VOC) monopoly and

in the 1790s it went hust owing more than \$160m in today's money. In his book Indonesian

Banda, Willard Hanna, a US diplomat in blames "the nnworkable principle of monopoly for the company's collapse and notes enormously wealthy and powerful VOC may have been a losing proposition all along".

How little times change and how hard are the lessons of history won, note current Indonesian economists. Freed of the Dutch colonial yoke, in an Ironical twist of fate a new. privately owned, trading monopoly was imposed on clove farmers two years ago.

Chaired hy Mr Hutomo "Tommy" Mandala Pntra, yonngest son of President Suharto, the new monopoly has received moe than Rp1,000bn in mostly soft credits from atate-owned hanks. Not only has the monopoly been nnable to service even the interest on the debt, the actual price of cloves, used in Indonesia's fragrant kretek cigarettes,

received by farmers has fallen. Banda's remaining nutmeg producers might regard themselves as fortunate their spice has insufficient value to attract a modern-day mounpoly. The comfort, however, will be small with the collapse of the natmeg trade pushing the islanders hack toward subsistence

Where nutmeg plantations once stood, uhiquitons cassava is now grown and Mr Alwi may be correct in seeing tourism as the only means of improving the local economy. But to succeed, the people of Banda must prevent history repeating itself. They must follow the example of Mr Alwi and, with big smile and arms spread wide, explnit the wealth of foreign visitors, not vice-versa.

the flour-mills. I can tell you, we are not finished vet with our deregulation programme but it has to go step by step. Consensus among ministers and also with the president takes time.

The privotely-owned clove monopoly has received loans of Rp1,000bn from state banks but has been unable to service its debt. Are you planning any

We have had long discusstons about this. It cannot be maintained as it is but you cannot stop it abruptly also. It will be phased out. It will take a couple of years to phase out. Are you planning o deregulation package in order to set out your credentials?

Yes, I am keen to do it. Not only me but Minister Hartarto, the co-ordinating minister of industry and trade, because we know that other countries are deregulating faster. Everybody is now aiming at China. The Chinese foreign minister is going to Europe with a group of businessmen to attract

investors. We have to compete with them and the only way is by improving the investm climate. There are bottlenecks in licensing, in customs and in many others.

Do you consider China and countries such as Vietnam as economic threats?

We consider them threats. We have to compete for funds which are shrinking. A couple of years ago no-one would go to Vietnam. Ten years ago China was still small Suddenly they are in the field and we have to compe

State-owned high-technology enterprises such as aircraft manufacture are said to receive up to Rp4,000bn a year in state ances. How exactly are they They are mostly funded from the state budget, but not that

equity, since 1976, in parallel with our other development We also finance agricultural devalopment, irrigation

Dr Saleh Affit: de-requiation is not. over but we shall go step by step

systems and the provision of social services in rural areas. The impression I get in the media is that this (government funding of bigh-technology) will be jumping and this (agricultural and rural

development) will be left hehind. This is not true. Are you getting a decent return on your investment in the high-technology sector?

That is an interesting point, on returns. Look, when I was in Bappenas (the national planning agency) l allocated funds for a road in Irian Jaya (connecting an isolated town with the provincial capital). You ask me what are the returns, because there were no cars at that time? But if we don't finance it, will Irian Jaya develop without infrastructure? That is also with IPTN (the state aircraft constructloo company). Returns wise, of course they have lost but in the long run

maybe we will gain.

How long is the long run? They have a plan that at a certain point their equity will he fulfilled and then they should start with additional financing, not only from the state budget, but from the state banks, other banks the private sector.

Are you concerned about state enterprises borrowing from state banks? How does this affect the budget?

The state banks' capital separate from the budget. If the state banks finance state enterprises, it will be from their deposits. As you know the growth of deposits in the last 10 years was tremendous. They have a lot of loanable funds. State enterprises are one of their favourites because they are more sure. If something happens, then the

government will take care of it. Whilst deposits have risen of state banks, so have their bad debts. How concerned are you at the level of the state banks non-performing loans?

I am very concerned about tha state banks and the banking system as a whole. We hava to do something. In economics, you decide now and the impact will be a year or so

I think the banking system plays a crucial role in promoting growth. Wa will take steps first to know what is the size of the bad dabt. Credit appraisals, training of management and the quality of services of the banks (should be improved) so they don't make the same errors.

Some bad loans have been made to politically well-connected people and many private banks are owned by politicolly well-connected families. Will you not have to fight o political battle to impose your will?

Those things happen and we will fight. I will fight, because if we continue on this basis it will not help the economy at all. Right now the business community are complaining that It is not the interest rate level which is a problem but the availability of credit. Why is it not availabla? Because they (the banks) are scared. They would rather put money into SBIs (government bonds) than lend to a husiness community in which they are not sure. The risk is too hig perhaps. But this will impede economic growth. And what does that mean? It means we cannot absorb the new labour force which is growing at more than 2m a year. The macro implications are quite substantial. So we have to fight.

Victor Mallet describes the industrial revolution in East Java

Steelworks and paddyfields

paddy-fields, rice farmers and water buffalo, there are now shoe factories, international pharmaceutical companies and industrial workers. The provinca of East Java is in the throes of an economic boom.

WHERE once there were

West Java and Jakarta have long been Indonesia's main destinations for investors, but traffic congestion and high land prices in the capital have persuaded a growing number of local and foreign manufacturers to go east.

The economy of Surabaya, the East Java provincial capital of some 3m inhabitants, has been growing at more than 12 per cent a year. East Java'a steel plants are churning out reinforcing bars to meet heavy demand for reinforced concrete from the construction indus-

Property prices and the cost of labour are still relatively modest and the flat land of the rice-paddies is equally suitable for television plants and instant noodle factories. Today grey factory walls and bright green expanses of young rice alternate along the highways; the horse-drawn carts on the

roads are outnumbered by cars plant, The tobacco industry, principally clove-flavoured "kretek" cigarettes for domestic consumption, is the second where - as well as ethnic Chilargest employer in the counnese businessmen from other try after the government and is parts of Indonesia - have prominent in East Java; Samoined old East Java companies poerna alone employs 14,000

> Employers say tha stolid workers of East Java are ofteo better suited to the monotony of manufacturing than the more entrepreneurial inhabitants of the west.

> women to hand roll its kretek

Neither Surabaya nor the rest of East Java, however, have escaped tha infrastructural and social strains common to other fast-developing parts of Asia.

Road traffic is increasing in volume and its speed is falling; the supply of electricity cannot keep pace with demand; telephone lines to Jakarta are congested: prostitution is common;

breaks of labour unrest and factory arson.

Most of the problems are being tackled. East of Surabaya, a multi-billion dollar complex of coal-fired power stations is under construction at Paiton, and a \$1bn, 1,500megawatt plant to be supplied by gas pipeline from a field off Java is being commissioned at

Gresik near Surabaya. Workers can be seen in the countryside assembling tha pylons to carry tha electricity westwards from Paiton, in the meantime, companies seem happy to use their own generators wheo they have to.

"East Java is going through phenomenal growth at tha moment," says a banker based in Surabaya. "The margins are so good in most industries here that the extra marginal cost of producing your own power is easily containable."

lines can be frustrating, but international calls are now straightforward and the advent of cellular phones has made it easier to contact people in Surabaya and in other parts of Indonesia. One executive says he had no telephone at home three years ago: now he has two telephones in his house and a mobile device.

A toll road to Gresik is being extended, and there is once again talk of building a bridge to nearby Madura island to promote its development as a manufacturing base. Surabaya has an international airport and the city's Tanjung Perak port was recently upgraded with the completion of a new container terminal.

Not every project is a success. Surabaya's four-year-old stock exchange is regarded as moribund, and the magnificently-equipped new shipyard

run by the state-owned PT Pal company under the auspices of the ebullient Mr B.J. Habible and his research and technology ministry is seen as something of a white elephant, in the past year it has been employing American welders to huild turbines for power stations rather than ships.

Such setbacks are unlikely to stop East Java's progress up the economic ladder. An international school catering for the children of the growing number of foreigners in Surabaya is thriving. Tourism is on the rise, and several new hotels run by Hilton and other international groups are due to open in Surabaya soon to provide some much-needed competition for the Hyatt.

Perhaps tha most telling sign of the times - apart from the sprouting of television satellite dishes - is Sampoerna's decision to branch out into property development with the purchase of a 598-hectare site in the hills outside Surabaya; the eventual aim of the project is to build luxury bousing for locals and weekend cottages for the wealthy citizens of Jak-

The Jakarta Post. 1983-1993.

Can this be true you ask

yourself?

Well, the fact is in the last ten years, as we've become Indonesia's leading English language newspaper, the world has changed.

Dramatically.

And to stay in the forefront we're planning to change too. Because we firmly believe that by the turn of the century the role of the newspaper will be greatly different from the way it is today.

Over the next couple of months we'll give you a glimpse of how we envision our new role.

We're hosting a major exhibition of the art of Sumba in April and in May we're organizing a major conference on Human Rights.

Hardly, the stuff of an ordinary newspaper. But then we've never been that in the past and we won't be in the

So don't mourn our passing, rather look forward to a new decade of insights and opinions, backed by hard

Rules must be right - and upheld

whether indonesia's valuable tropical forests survive in good health into the next century: are the rules on limiting timher extraction heing enforced. and are the rules the right ones for Indonesia in the first

The answer most often given to both questions is "no", a source of concern not only to Indonesian and foreign environmentalists but also to the government and the country as Large-scale exploitation of

Indonesia's rich forests began in the lete 1960s, and forest products - mainly plywood are now the country's fourth most important export after oil, gas, and manufactured goods; in 1991 they earned \$3.7bn, nearly double all agricultural exports put together. On paper, Indonesia's plans look reasonable enough. Of the country's land area of 193m hectares. 144m ha or 75 per cent is classified as forest, of which 66m hectares is supposed to be selectively logged, 48m preserved intact for national parks and vital water-

sheds, and 30m chopped down to make way for agriculture, new settlements and industry. Implementation of these sweeping plans, however, is another matter, particularly when it comes to the logging concessions which are meant to be exploited in a sustainable

In a damning recent report which shook the Indonesian establishment, Walhi, the leading domestic environmental group, not only questioned the economic value of the industry to the country but also cited convincing evidence that logging companies routinely flout forestry regulations.

Bribes are paid to forestry inspectors to encourage them to under-report the amount of timber extracted from concessions, Walhi said.

It quoted a 1990 forestry department report as saying that only 22 out of 578 concessionaires had actually followed regulations on selective cutting and replanting, and cited another official report which disclosed that only 30 per cent of log production in East Kali-

TWO ISSUES will decide reported to the government as

In the past, the report added, Japanese figures for the import of logs and wood products from Indonesia were far higher than the Indonesian figures for exports to Japan. Walhi concluded that the state captured only 17 per cent of the economic rent from timber in taxes and fees, compared with 85 per cent for the technologically much more sophisticated oil industry. Although the government and big private companies are

establishing tens of thousands of hectares of plantations for the pulp and paper and other timber processing industries, the programme is behind schedule and has so far done little to protect Indonesia's nat-

There is scant transparency in the bidding for natural forest concessions, and the logging industry is dominated by

Mohamad "Boh" Hasan and Mr Prajogo Pangestu, who have close ties to President Suharto. "Wood is not heing harvested, it's being mined," says a foreign aid official. Another The legal loggers are legally logging sometimes and illegally logging at other times. There's no end to the gentus

mantan on Borneo was Loading the togs: the speed of reefforestation is fer too slow

and many foreign donors agree that hig logging concessionaires like Mr Hasan - because of their financial resources and their huge stake in the future of the industry - are more likely to manage forests sustainably than smaller opera-tors who might be tempted to "asset-strip" their concessions for a quick, short-term gain.

There is also agreement that forestry rules are contravened. "Our government doesn't have the capability to measure ille-gal cutting," says Mr Bambang Soekartiko, a senior official of the ministry of forestry. "We know there is excess cutting."

As for the existing system of salective cutting and replanting, Indonesian and foreign forestry experts are ecknowledging that, because of their limited understanding of the biology of forests rich in valuable dipterocarp species, they might not be able to make it work even if the rules were strictly applied.

Part of the problem is that a typical forest does not contain equal numbers of large, medium-sized and small trees which would allow regular cropping as each generation reaches maturity. In fact the large, harvestable trees dominate the canopy and thereby stunt their successors which then take many years to reach the

Several proposals to improve the rules for managing Indone-sian forests and the enforcement of those rules are under discussion, Including an extension of concession periods from 20 to 35 years, the use of costly performance bonds to ensure logging companies comply with the law, and the deployment of foreign inspectors.

Foreign donors have welcomed the appointment of Mr Diamaloedin Soervohadikoesoemo as the new forestry minister In the March cahinet reshuffle, although some of them say his decision to adopt a new and tittle-understood system of forest strip-cutting is a sign of the government's desperation as it seeks save the industry from its own excesses. The idea is to cut long strips

of forest - including the smaller trees - and leave other, neighbouring strips

However, the government intact, allowing the logged strip to be replanted or seeded from the untouched forest and letting in sunlight to nourish the young trees. Forestry ministry officials

say the strip system will be easier to monitor - hy satellite for example - and they also helieve that natural forest growth will increase from one or two cubic metres per hectare per year to between eight and 14 cubic metres. The productivity will increase eight times," says Mr Soekartiko.

Others are sceptical, pointing out that loggers will be tempted to venture into the supposedly inviolate strips of forest to take the most valu-able trees, and that the open strips might be used as farms low in the waka of the logging

Implementation of the new method has not yet begun in Indonesia. In the meantime, high demand for logs from

more than 2,800 sawmills and plywood factories continues to put pressure on Indonesia's forests; the mills and factories have a capacity of more than 50m cubic metres a year, compared with the government's official figure for sustainable log output of 31m cubic metres. One of the few hopeful signs for Indonesia, as it strives to

fered long ago in western Europe and more recently in Thailand and the Philippines, is that local inhabitants have hecome more vocal in their opposition to state-sanctioned logging in their homelands.
The inhabitants of Yamdena.

an island on the eastern side of the archipelago, and of Siberut

avoid the deforestation suf- off the coast of Sumatra, have won reprieves for their forests. and even the logging companies of Kalimantan are said to be concerned about their own future; they may yet heed Walhi's warning:

'At the current level of deforestation, Indonesia's forests will disappear in the next

■ THE RACE FOR FOREIGN INVESTMENT

China sets a gruelling pace

THE MANGY dog which ekes out a miserable existence on the steps of the investment Co-ordinating Board (BKPM) office in Jakarta gives the potential investor an unduly dismal impression of the fate

awaiting him in Indonesia. Foreign investment applications have in fact risen steadily in the last seven years as Asian and western manufacturers take advantage of the country's ahundant and modestly-priced workforce - workers sometimes earn only a dol-lar a day - and its large

consumer market. First it was textiles. Much of the international export industry, after moving from Japan to Taiwan and Korea, has now settled in countries such as Indonesia, Thailand and China, The value of Indonesian textile and garment exports rose to about \$6bn last year, about six times the level of 1986.

Then came electronics. Samsung of South Korea and Sony of Japan have started to export video recorders and audio systems from Indonesia. Exports of electrical appliances have doubled to about \$1hn a

year from \$500m in 1991. Indonesian officials, however, are worried. They are concerned about increasin competition for investment dol lars from the fast-growing economies of China, Vietnam and India, and they are dismayed by the sharp fall in domestic investment over the last three years.

Although the BKPM's forelgn investment approvals (which exclude oil and gas exploration) reached a record \$10.3bn last year, the underlying level of foreign interest in Indonesia appears to he falling. about \$3bn of the 1992 approvals total came from two huge projects - a planned oil refinery in south Sumatra proposed by British Petroleum and C. Itoh, and the Chandra Asri petrochemical plant in west Java which underwent a controversial switch from domestic to foreign investment status after the government sought to limit foreign borrow-

ing by domestic companies. The figures must also be treated with caution, since historically only about half of approved foreign projects by value, and a third of domestic ones, are actually imple-

months, and there are restrictions on the level of foreign ownership. An added hurden for companies proposing large projects is the possibility that one of President Suharto's children will want to take a stake in the business - a disincentive for foreign creditors who might otherwise be willing to

provide finance. Shortages of electricity and clean water, a poor telephone service and other infrastructural problems common to other rapidly expanding Asian economies also cause difficul-

"In terms of investment conditions, if you compare it to any country I think Indonesia is among the least advanced." said Mr Yohsuke Udaka, director of PT Teijin Indonesia Fiber Corp, a Japanese-Indonesian joint venture manufacturer of synthetic fiber and yarn. He compared Indonesia's relatively restricted investment regime to the incentives on offer elsewhere, including tax holidaye in China and electricity rebates in Thailand.

The point is not lost on BKPM officials. "A lot of Japanese, Korean and Taiwanese investment that should have

A package of reforms introduced last year allows foreigners to start with 100 per cent ownership of a project if It has paid-up capital of at least \$50m. or if it is sited outside the main island of Java and the more

developed parts of Sumatra. This year, the BKPM's status was raised in the March cahinet reshuffle by the elevation of Mr Sanyoto Sastrowardoyo, the BKPM chairman, to ministerial rank. The government is expected to ease industrial licensing procedures and extend land lease titles, perhaps to 50 or 60 years from the current 30 or 35 years. It may also reduce the \$50m limit for 100 per cent

initial foreign ownership. "I think they have to give a good signal very soon," said Ms Mari Pangestu, chief economist at the Centre for Strategic and International Studies in

Investors and government officials are also anxious to establish component industries so that manufacturers can source more of their materials inside Indonesia - instead of keeping large atocks of imported products in their factortes - and an Indonesian mission is due to travel to

Japan in June to discuss the

Progress has already been made. PT Teijin Indonesia, for example, uses purified tere-phthalic acid (PTA) as one of its principal raw materials to make polyester fibre and should soon be able to receive supplies from a new Mitsubishi PTA plant in Indonesia; hitherto it has been obliged to buy PTA on the International mar ket and to buy the output of Pertamina, the state oil company, despite its dissatisfaction with the quality and reliability

of Pertamina's supply.

Another concern which the government may seek to address is the falling level of domestic investment. BKPM figures show domestic approvals falling to Rp29,342hn in 1992 from Rp41,085hn in 1991 and Rp55,278 in 1990.

The government's "tight money" policy of restraining credit growth since 1990 Is regarded as the main culprit, but nationalist Indonesians have also complained that the ethnic Chinese citizens who dominate private commerce and industry have been investing in China at the expense of

Such complaints smack of over-simplification. The Chinese retort that they are subjected to equally fierce criticism if they invest too much in indonesia - on the grounds that they are supposedly monopolising Indonesian husiness - and point out that much of the money invested abroad is already located offshore in Hong Kong or Singapore. Furthermore, the income from profitable investments in China or elsewhere can be used to fund expansion in Indonesia itself.

There is, however, wideepread concern at the obvious emotional attachment to China displayed hy ethnic Chinese husinessmen from indonesia. although when a wealthy entrepreneur flies north it is hard to tell if he is negotiating husiness deals in southern China or merely gambling in

Macao. With both domestic and foreign investment requiring further encouragement, it may not be long before the government acts. "We recognise that on a competitiveuess rating, we are now rather hehind, especially compared with China," said Mr Mar'ie Muhammad, the finance minister. "We have to improve the whola investment climate... We will do it soon."

Uncertainty – but problems are soluble

1) Continued from Page 1

He and his nationalist, "technologist" supporters are thought to have gained influence in the sweeping cabinet reshuffle announced in March; the fear is that Mr Habible's state-owned aircraft, shipbuilding and armaments industries will continue to consume hundreds of millions of dollars of government money each year without making adequate commercial returns. Mr Habibie argues that high technology and trained professionals will be vital for Indonesia's future industrial development.

Indonesia's economy is also burdeoed by public and private foreign deht - which, swollen partly hy the recent strength of the yen against the dollar, has risen to more than \$85bn, and by the poor health of many domestic commercial banks.

None of these problems is insurmountable: indeed many countries would be proud if

they could emulate Indonesia in halancing their budgets, repaying their foreign debt obligations on time and maintaining economic growth averaging nearly seven per cent a year for a quarter of a century.

But the uncertainty about the investment climate, about the shenanigans of the president's children, about the ambitions of Mr Habible and the fragile state of the banking system is compounded by e lack of transparency and a lack of public debate which is out of step with the increasing sophistication of Indonesians.

Reporting by the media remains constrained by government pressure. Rumours, whether about the bad dehts of state banks or the number of people allegedly killed in a recent riot at a rock music concert, are the stuff of Jakarta dinner party conversations.

Late last year, people in Jakarta learned that Moslem radicals had launched a series of attacks on Christian homes and churches in east Java and Sumatra. Many Indonesians fear such incldents could revive tensions between tha Moslem majority and the Chinese minority (many of whom are Christians).

Tens of thousands of Indonesian Chinese were killed in the turnoll surrounding the fall of Sukarno between 1965 and 1967, in Indonesia as in other south-east Asian countries, a small number of ethnic Chinese citizens dominate commerce and industry and are resented for it, a situation often used to justify the economic favours granted to Mr Suharto's children and to Mr

Today the ethnic Chinese, having been criticised for dominating local businesa, are being accused of disloyalty for investing in China instead of in Indonesia, although much of the money channelled to projects in China is already held offshore in Hong Kong or Sing-

In the immediate future the task of reconciling the various groups with vested interests in the Indonesian economy will fall on the newly-appointed Mr Afiff and his ministerial colleagues; he has promised a robust pursuit of free market policies. In the longer term the stability of Indonesia still seems to depend on Mr Suharto. A former army general, he has held the country together and guided It towards prosparity since replacing Sukarno, but he is as reluctant

as ever to name a successor. Opponents of his authoritarian style believe he should act soon to arrange an orderly succession and lessen the risk of a power struggle. As one dissi-dent intellectual put it: What good is the success of economics or whatever else they may have achieved, if it's put In jeopardy because you never know what will happen next?"

New era of conciliation could end the isolationism of Marseille Page 3

grammes in the last decade.

THE TINY fishing port of aub-contractors for the large Saint-Tropez is a picturesque aerospace and electronic place with narrow streets, a yacht-filled harbour and gaudy cafes stretched along the beach where Brigitte Bardot, its most famous resident, frolicked in information technology.
Rural areas have also been affected. The grape growers of the Languedoc are still trying her prime as the star of Roger Vadim's 1956 film, And God

Created Woman.
But Saint-Tropez is also a politicai powderkeg as Mr Alain Spada, its former mayor, discovered in this month's municipal elections. Mr Spada, an independent conservative, was forced to call elections two years ahead of schedule after all 28 of his fellow councillors resigned and a troop of Tropéziens protested against him by carrying a black-draped coffin through the streets.

Mr Spada, who was criticised by his constituents for allegedly towing away too many illegally parked cars and for banning Ms Bardot's dogs from urinating on the beach, lost the elections to Mr Jean-Michel Couve, the Gaullist whom he had ousted four years before. But the defeated mayor did at least have the consolation that Mr Bernard d'Ormale, one of his fiercest critics who is Ms Bardot's husband and a close friend of Mr Jean-Marie Le Pen, leader of the extreme right-wing National Front, withdrew his socialist strongholds as Mar-

candidacy before the vote.

The Saint-Tropes storm, which provoked the village priest to tell his Easter congregation that he had never seen scandal-mongering pushed to such lengths", could be dismissed as a Clocbemerlien saga of local protest. clastic mayor at loggerheads with his fellow politicians, and his constituents, is reflected across the south of France.

Sonthern France is a vast region stretching from Perpignan in the Midi-Pyrénées on the Spanish border to the city of Nice by the Italian frontier in Provence-Alpes-Côte d'Azur. Its population expanded rapidly in the 1980s as people flocked from the chilly north towards the sun. sea and sand of the coast and to the screnity of the unspolit parts of Provence

The region is a study in contrasts. Toulouse is a prosperous, industrial city trading on its historic strengths in aerospace and electronics. Montpellier is still building on its ancient academic laurels and its recent reputation in the arts to establish itself as a liberal technopolis. Nimes is now trying to follow suit. Marseille is struggling to come to terms with the demise of its traditional manufacturing base in the post-colonial era. Nice is flourishing, thanks to the successful science parks hidden in the Provence hills around the city and to its traditional trading links with

eouth has not been spared the pain of the French recession. Marseille has probably suffered most of all as current preseures have aggravated its longer-term economic problems. The toll of joblessness has reached 19 per cent for the whole city (double the national average) and 30 per cent in the most deprived

But other cities are suffering, too. Montpellier made great progress in generating new of the region. But the feuds jobs during the 1980s by and friction between different capitalising on the publicity produced by the ambitious arts and architecture schemes initiated by Mr Georges Frêche, its dynamic socialist mayor, notably Antigone, the the hub of the Mediterranean. post-moderniat development designed by at times seemed to expend Roccardo Bofill, the Spanish architect. But most of the new jobs went to outsiders. The level of unemployment is still

14 per cent. Even Toulouse and Nice, with their well-established industrial bases, have felt the effects of the economic squeeze. Toulouse remained resilient until a year ago, but the rate of joblessness has since risen to 10 per cent, mainly due to the pressure on the small and medium-sized companies working

nieds noirs immigrants from the old French colonies in north Africa wrought dramatic changes to cities such as Nice. Marseille and Montpellier in the early 1960s, leaving a residue of racial tension for the Front to exploit.

Mr Le Pen failed in his bid to win a Nice constituency in the

parliamentary elections and the Front's 12 per cent share of the first round of the national the first round of the national vote was slightly below the 14 per cent it achieved in last year's regional elections. But the Front is still a powerful force in French politics with the potential to reassert itself, particularly in the racially splintered south.

National Front extremism to

National Front extremism is undeniably one side of life in southern France, but it is the side that most of the region's visitors choose to miss.

The wealthy owners of the Cap-Ferrat villas, the young zonards heading for liberal Montpellier on the European hippy trail, the multinationals ing up subsidiaries in Nice, and the thousands of tourists pouring onto the Cote d'Azur beaches or into Provence hill villages come for the south's stunning landscapes and sunny lifestyle, not for its politics.

The small world of Investment Banking.

Talk to a bank that can offer you new horizons with a global perspective.

Meet ABN AMRO Bank. We're a worldwide bank with a great many investment specialists at your service. A bank with a truly global perspective. ABN AMRO Bank integrates all investment banking skills, allowing us to offer complete solutions to clients. Our philosophy prizes longterm relationships above incidental deals.

What's more, with 1922 branches in 53 countries, we know how to translate this global perspective to a local level, while providing all necessary support on the ground. And because we don't only provide excellent advice, we can also help you to put it into practice, anywhere.

That's why ABN AMRO Bank will frequently impress you with solutions that open up new horizons.

Jobs challenge for Frêche

away from a fight. In his 16 years as socialist mayor of Montpellier he has clashed with everyone from the gros éléphants, who run the Socialist party, to Jean Bosquet, his conservative counterpart in the nearby city of Nimes.

So far, Mr Frècbe's pugilism seems to have paid nff. He has turned Montpellier into one of France's most dynamic cities, with a string of arts initiatives, social programmes and ambitious architectural schemes starting with Antigone, the postmodernist development created by Ricardo Bofili, the Catalan architect, and continuing with the new Port Marianne develop-

Montpellier is nt a watershed in its davelopment. Mr Frêche's reforms have helped the city attract a steady flow of inward investment, mainly from hi-tech and pharmaceutical companies. But most of the new jobs have gone to outsiders. drawn to the south by the lure of a sunny, less stressful life. As a result, the level of unemplnymen! has stayed stubbornly above the national average and is now around 14 per cent.

Mr Frêche faces the challenge of trying improve employment prospects for the locals at a difficult time when the French economy is still in a fragile condition and the swing to the right in this agring's legislative elections has left him increasingly isolated in the political sphere.

Mnntpellier does, at least, have a sound base to build on. Mr Freche, a former academic, joined forces with a group of like-minded academics when he became mayor to map out a long-term strategy.

The result, according to Mr Patrick Geneste, director of the Ecole National Supérieur de Chimie lo Montpellier and head of the Technopole economic development project, was a comprehensive policy that embraces every aspect of life in the city - social, cultural and economic.

Montpellier, which now has a population of 300,000, traces its roots to the 10th century when it was the crossroads for the salt trade and the pilgrim trail to St James de Compostelle, it has been renowned for its university since the 12th century and is noted for its expertise in medicine and

The academic tradition was still strong wben Mr Freche became mayor in the late 1970s. Today, one in six of the city's inhabitants are students. Mr Freche realised the university could be one of Montpellier's main weapons in the battle for investment against the larger centres of Toulnuse and Marseille which, unlike his city, have long historic links with industry

One of Mr Freche's first initiatives was to revive the artistic life of Montpellier by giving subsidies to reopen theatres, renovate museums, maugurate festivals and even to launch an orchestra, wbicb now absorbs an annual hudget of FFr14m. He

also brought in prominent figures to co-ordinate activity in particular areas, notably Dominique Bagouet, the choreographer, as head of dance

Sport also received additional resources 'It's just as important to have a first division football team as an orchestra if you want to persuade people to come and live here," says Mr Geneste. The university was expanded. A new faculty of law and economics is under construction as part of the first phase of Port Marianne.

The most ambitious of all tha Freche schemes was Antigone, a vast residential and commercial complex covering 40 hectares of land previously owned by the army, adjacent to the 17th and 18th century heart of Montpellier. Antigone has been financed by both public and private money, but the city council has recouned its investment (in building lnw cost hnusing during the first phase of construction) by selling land to private developers.

Antigone is now completed. The Place du Nombre d'Or, the first phase, is now a lively square filled with trees and people. But the later phases are conspicuously quieter with big "To Rent" signs festooned across empty offices. Antigone's admirers see it as a paradigm of public sector development. Its critics complain the sbeer scale of the Bofill design makes it oppressive. "It is the kind of place that people either love or loathe," says a city official. However it is instructive that Port Maranne, the new development, has adopted a more eclectic approach to design by commissioning a number of different architects including Richard Meier, Christian

de Portzamparc and Ricardo Bolill. Despite the criticism, Antigone has undoubtedly helped to establish Montpellier as a cultural centre and, in turn, to persuade investors to come to the city. Montpellier is too small in compete for large-scale investment. It got on the short-list for the relocation of Air Inter, the French domestic airline, only to lose to Toulouse. But it has attracted a steady flow of new companies, culminating in the arrival last year of Del Computers with 250 employees and a GEC-Aisthom joint venture with 350 jobs.

A high proportion of these jobs have gone to "outsiders", many of whom have moved to Montpellier with the incoming companies. Although Mr Freche'a supporters argue that locals have benefited from the availability of construction jobs and that the arrival of the new investors bolsters the local economy in terma of increased taxes and providing new business for services.

Moreover, the influx of new investment will help to cushion the blow of the forthcoming cuts at IBM, the US computer group which came to the city in the 1960s and is still the biggest single private sector employer. IBM plans to reduce its workforce from 4,000 to 2,800 as part of its worldwide rationalisation. Most of the job losses will come from natural wastage hut will still add to the toll of loblessne

In the meantime, the city council hopes to get to grips with the long-term unemployment problem by stimulating the local service sector, particularly tourism, which has increased healthily in recent years thanks to Montpelifer's arts activities.

"We've already put Montpellier on the map," says Mr Geneste. "Now we should turn our attention to the local economy by helping existing companies to expand and to create new jobs for local people."

Nice: the changing face of a not-so-French city

Crime, prosperity and science

the daily newspaper for the Côte d'Azur, produces special supplements on subjects of local interest. Most of the supplements, like the rest of the newspaper, are published in French, but these days some

are in Italian Nice, as its inhabitants are swift to say, is not a French city. It has belonged to France just over a century. Previously it was an Italian state as part of Savoy, the Nicois spoke a local patois, not French, and the Côte d'Azur was called the

For the first half of its "French" century, Nice's Itallan origins were a burden rather than a boon. Marseille was, after all, well-established as the main French port for trade in the Mediterran with France's North African colonies. The Nicois, isolated from the newly unified Italy, were left to adapt to their new nationality. But since the 1960s, as Mar-

seille has declined with the collapse of its old colonial trade. Nice has been free to redefine itself as a centre for the new industries of the future - electronics, information technola time when other cities are still struggling to attract investment, Nice's business parks are packed with French and foreign companies.

The Nice of today has a prosperous air, with the mirror glass towers in the business parks around the airport and the spruce hotels with their pretty palm trees along the promenade des Anglais. Affinent expatriates are still arriving to swell the city's 400,000strong population and unemployment is only a little higher than the national average at 11

But Nice also has its problems. One issue is the crime rate. Nice is now the centre for major crime in southern France, A glance at the front page of Nice-Matin, with its apparently endless tales of drug hauls and sinister Mafia murders, illustrates the conse-

On the political front the city is still reeling from the disgrace of Mr Jacques Médecin, its long-serving conservative mayor and the architect of a string of successful local initiatives, notably the Acropolis conference centre and the network of waterfront highways.

Mr Médecin, whose father, Jean, was mayor before him, Nice. He initiated a string of public works schemes and drummed up high technology investment to broaden the base of the local economy. But three years ago he fled into exile in

The port and hinterland of Nice, on the Cote d'Azur

Uruguay in the midst of a simmering scandal Nice is still in conservative

hands. But Mr Médecin's departure robbed it of its most authoritative political leader. This left a political vacuum which has undoubtedly helped to fuel the rise of another ominent figure in Niçois politics, Mr Jean-Marie Le Pen. leader of the extreme rightwing National Front.

Mr Le Pen is not a Nicois (he was born in Brittany) but he has turned the city into his base for the Front's assault on national politics. He lost his fight for a Nice constituency in this spring's parliamentary elections. But his anti-immigration policies, combined with his success in making the Front respectable by attracting petit bourgeois supporters, have struck a chord in Nice and the rest of southern France.

The image of Mr Le Pen and his sometimes violent skinhead supporters at their seafront rallies and marches is a side of Nice that local husinessmen would rather forget. They prefer to dwell on the positive aspects of the city's cosmopolitan culture - its success in attracting international invest-

The linchpin of Nice's success is the Sophia-Antipolis science park, nestling 20km away in the Provence hills above Antibes. The science park was founded in 1969 but expanded rapidly in the 1980s and now includes more than 900 companies spread over 2.300 hectares.

Cordis, a products company, arrived there in 1984 as the

Sophia-Antipolis is the arrival of smaller international businesses. Tepar is typical. A joint venture between five multinational oil groups including Elf Aquitaine in France and Texaco of the US, it is composed of a team of seven international oli axecutives who are launching Pan Diesel Card, a pan-Eu-

ropean payment card for truck Tepar started in offices near Bif's headquarters in Paris, but looked for a cheaper location for its own small operation and the data processing unit that services it. Mr Carl Clump, chief executive, says its main requirements were the availability of multilingual staff for the truckers' help desk and good air links for the Tepar executives - both of which

cost and time of new product

One of the latest trends in

development.

Sophia-Antipolis provides. Other small businesses have chosen cheaper locations in the business centres around Nice airport. But, despite the recession, more companies like Tepar are still arriving at Sophia-Antipolis, which is now doubling in size to accomme date extra demand.

Côte d'Azur Development says that the level of interest in the sunny Riviera among prospective new investors is still so high that not only are more small business centres being huilt but there are also plans for a new, large-scale above Monaco on the border with Italy.

Simplifying your audit requirements

Moore Stephens' firms in France and Monaco jointly provide an effective solution for simultaneously satisfying both the French and international reporting requirements of multinational groups with French subsidiancs.

Moore Stephens' French offices handle your French reporting requirements whilst our Monaco office, with its resident UK-trained audit team, can take care of your international needs. Because the service aperates an a local basis at local costs, your company won't have to incur the considerable expense of bringing in auditors from further afield, meaning the service is both convenient and cost-effective.

Our Manaco office, established in the Principality 37 years ago, also meets the needs of international operations, the shipping industry, and private individuals. Scrvices include:

☆ Accounting

☆ Auditing

☆ Management advice

☆ Shipping services

☆ Company administration ☆ Company formations

☆ Trust administration

☆ Tax planning

For further information on our services, please contact David Tugman, Peter Brigham, or Geoffrey Woodhouse on 93.30.81.52. or at Moore Stephens Services SAM, L'Estoril, Avenue Princesse Grace, Monte Carlo, MC98000 Monaco.

The international accounting firm of Moore Stephens has member firms in over 60 countries

Coming in from the cold

LONG ago Julius Caesar, ruler of the Roman Empire, was waging war against Pompey. The city of Marseille, forced to choose between the two camps, plumped for Pompey.

"We chose the wrong side," says Mr Jean Pellegrino, dep-uty chief executive of Marseille city council. "Caesar defeated Pompey and sent his soldiers to wreak revenge on Marseille.

The city was destroyed." Mr Pellegrino, like many others involved in the politics of modern Marseille, euspects that the theme of political isolation still haunts the city today. Marseille's socialist city council was shunned by the Gaullist governments of the 1960s and 1970s. The city stayed out in the cold during the socialist administrations of the 1980s when Mr Robert Vigouroux, the iconoclastic socialist mayor clashed with the party establishment in the

Bouches-du-Rhônes region. After the conservative landslide in this spring's legislative elections, Mr Vigouroux is try-ing to rebuild links with the region and with Mr Edouard Balladur's centre-right government in the hope that the change in the French political climate will herald a new era of conciliation for Marseille. The city has undoubtedly

suffered from its political isola-tion. It missed out both on the industrial initiatives of the Pompidou presidency in early 1970s and from the socialists' decentralisation policy in the 1980e. It is instructive that Marseille is one of the few major French cities without access to the high-speed TGV rail network. The TGV link comes on stream in three

Marseille is also the victim of its own history. The city, which traces its roots to 600BC

searching for housing and jobs.

Marseille slipped into decline. Businesses left the city to move to the tax-efficient enterprise zones on its fringes. The pieds noirs left, too. The population fell by 30,000 between 1974 and 1982 and hy 80,000 over the next 10 years. The city, which once had nearly 1m inhabitants, is now reduced to 800,000.

The situation has been made worse by the the quarrels among local politicians, and their disputes with Bouches-

There is a threat of racial tension. Unemployment at 19 per cent is almost twice the national average

when it was founded by the Greeks, flourished during the French empire when it was the fulcrum for trade between France and its North African colonies.

The colonial trade withered when the empire dispersed in the post-war period. The port fell into decline, as did the factories that had been making goods to sell to the colonies. The last Marseille soapworks closed three years ago. The city's problems were aggravated in the late 1950s and early 1960s by the arrival of 200,000 pieds noirs immigrants from the old colonies, all

du-Rhône colleagues, notably Mr Bernard Taple, the husl-nessman and former minister who chairs the Olympique Marseille football club.

There is also the omnipresent threat of racial tension fuelled by the high rate of joblessness which, at 19 per cent, is almost twice the national average and reaches 30 per cent in the most deprived areas of the city. The picturesque, but peeling, facades along the waterfront symbolise the city's problems. Even the Mafia has fled. The main figures in Côte d'Azur crime have moved on to richer pickings in Nice.

two cycles of historic change the arrival of the pieds noirs and the decline of the colonial trade," says Mr Pellegrino. "I hope we are now at the start of a new cycle."

There are some positive signs. Mr Vigouroux has managed to soothe the racial tension in the city. The Gulf War was seen as a litmus test. The mayor took pre-emptive action by inviting all the city's religious leaders to the Hôtel de Ville at the start of the conflict. This display of solidarity seemed to work. Marseille did not experience one instance of racial hostility during the war. The calmer racial climate is

also reflected in the fading support for the extreme right-wing National Front which peaked during the 1988 elections when it received 23 per cent of the votes. Its share slipped to less than 20 per cent in this spring's poll. The centre-right swept the board, winning five of the city's seven parliamen-tary seats from the left, leaving the socialists and communists with one seat each.

The city has also made some progress in resolving its finan-cial problems. Mareeille incurred heavy dehts during the late 1980s, mainly due to the FFr4bn hill for two subway

The port of Marseille, with the Basilica of Notre Dame de la Garde in the back

lines and a water treatment station. The council has since cut costs and delegated to the private sector some projects, such as the construction of an underground roadway. The level of debt has already fallen

from FFr11bn to FFr9bn. Marseille is now in the throes of implementing an economic regeneration strategy.

Mr Jean Clavier, head of economic development, has identi-fied a number of measures. such as more flexible planning policies, to try to dissuade companies from leaving the city. He also hopes Marseille will be able "to huild on its historic strengths" in medicine The strong franc could discourand the port to attract new age foreign companies from investment. setting up in France. There is

This is a difficult time to engineer an economic revival. The French economy is in a delicate state and interest rates are still too high, despite the recent reductions, for companies to feel confident about sanctioning new investment.

also, of course, tough competition for inward investment from other cities.

But local officials are cheered by the more concilia-tory political mood. "At last there is a real will to forget political differences and to build a new consensus for Marseille," says Mr Clavier. "After all, the city needs it."

Toulouse awaits an upturn

Swing to right breaks tradition

THE RED and yellow Occitan flag, the symbol of the Languedoc region that dominated Southern France in medieval times, still flutters above the towers and turrets of Toul-

Toulouse, the centre of the Midi-Pyrenees region, has a long history of intellectual and political independence from northern France. It began with the Occitans in the Middle Ages, went on with Jean Jaurès, the 19th century dissi-dent writer who founded L'Hu-manité, the communist newspaper, and continued with the left-wing liberalism that infused the city's politics until the early 1990s.

But this spring's parliamentary elections marked a dra-matic break with that tradition. The centre-right coalition won a sweeping victory against the old socialist government hut nowhere was the scale of the swing from left to right more extreme than in Toulouse. The city went into the elections as a socialist stronghold with seven of its eight deputies belonging to the left. The result of the elections reversed the balance of political power with the right win-

Smaller businesses are under pressure as big companies cut orders to sub-contractors

ning all but one seat.

To some extent, this political shift can be explained by l'effet Baudis, or the influence of Dominique Baudis, the dynamic centre-right mayor of Toulouse. Mr Baudis, son of Pierre Bandis, another prominent local politician, abandoned his previous career as a television presenter to follow his father into politics and has since revitalised the local

But the right's success really reflects the French electorate's disillusion with the left after almost a decade of government by the scandal-scarred socialists and its concern about the impact of the slowdown in the French economy, particularly

on employment levels.
Until recently Toulouse,
which has a population of
360,000 in the city itself and of 650,336 with its environs, was relatively resilient to the pressures on the rest of the economy. The unemployment level at the beginning of last year was 9 per cent, slightly lower than the national average.

Toulouse was, after all, sheltered by its role as a centre for aerospace and electronics. Aerospace companies converged on the city after World War 1 when many of France's foremost aircraft makers moved there as part of the government's strategy of basing militarily sensitive sectors as far away as possible from the German border. Aerospace is still the higgest single source of jobs in the city because of the presence of large groups including Aerospatiale, Matra and the Airbus

consortium. The lufrastructure of research and training facilities built to service these groups has also encouraged electronics companies to move to the area, thereby creating another source of jobs from such companies as Siemens of Germany,

Motorola of the US and France's Thomson.

However Toulouse has, in the past year, fallen prey to the same victous cycle of crumbling confidence and rising job losses that has hit the rest of France. The level of unemployment is now the same as the national average at around 10 per cent.

The large aerospace groups have remained more or less Intact. Aerospatiaie, which two years ago opened its huge new state-of-the-art Clement Ader assembly plant, has man-aged to avoid any job losses among its 8,500 employees But it was forced earlier this year to put one of its factories on short-time working and has, like its competitors, cut

replicated in electronics, with the hig companies reducing supplies from sub-contractors in order to protect their own operations. As a result, many of the smaller husinesses in Toulouse and the Midi-Pyrenees region have come under intense pressure.

The future looks more promising. The local economic development units, Technopole Toulouse and the Burean Regional d'Industrialisation at d'Acceuil Midi-Pyrenees, both report that, although companles are cutting down on investment, the area has maintained a healthy level of job

In the medium term Toulouse is expected to henefit from the decentralisation strategies now being implemented by a number of state-controlled French companies. Air Inter, the domestic airline, is opening a data processing centre in the city this summer which will employ 500 people. Air France will arrive next summer with another 500 jobs. The long-term ontlook for

the aerospace and electronics sectors is also enconraging. The critical question for aerospace is when the worldwide market will recover from three years of recession. Aerospatiale says that, so far, there is no real evidence of improvement apart from a slight increase in orders from regional airlines, which led the industry into the slump and so might lead it out.

Meanwhile, many of the local electronics companies are small to medium-sized concerns operating in specialised, value-added niches of global markets with strong growth

ATG Gigadisc is typical. It is a medium-sized business with 120 employees and is a leading European player in the market for optical discs. ATG managed to maintain sales of FFr109m in 1992, hnt was forced to reduce its staff by about 10 people when demand declined. Business has since picked up, particularly in the US, its main export market, making the company more confident about the future.

Just as its strength in aerospace and electronics helped Tonlouse to prosper in the buoyant economic climate of the 1980s, so the local politi-cians hope that those sectors will haul it ont of the doldrums in the early 1990s whatever the change in the

Company Location: Vhat's New in Europe?

Locating in Europe is now a corporate priority. The E.E.C.'s 340 million people make up one of the world's biggest and richest markets.

But where do you locate?

For twenty years, the South of France has been a strategic European crossroads with a highly productive concentration of R&D facilities, high-tech industries, universities and specialized graduate schools.

The Var Region is at the very heart of the Mediterranean arc. The Region has intentionally and intelligently prepared itself to wel-

come businesses of any size, ranging from world-class multinationals to mid-size companies.

Access to Mediterranean basin markets is direct. The Var is within easy reach of Nice and Marseilles Interna-

Côte d'Azur Region

tional Air wrts and already has its own High-Speed Train.

Attractively priced business and industrial premises of every type, customized installation assistance services, a state-of-the-art telecommunications infrastructure and a highly qualified work-force. These are just some of the features that make today's Var a business hub for companies seeking a productive European installation.

Now add an exceptional quality of life, Mediterranean creativity and the sheer pleasure of living and working in a superb environment and you have the Var's formula for success.

The Mediterranean Hub

political complexion of the city.

The annual Cannes festival

Film fun goes on

IT was back in 1939, on the eve of World War II, that the launch an international film festival in the sunny Mediterranean town of Cannes

The outbreak of war forced the government to put its plans on ice. It was not until 1946 that the newly formed Centre National de la Cinématographie staged its very first Festival International du Film in the old casino in the heart of

The festival was more like a movie club than an international competition, given that only 300 people attended and every film went away with a prize of some sort or other. The organisers were also chroni-

cally short of cash. The festi-val, intended from the beginning to be an annual event, was scrapped in 1948 and 1950 because of financial problems. But the organisers determined to continue. In 1949 they launched the Palme d'Or to be

given to the film deemed to be the very best in the festival by a specially selected jury of film makers and actors. The first winner was Carol Reed's The Third Man starring Orson

Cannes has since gone from strength to strength. The festi-val has been clouded by controversies from 1968 when it was cut sbort by les évènements, the student riots, in Paris, to 1990 when screeching

mob Madonna, the pop star, when she arrived, clad only in a cream satin Jean-Paul Gaultier corset, for the premiere of In Bed With Madonna.

But the husiness aspect of Cannes has become bigger and bigger. The number of delegates has grown year after year from the paltry 300 at the first festival in 1946 to a daunting 19,905 last year.

Star spotters are often doomed to disappointment. The big stars jet in for their premieres, as Madonna did in 1990 and Sharon Stone last year for the opening of Basic Instinct. But the producers prowling around the hars of the Cariton or the Martinez, or power-lunching on the café terraces along the boulevard Croisette, are more interested in counting digits on their contracts than in signing up "wannabe" starlets on the beach.

Cannes may have lost its Instre over the years, but it is still the annual film event for the media. The number of journalists and photographers has risen steadily from a respect-able 700 in 1966 to 3,545 (from 1.945 different publications or television programmes in 54 countries) last year.

The swanky suites in the Carlton Inter-Continental and the Martinez are booked solid for festival week years in advance. Even lesser hotels are so packed that most of the big producers and studio execotives hillet their lackeys in their villas in Cannes itself or in the hills around the town Some delegates "commute" daily to the festival from nearby Antibes, or even Nice. The 1993 festival is now in full swing. The hotels are as busy as ever. The jury is in session, chaired hy Louis Malle, the French film maker, aided and abetted hy Gary Oldman, the British actor who starred in Francis Ford Coppola's Dracula and Emir Kustur-ica, the Bosnian director, whose Stories of the Beehive won the Palme d'Or a few As for the Palme d'Or, more

Star spotters are often disappointed, but the business aspect has become bigger and bigger

than 20 films have entered this year's competition. The shortest odds are on Kenneth Branagh's Much Ado About Nothing, Jane Campion's The Piano, and the Taviani brothers' Fiorile to win.

Nîmes: 'a vital, vibrant city - not a museum'

The mayor's monument

JEAN BOSQUET is not unaccustomed to the frills and formality of opening ceremonies, having presided over doz-ens in his dual role as chair-man of Cacharel, the French fashion company, and mayor of

But the opening earlier this month of the Carré d'Art, the FFr400m museum and library designed by Sir Norman Foster, the British architect, was a special event even for Mr Bosquet. The Carré d'Art, which stands opposite the Maison Carrée, an exquisite Roman temple, is the most ambitious of all the architectural schemes initiated by Mr Bosquet in his decade as mayor. When Mr Bosquet was
